of America, a Proclamation. When, nearly three centuries ago, the first settlers came to the country which has now become this great republic, they fronted not only hardships but terrible risk to their lives. In those grim years the custom grew of setting apart one day in each year for a special service of thanksgiving to the Almighty for preserving the people through the changing seasons. The custom has now become national and hallowed by immemorial usage.

We live in easier and more plentiful times than our forefathers, the men who with rugged strength faced permitted, W. B. Hamrick and others now as at any previous time in our history. Kaolin in Cleveland. Shelby, Special.-In mining for monazite in the neighborhood of Douole Shoals, 12 miles above Shelby, a ine quality of kaolin has been found n sufficient quantities to justify the establishment of a plant for getting out the same. Eight thousand dollars worth of machinery will be put in at an early day. As only natural gas can be used for burning the finest shina, the clay has to be shipped to East Liverpool, Ohio, that being the only place in this country where gas is found in sufficient quantities for the purpose. As oil has been found in small quantities on both sides of the Blue Ridge Mountains as far south as Rutherfordton, it is not improbable that we may have an "East Liverpool" within our own borders at no distant day. Mr. McMaster, of Virginia, who owns the mine, is exhibiting some pieces of very fine china which was made from this Cleveland county dirt.

High Point Fire.

High Point, Special.—The Lindsay Chair Company's plan suffered a loss by fire of \$1,000 or more. A few minutes past 7 o'clock the alarm was sounded and when ten minutes later the fire was thought to have been put out and people were returning home, a second alarm was given and the flames were seen to leap upwards in great volumes. The fire originated in the engine room, where several boilermakers were at work, the factory having been closed down on that account. The damage by water is the heaviest, the whole building, machinery, cabinet and engine rooms being flooded. The oss may probably exceed the figures given. The fire will not necessitate a thul down but a day or so of the plant, as the wheels will commence to revolve again next week.
