The Tax on Book Checks. From the Philadelphia Record.

Mr. Thomas G. Sherman, in a communication to the New York Herald ventures the prediction that the the trifling tax of 2 cents each upon bank checks, which has been inposed by the new revenue law, will speedily result in stopping the de velopment of back deposits in rural districts, will lead to almost nurversal payment of sums under \$20 in money instead of by checks, and will thus increase the demand for actual money instead of checks to the extent of \$30,000 000 every day.

Mr. Sherman's prediction will no doubt, be in great measure verified. The payment of money by checks is a great convenience; but if a tax be put upon the convenience the tax will be largely evaded. The per capita of money in use would have to be largely increased if money passed from hand to hand in every trans-actior. The habit of paying in ready money obtains in France, and this accounts for the beavy per capits man is compelled to make a bank out of his own poskets.
