

RAILROADS RUN THE GOVERNMENT

A Great Monopoly Worked its Schemes—And How its Promoters Succeeded.

MEN WHO ARE CONVINCED.

Whoever a new man is elected to the United States Senate, the railroad...

It may be well to state here that the Pacific railroads were built on bonds issued by the government...

The total amount of the debt now due the government by the roads is fabulous—approximately two hundred millions of dollars.

But to return to Huntington's letters. He is president of the road. He is worth anywhere from twenty to forty millions of dollars—all made out of the road.

The first deal between the government and these railroads was practically bribed through Congress...

The facts were pretty well shown up in some correspondence with one of the constructors of the road named Colton.

Friend Colton: Yours of the 12th is received and I am glad to learn that you had Luntrell under your charge...

Friend Colton: Yours of the 14th is received and I am glad to learn that you had Luntrell under your charge...

LETTERS FROM THE PEOPLE.

The Democrats Can't Win Again Unless They Can Convince Us to Receive the Voters.

WE ARE GAINING GROUND.

Mr. Stratford Answers the Burlington News-Some Words to Free Silver Democrats—Warmed Against the Trojan Horse—Strong Suggestions.

ought to be a Text Book. For the Caucasian.

HORTON, June 22.—Coin's Financial School ought to be a text book in every school in the United States.

From a log school house in the country to the endowed college in the city, if they could have little coin to lecture and hear the positions, wouldn't the next generation be fortified against "John Bull's" encroachment on American soil!

Mr. Cleveland was a goldbug and a very large one. He was a very large one.

WAKE FOREST, June 24.—It seems that the Democrats have again endorsed the Populist idea of finance. They did so in 1892.

and after the Chicago convention, stamped North Carolina declaring by all that was holy in Heaven or on earth that the Democratic party, headed by Mr. Cleveland, was in favor of the free and unlimited coinage of silver.

Mr. Cleveland was a goldbug and a very large one. He was a very large one.

MAJORITY OF THE SPEAKERS KNEW IT: but they did not tell it on the campaign. They deceived the people—Mr. Cleveland was elected.

The Executive Committee of the Democratic party know that it is beyond the possibilities to elect a Democratic President in 1896.

FOOL THE PEOPLE AGAIN upon the financial question, i. e., make them believe that the Democratic party really is in favor of the free and unlimited coinage of silver at the ratio of 16 to 1.

until the party shall have again come into power and have repudiated the action of its party in 1892 and 1894.

Can any man or set of men affiliate with a goldbug party, advocate and defend its principles, bend every energy and exert all the powers that God has given them to elect its candidates and not be goldbugs themselves?

There are a great many people still alive and in good health who believe and the nomination of Mr. Cleveland at Chicago in 1892 was the result of a great popular uprising that lifted itself into the air and came down upon the convention with irresistible force.

Mr. Whitney returned from Paris and found that nothing had been done in the way of organization. Thereupon he sent for the live and ubiquitous Dan Lamont and a few other New York men and talked the matter over.

It seems that a great many of them have some kind of a vague idea that free coinage of silver may be obtained through the Democratic party. It does seem that reasonable men could see the absurdity of such an idea.

As well known, two-thirds of all the delegates to the national Democratic convention are required to nominate a President. Does any silver Democrat honestly believe that with all the odds against them they can ever secure this two-thirds majority? Of the 617 votes cast for Cleveland in the last Democratic convention...
