The Senate will now wrestle with the Tariff bill forty days and nights.

The Democratic politicians are still shaking the judicial plum tree-but the thing won't drop.

The Democrats do not seem to be any nearer together on the tariff than they are on other matters.

The minority members say that the tariff bill does not suit them, yet they won't go on record with a bill of their own.

Fourth, That such reductions in the rates would not only lessen the tax on the consumer and increase the revenue but it would make an income tax unnecessary. Fifth, That if, peradventure, the

bill should not raise enough revenue after being so amended, it would be wise to add an income tax provision as a precaution and also in order to give the Supreme Court another chance to pass upon the constitutionality of such a tax

There are some Republicans as well as Democras in favor of the income tax amendment, and strange to say, there seems to be more Republicans than Democrats who are sincerely anxious to lower the rates of duties in the Aldrich bill in the interest of the consumer.

The Judgeship Situation.

President Taft has taken not only a long time but he has announced that he will take even more time to look over the field and be sure that he is right before he appoints a Federal judge for the Eastern District.

The situation at present seems to be that the President has abandoned his former idea that it was necessary to go outside of his party to find a man of character and capacity for the position and to appoint a Demo-

THE LIFE OF THE FARMER.

I warn my countrymen that the great recent progress made in city life is not a full measure of our civilization; for our civilization rests at bottom on the wholesomeness, the attractiveness, and the completeness, as well as the prosperity, of life in the country. The men and women on the farms stand for what is fundamentally best and most needed in our American life. Upon the development of country life rests ultimately our ability, by methods of farming requiring the highest intelligence, to continue to feed and clothe the hungry nations; to supply the city with fresh blood, clean bodies, and clear brains that can endure the terrific strain of modern life; we need the development of men in the open country, who will be in the future, as in the past, the stay and strength of the nation in time of war, and its guiding and controlling spirit in time of peace.-Theodore Roosevelt, in The Outlook.
