One of the best weapons the Democrats will have in the present campaign 18 a Wanamaker advertisement. That firm boldly proclaims that the new tariff law has lowered prices. This is a sample of one of his advertisements:

Don Cameron and "Hayseed Populists." Our Washington correspondent is reliably informed that Senator Jones is a backer of the Cameron presidential boom. Doubtless he hopes for second place.

"The talk about the presidential aspi sylvania, upon a free silver platform, which was current in political circles during the heat of the session of Congress, is reviving, and in the light of recent events and the somewhat unexpected popping of Senator Jones of Nevada into the populist ranks is assuming renewed significance. For some time it has been believed that Cameron really cherishes the ambition to head a new faction in a presidential race and had fixed upon the advocates of free silver coinage to form his party. And now the quid nunces say that a new light is breaking upon the situation. Agencies, which it is claimed are to bring about the amalgamation of the silver forces into a party which Senator Cameron is to head, are said to have commenced work. A close friend of Senator Jones of Nevada authoritatively stated to your correspondent that this apostate republican senator is a backer of the Cameron presidential boom. This statement, simple in itself, opens up a wide range of political probabilities when

"It is said that when Senator Jones takes his place at the head of the silver party, which he has just embraced in a dramatic avowal of allegiance, a position which, it is asserted, he will undoubtedly occupy, by virtue of his long prominence in na tional affairs, his efforts, after looking to his own senatorial interests, will be devoted to an attempt to swing the silver party into line for Don Cameron. It is said by the silver men that fine discrimination is to be made against what they are pleased to call the "hayseed populists" -a term which they explain as meaning those people who hold to the fantastic ideas of the subtreasury stamp. course they expect to catch the "hayseed populists," for free silver is a plank in the populist platform, but the aim of the new silver men is to attract to their ban ner a class of voters who would not join a distinctively populist movement, but who system. This is the germ of the new WHEN populists and Republicans fuse Don Cameron presidential boom which the political circles are whispering

A Preventive of Hog Cholera.

A correspondent of the News and Courier in Williamsburg county reported a few days ago that the farmers in that county had lost many of their hogs re cently from cholera, and similar reports have been received this summer from other counties. The bulletin of the Florida Agricultural Department, just published, reports another preventive which is used in Pclk county, and, as stated, with invariable success. The report is as follows :

"The pork crop is at least 50 per cent. over an average. The farmers are keepthe light stock of foreign goods on hand ing their hogs free from cholera by the and the heavy lots in port waiting. At Huntersville on the 17th, Pineville on the 18th, and Matthews on the 19th.

The Village Church.

We copy from the "New York Outlook' striking article, showing how average town or village church can easily be made to grow in spiritual life and enterprise, by adopting some of the numerous intellectual and aesthetic measures now in use to quicken moral and religious zeal and activity.

The article has reference especially to the New England "Town;" but we see no reason why the same methods would not as well apply to any church congregation, either in town or country-if sufficiently large - to inaugurate the work. And we hear of several ministers who have started this or similar movements among their people; one in this county-Dr. Wharton, of Steel Creek.

For Political Effect.

An English committee has been sent to this country to investigate lynchings in the South, and the New York World telegraphs the Governors of the Southern States for their opinion on the action. Governors Northen, of Georgia, and O'Ferral, of Virginia, sends the World scatching replies, "that they had best sweep in front of their own doors before seeking to regulate us; investigate murderers, Jack the Ripper, etc." Gov. Northen asked: "Why come before an investigation to 'denounce' the South just prior to a Congressional election when we have just had a negro lynching in Kansas April 2nd, another in Ohio on the Sabbath, April 15th, and when white Poles and Hungarians have recently been the school ages of 6 and 21 years, it will give nearly 8 cents to each. brutally butchered in Michigan and will go in for a change in the financial Pennsylvania, and negroes run out of Franklin Park, N. J., in berds."

Governor Carr's response .- " North Carolinians are a law-abiding people, and hence opposed to lynching. believe that the law is adequate if promptly administered. The sovereign States are competent to cope with the question without the officious intermeddling of a foreign power."

"THE field of war in China," says the Philadelphia Record, "may possibly embrace the tea fields and cut off tea shipments to this country for a season." Wel what of it? The South can stand it. The South got along very well without any Chinese tea four years and can do it again. Mrs. I. V. Franklin, of Augusta, Ga., says: "In those days of self-denial there were wonderful things in the cuisine department -much that was mysterious. Raspberry leaves were used for tea. Persimmons and black pepper formed favorite ingre dients for fruit cake, blended with hickory nuts and walnuts. Groundnuts and parched okra made coffee, and sometimes sweet potatoes. Innumerable delicacies were originated." We would like to say to our Philadelphia contemporary that the raspberry vines are in full leaf this year and that our old friends the sassafras bushes were never more flourishing. The South is a great country to be sure.

