THE STATE MORTGAGE TO MON-OPOLIES AND TRUSTS.

A few days ago Chief Justice Walter Clark delivered an address before the law class of the State University. He discussed in a very clear and emphatic manner many grave conditions that now confront the people of our State.

He pointed out that we had one of the greatest and richest States in the Union, and that our citizenship was not surpassed by any. Yet, he said, we face the humiliating spectacle of a bankrupt State Treasury, with a deficit of over three-quarters of a million dollars, which deficit is growing larger, and at the same time that we have one of the worst public school systems in the country.

He pointed out that there is no excuse forthe State being in debt, because a State, like an individual ought to live within its income. On the other hand, he pointed out the fact that the State, while rich in resources, was really poor because it was being robbed, every year, of over twenty million dollars by the monopolies and trusts.

He showed that there was one railroad in the State that was paying taxes on only \$100 per mile, while the road should be taxed on more than \$8,000 per mile.

He next showed the terrible drain on our State through freight discriminations. He charged that the State was being robbed each year of not less than twelve million dollars by these discriminations alone.

He even went so far as to quote Mr. Alexander, the President of the State Farmers' Union, as saying, "That the State Senate of North Carolina is now, and has been for years, controlled by the corporations and trusts," and he asked each member of the law class to examine the votes of the members of the Senate on every question where the interests of the State and monopolies conflicted and determine for themselves whether or not this was true. The Chief Justice drew a vivid picture of conditions, citing facts and proving his statements, but if he is correctly reported, he offered no remedy.

Judge Clark knows that the real trouble is that Senator Simmons mortgaged the State to the trusts and monopolies in order to get their support for the Democratic machine and to secure his election to the Senate.

Judge Clark should appeal to every member of the law class and to the whole State, to rise up in their manhood and declare that this Simmons mortgage or the State is a fraud more vicious than carpet bag bonds.

A FRIGHTFUL SACRIFICE OF LIFE, TO GREED.

A few years ago Congress passed a resolution authorizing the appointment of a Commission to investigate board has just made its final report decide to create.

"The railroad officer responsisible for results does his utmost to meet the demands made upon him. His first responsibility, as he sees it, is to provide earnings. He knows if he fails in this somebody will be found to replace him. It is but natural that the railroad official has, in the struggle for existence, given chief attention to the conditions directly affecting the fiancial end of the business, and less attention to the conditions affecting safety. Safety he very much desires, but earnings he must have. Human life has a value, the same as freight, and if it has been lost in transit it is paid for and becomes one of the operating expenses."

Here the whole question is given in a nutshell. Human life is sacrificed in a wholesale manner, in order that the stockholders and owners of the road may receive large dividends. draw from the appropriations to all 13, 1913.

The board sets out, what every one the State institutions and the Legisknows, and that is, that most of this lature would not only not be able to terrible loss of life can be prevent- grant the increased appropriations ed by keeping the railroad tracks in better condition and by adopting the block signal system to prevent collisions of trains, and by a number of have to be determined after a legisother safety devices, well known, and now in use on practically all the railroads of Europe. As the board points died in any light, but always there are killed and injured where these devices are not used, and the only reason they are not used, is to save for the stockholders and owners.

In short, the first object of the be reversed. Safety should be the tion of the country would get rebates which gives them an advantage over

Every one will admit that the railoperate the roads or they are oper- ing the money into a rat hole. ated by any other private individual If the present regime can't give requires, can only be accomplished at the helm in their places. through Government ownership.

In the countries where the Governments own and operate the railroads, there is the smallest loss of life. In such countries there is no discrimination, and there are also very low rates, for the roads are operated at cost, for the benefit of the public and the business world.

The Democratic administration, which is just coming into power, has declared that they will break up trusts, by reducing the tariff. If this Democratic administration succeeds as well as the former Demoeratic administration did, in this lie, they can certainly hurt the trusts, but in doing it they will hurt the general public more.

The trusts cannot be broken up by reduction of the tariff, because trusts exist in free trade countries as well as in this country. Every trust in existence to-day would continue to live and be able to break up all their competitors, even under free trade, provided they can continue to get rebates, and besides, an increasing cost of human life will continue just as long as the railroads stay in private

Therefore, the remedy for the frightful loss of human life and the only sure cure for the trust evil, is public ownership of the great transportation lines, which have in their grasp the life of every business and every industry in the country.
