Puree Months,

BEGIN WORK NOW FOR 1908. The democrats claim they made great gains in their vote in this State this year and that the Republicans lost votes. Rut let's see what are the facts? The democrats did not poll as large a majority as they did even two years ago. Just what the democratic majority is cannot be stated accurately until the official returns are canvassed and announced, but there is no doubt but that the figures will show that their majority is not as large as two, four or six years ago. The Industrial News points out the fact that the past three elections have each shown a democratic loss and a Republican gain; that Governor Gienn, though elected, received 16,000 votes less than candidate Watson received, though he was defeated, in 1896 and about 57,000 votes less than Governor Aycock received in 1900. This shows that the tide is not running toward democracy, notwithstanding the fact that the democratic papers and politicians put up a more vigorous fight this year than in any campaign since 1900, when they used the drunken redshirters, armed with winchesters, in addition to the ballot box thief, to put them again