The hay crop of the United States, in 1893, amounted to 65,766,000 tons, valuas the average cotton crop. What proportion of this was raised in the South we do not know, but we do know that the South ships very little, for she doesn't grow enough for her own use, and very little for commercial purposes. The South ought to be, can be and some day will be the greatest grass-growing section of this country. She can do what no other section of the country can do, raise two crops and in some sections three crops a year, and can raise more varieties hard to grow our planters spend more grass-growers of the North spend in growing it, and as good or better grass than can be grown in some of the North ern States A Northern farmer would think you were playing Baron Munhcau-sen with him it you told him of clover and timothy six feet tall and so thick that a mower couldn't be driven through it, but we have seen that repeatedly in isn't putting on any airs as a grass. grower. RALEIGH, N C., Sept. 10, 1894. Governor Carr offers rewards of \$100 each for three criminals who merit all the punishment the law can give them. They are Bud Harris, Will Downes and Plato Branlett, who outraged repeatedly and most brutally Jane Bryant in Haywood county. Another man was concerned in the affair, but he has been captured. These are all young white

It is now quite certain that no work will be done on the Baptist Female University here until next spring. It is a great undertaking, and much money will be required. There has been great delay in starting this movement. It was expected by its promoters that the buildings would be completed and the University in operation long ere this.

It is a little like a blow to the populists, this sharp letter of ex Judge Connor. What will be done now no one seems to know. Will the populists and Republi cans vote for him or will their executive committees put up a new man? As yet there are no signs of any movement in this direction.

The best authority, here says that the Republicans and populists are in straits, far as holding their people together is concerned. They are not pulling together ike a well matched pair of horses. Marion Butler is the coolest man in the combination. He has not as yet established any headquarters here, nor has Holton, the new Republican chairman, been heard from. Some people allege that Butler and Holton will have headquarters to gether.

Go!-The business men of the United States have had a long, hard time, in which effort brought little return; but now, remarks the" American Grocer,' the chief obstacles are out of the way, and ordinary prospects of success. Success however, cannot be attained without intelligent effort. The farmer has to plant and cultivate and so must the merchant and manufacturer. It is useless to have meritorious goods unless you let the public know it. The most successful business men everwhere are those who realize the great fact that the Press gives them access to the minds of the people; without the Press most of the great fortunes made in business would have been impossible; "that is why," said one of our most successful merchants, "I am always glad to see an advertising agent. I may not be open to do business with him at the time, but I always learn something that helps me work intelligently when l am ready to advertise." Advertising is the seed of business. Every business man should provide enough seed from which to raise his crop, and now, when the business interests of the country have got a chance to go ahead, is the time to plant it.—American Art Journal.

Some Large Bounty Figures.

A Washington special in Saturday's Baltimore Sun says: The reported action of the sugar plan-

ter's convention at New Orleans favoring an alliance with the Republican party on national issues on the ground that they had been betrayed by the Democratic party in denying them protection for sugar, calls attention to the subject of sugar bounty. The records of the Treasury Department show that during the fiscal year ended June 30, 1894, payments as bounty on sugar aggregated \$12,099,-899, of which amount \$11,114,290 was on cane sugar, \$852,174 on beet sugar, \$17,-312 on sorghum \$116,121 on maple. Of the bounty on cane sugar \$10,886,896 was paid to producers in the State of Louisiana, \$223,166 to those in Texas, \$22.113 in Florida and \$15,005 in Mississippi. The records also show that the \$11,114,290 bounty on cane sugar was paid to 579 producers, which makes an average of \$19,195.56 to each producer. The figures on acreage for the year ended June 30, 1894, are not yet all in, but those for the preceding year show that in the State of Louisiana the bounty averaged \$47.52 for each acre of cane produced, in Texas \$37.60 per acre and in Florida \$58.23 per acre. It is believed that the average bounty per acre produced in Louisiana tor the year ended June 30, 1894, will be about \$53.

Trustee's Sale.

By virtue of the authority vested in me by a certain deed of trust, executed to me by R. R. Crawford and wife, and recorded in the office of the Register of Deeds of Mecklenburg County, N. C., in Book No. 98, Page 6, etc., I will sell for cash, at public auction, at the Court House door in Charlotte, N. C, on the 12th day of October, 1894, at 12 o'clock M., a certain lot of land in the city of Charlotte, N. C., being designated on the plan of that city as lot No. 589, on the corner of C. and Third Streets, 100 by 200 feet, known as the S C. Alexander place, one ten-room frame dwelling, and one three-room frame dwelling; agood well of water is situated on the premises. The lot will be divided as follows: One lot 100 by 150 feet, upon which the well and the large dwelling is situated; one lot 50 by 100 feet upon which is situated the smaller dwelling. The property will then be sold as a whole, being the same land mentioned and described in deed from J. L. Brown and wife to Mrs. C. E. Brown, recorded in the office of the Register of Deeds of Mecklenburg County, N. C., in Book 15, Page 233, etc., to which said deed, reference is hereby made for more particular description. This 10th day of J. W. HANES, 5w Sept. 14, 1894.
