that has been carefully calculated Health-A Well May Be Infected With out in the case of a city of New Typhoid Germs a Day or Two After Its York. The city of Albany draws Waters Have Been Examined and Found its water supply from the Hudson river close to the Warf, and the out The following timely paper was let of the sewage, and the annual read by Dr. F. P. Venable, of the cost in deaths in loss of wages dur-

chair of cheistry in the University ing sickness in expenses of fuuerals and doctors' bills amounts to over of North Carolina, at the recent \$200,000 a year. This is the tax Board of health meeting in Charthat typhoid fever lays upon the city of Albany.

Dr. Venable said: "Ladies and "It is not surprising then ithat gentlemen for a short while this some cities go to great expense in morning I wish to interest you, if order to avoid this tax. Chicago possible in the subject of connection drew its water from the lake, near between drinking water and typhoid the shore in 1892. It took in water fever, I wish to interest all the wor much of the filth the city threw in thy citizens; the doctors and the to the lake. The number of deaths patients; especially the patients, in by typhoid feyer alone were 1,790 this important subject. You all for that year. In 1894 they used know the serious nature of this disthis water taken from further out ease. You have some idea of its in the lake and the deaths were reprevalence. 1 wish I could give you duced to some 700. They are still reliable statistics of this country of not far enough out to prevent trouours and even of our state to show ble coming from that filth and they how prevalent this disease is but bave a very serious trouble before exact statistics are lacking. The vic them.

tims of this disease are, counted by "This watching of the water the thousands every year. In great supply a really saving money, Britain, where exact statistics are then. kept we learn that the number an-

"If you cannot have good pure nually talling victims of this disease water can you purify the water amounts to about 6,000, and that which yo have?

means forty, fifty or sixty thousand "For those using wells--the wells cases of sickness and a great loss to of a town or city-I must say that the community. If there is one there is little hope of pure water well established fact of scientific and none of purification. There medicine it is the connection bemay be pare wells in a city, but it is tween drinking water and typhoid not a very likely accident. The fever. It ought to be impressed whole surface of the ground becomes cont minated with filth. It goes down not merely a tew inches,

"You may know of this connecbut through feet of soil. It can nection but do not realize it. In easily be carried down into deep order that I may not rely simply wells. The close aggregation of the upon memory I will take two or population makes the contaminathree recorded examples. Perhaps

WORLD'S GREATEST SHOWS.

Ringling Bros.' Circus to Exhibit in This City Shortly.

Charlotte

Ringling Bros.' World's Greatest Shows, Low everywhere acknowl edged by press and public to be the biggest and best of all arenic exhibitions, will exhibit in Charlotte, Monday, Nov. 16. The performances to be given in this city will be identical in every way with those presented at the immense Tattersalls Amphicheatre, in Chicago. forty-five consecutive performances, during which the great structure was crowded day and night by thousands of enthusiastic spectators The pub lic has learned to associate the name of Ringling Brothers with all that is great in the amusement line, and the show itself is a guarantee of its excellence. It is interesting to learn, however, that all previous efforts have been completely dwarfed by the wonders of this season's display of high-class acrobatic, aerial, menagerial, hippodromic and spectacular features. Among the arenic celebrities are many European specialists entirely new to this country. Chief among these are the French family of expert bicyclers and roller skaters; Le Eluer, the intrepid French diver; the Three Picardos; the acrobatic Brothers LeRoy, and the Landauer Troupe of nine classic models from Berlin. Among the many other sensational features are the

incomparable Nelson Family of nine lady and gentlemen acrobats, the highest salaried arenic act in the world; the flying DaComas; M'lle other male and female riders of world-wide reputation; three herds of elephants in the world; Mons.

All through the campaign Publie Opinion has successfully maintained its reputation for fairness. Every shade of thought upon all topics is represented in its American Affairs deparament; not one man's opinion but the opinion of every man who is at all representaive. Public opinion (published at New York) is the one journal that enables its readers to keep posted upon the happenings in every field of human activity. Your local paper furpishes information as to purely local affairs, and Public Opin on furnishes a view of national affairs. To go outside these two pas pers, except for purposes of special investigation, is unnecessary. There will be much to learn in the political field after Nov 3. The issue of Public Opinion for Nov. 12 will con tain about 200 expressions of opinion upon the result of the election from the press of this and foreign countries. Send 5 cents for this issue or we will send a sample copy of our own selection free. For \$2 50 you can be a thoroughly posted man for one year, \$125 for six months, 65 cents for three months.
