What this country needs, Mr. Wilson set forth, is not government ownership of railroads, etc., but laws that will attack and punish presidents and general managers of railroads, for evasions and violations of the statutes. Stock manulipators he calls "sheer thefts" and says they should be punished as such. Failure to do so, in his mind, is "like overlooking highway robberies.'

"Every corporation," the educator stated, " is personally directed either by some one dominant person or by some group of persons. Somebody in particular is responsible for ordering or sanctioning every illegal act committed by its agents or officers; but neither our law of personal damage nor our criminal law has sought to seek the responsible persons out and hold them individually accountable for the acts complained of. We have never attempted such statutes. We indict corporations themselves, find them guilty of illegal practices, fine them and leave the individuals who devise and execute the illegal acts free to discover new evasions."

Such acts could be passed and should be if we are to better our industrial conditions, Mr. Wilson be lieves. Unless something of this nature is done and done quicly, he fears Socialism will result.
