THE MAN WITH THE HOE.

From the weight of centuries he leans upon his low and aged the ground. The eagles of ages in his face. And on his back the burden of the world. Who made him dead to rapine and desecration?

STIRRED UP THE WRONG LION.

The Tragedy of a Pink Tea.

By Eliza Armstrong.

ELL me, dear, were you at Anne's tea yesterday?" asked the girl with the dimples.

"U happy?" "Pshaw! that was no fun. I had to do all the other men. I once saw a picture called 'On the Eve of Execution,' and the prisoner looked exactly like a man at an afternoon tea."

"I know it; but be careful to whom you repeat it. You remember that reaction the gave to Omar Mashley, the poet, do you not? Well, I was there, but he seemed sort of reserved when I was introduced to him."

"It wouldn't have, dear, but for the fact that the woman across from me was the real recipient. She had finished telling it when I came in."

"Oh, pshaw! That is an old story. Every woman keeps her love letters to—"

"But this was written to an old sweetheart, dear, before he ever saw her. That sweetheart is now the lightest old maid you ever saw, and it sort of hurts his feelings to be reminded that he once called her his 'love with the apple blossom face.' It seems that the wife can get anything she wants if she refers to that letter at the right moment. Well, I saved that for an emergency. The other evening father brought home a man with whom he was trying to drive a good bargain. He told me that I should be very agreeable to his guest and he would make it up to me."

After long trials of the German, French and English systems it has been decided by the German Government to adopt the English Thorneycroft system of water-tube boilers in all German men-of-war.

Professor Rodolphe Virchow delivered an important address before the Tuberculosis Congress at Berlin, Germany, rejecting the theory of hereditary tuberculosis.

It has recently been found possible to make use of glass for pipes, and it is announced that a firm of glass manufacturers in Western Pennsylvania is now ready to furnish glass tubes that can be used for oil, gas, water, or sewage.

Frigitary is stated to be already in vogue at several places in Europe. The treatment consists in standing the patient, well protected with furs, in a freezing box cooled to 293 degrees or more below zero, this daily cold bath being continued ten minutes.

A singular bacterial disease proved to be the cause of decay of ancient metallic implements and other objects. It appears in the form of small excrescences or "alveolations," which become the center of a fungus growth.

Ice storms are commonly believed to be due to rain falling on a surface cold enough to freeze it. The fact that the objects iced are often comparatively warm makes this simple theory insufficient, and observations during a remarkable ice storm last October, in Germany, have proven Dr. W. Meissner's theory.

While Mr. Webster was once addressing the Senate on the subject of internal improvements, and every Senator was listening with close attention, the Senate clock commenced striking, but instead of striking twice 2 p. m., continued to strike without cessation more than forty times.

SOME FISH.

How the Middy Managed to Feed the Sub-Lieutenant.

The followers of Izak Walton on board a man-of-war were wont to ply the gentle art (with a line alone) from over the ship's side, during the evening, says the Cornhill.
