THE PEACE TREATY.

It now seems that the peace treaty will be ratifled on next Monday, the day fixed for a vote. If it was thought, however, that the ratification of the treaty would necessarily and inevitably commit us to a colonial policy, it would stand no chance of ratification. There are a number of Senators who will vote against the treaty. They call attention to the fact that we ought to get Spain out of the equation by ratifying the treaty, and then proceed to determine for ourselves what policy we will pursue. They call attention also to the fact that the treaty in its very language says that the future policy of the government toward the Philippine islands shall be determined by Congress. They also call attention to the fact that every person who has spoken for the administration has denied that there was any intention of pursuing a colonial policy. They also call attention to the fact that the people of the United States in the next national campaign will pass upon the question or policy which will undoubtedly be an issue, and elect a President and a Congress to carry out their wishes. These Senators, however, regret that the wording of the treaty in many respects and especially regret that the same language in reference to the Philippines was not used as was week by Mr. J. F. THE PROGRESS OF POPULIST PRIN CIPLES.

As our readers and the whole coun try know, Chicago, like mony other cities, has reaped bitter experience from following the old party principle of allowing private individuals to own and control public monopolies. A few days ago the Monticello Club, the leading Democratic club of Chicago, met and passed the following resolution:

Resolved, By the members of the we are heartily and unreservedly in favor of the municipal ownership of all street railways and means of intramural transportation at the earliest possible moment and without any renewal or extension of existing fran-

Thus we see that those who a few crazy, impractical, and paternalsic have now learned from bitter experithe common welfare. Each day in every quarter of the country more and more citizens are realizing the fact that the People's party principles are simply the principles of good government represented by Jeffersonian Democracy and Lincoln Republiconism, which principles were defeated by the two old parties when they went into co-partnership with the the divide of spoils they decided to let

GOOD ROADS RATHER THAN STATE

The penitentiary and especially th State farms is one of the biggest ques jons, apart from eliminating the negro from politics as the Democrats promised, the present legislature will put its hands to its nose and say, have to tackle. It never has given satisfaction, except to the bosses who run it. The taxpayers should be protected in two ways, less taxes and not allow State labor to come in contact with free labor.
