The cotton mill men in North Carolina will be interested in learning that report has been received at the State Department showing to what extent the weaving industry has reached in Japan. In 1896, the report goes on to say, there were 949,123 looms, with -, 042,866 persons engaged, of which 985,-016 were women and girls. The value of the textile product for the year was \$96,187,253, made up in part as follows: Silk textiles, \$46,431,401; silk and cotton mixed, \$10,281,272; cotton, \$37,083,757, and hemp, \$2,281,467.

POSTMASTERS AND CIVIL SER-VICE. Civil service reform has taken on an other phase. Two presidential post masters, when discharged, declined to turn over their respective offices to their successors, but finally recanted and "threw up the sponge." Being presidential officers, their counsel advised them to vacate, which they straightway did. But the fourth-class postmasters now claim that according o the letter and spirit of the President's July order specific charges against their official integrity must made and they given an opportunity to reply before they are liable to removal. This may prove to be a nut that wil be hard to crack, and from present in dications the fourth assistant postmas ter general will have a number of suits on his hands. One thing is certain fourth-class postmasters are officers of he government, not appointed by the President, and not a few of them get ot less than \$500 and not exceeding \$2. 000. As there was no reference to fourth-class postmasters in the Presi dent's order extending the civil service rules, they claim now the protecting

wing of the civil service in the impar

tial discharge of their official duties What it will all amount to remains to FITZHUGH LEE'S RETURN. Gen, Fighugh Lee's return from Cua just at this time is thought to pos sess political significance in the Old Dominion State, General Lee has never forgiven Senator Martin for his defeat in he race for the senate some years ago and in political circles here and likewise across the river in Virginia it is generally conceded that Gen. Lee's reurn at this juncture is the signal for another contest with Senator Martin for the United States senate, as some of the members of the Virginia legislature elected this year hold over four years and vote during their term for Snator Martin's successor. It is an open secret, however, that General Lee has become inoculated with Cleveland's gold standard views, and as a result the white metal has lost many of its former attractions for the great cavalry fighter and war governor of Vir ginia. General Lee's popularity in Vir ginia has been something akin to that of the late Senator Vance's in North Carolina, but unless he can dance to free silver music he won't black the poard in Virginia politics this year. There is a rumored combination be ween Governor, O'Ferrall and General Lee whereby one or the other of these dignitaries is to secure the coveted plum, but according to what Congressnan Swanson says, both combined will not get a "baker's dozen" in the Vir-

ginia legislature on the gold standard CAMPAIGN IN MARYLAND. The Maryland campagn opens in a few days and will be the liveliest political fight in that State for many years. Both siles are lining up for the pattle, with both equally sanguine of victory. A great deal depends upon the result in Baltimore city proper, in fact it all depends upon that former citadel of Maryland Democracy. The one hopeful and encouraging outlook for the Democrats there lies in the fact that in the city of Baltimore the Republicans are badly divided and fac ional fights bid fair to make serious inroads upon Republican strongholds At best the Republicans will go int the fight on the defensive, having had the State government for about tw years without affording any relief for the evils and hardships against which

# HANNA'S THRIFT.

Using the Funds of the Republican National Committee to Buy His Seat in the Senate .-- Rumored Action of the Bank of England .- Cary in the Field For Senator.

Correspondence of the News. WASHINGTON, Sept. 13 .- Boss Hana has all the proverbial thrift of the very rich man. He knows the art of making others pay for what he wants for himself, and he is utilizing it in the Ohio campaign. Although there are no the Republican National Committee is taking part in it and is putting up money liberally to help Hanna get that coveted election to the Senate. To all ntense and purposes, Boss Hanna and his man Dick, who are the managers of the Republican campaign in Ohio, control the Republican National Committee and the surplus it had left in its treasury from the big contributions to

the McKinley fund, and fears are expressed on the part of Republicans from other States, who had hoped to finger some of that surplus in the Congressional campaign next year, that i some of them do not hesitate to say that Hanna ought to use his own money in his efforts to buy his return to the Senate. Boss Hanna is also making the Government of the United States assist him to the extent of many thous ands of dollars, by carrying through the mails free, under Congressional frank, a bulky volume, printed at the Government printing office in the form of the Congressional Record and con taining speeches and complications from public documents. In the opinion of the silver men, now

in Washington, the action of the Bank of England in deciding to hold one-fifth of its reserve in silver, will not prove any direct benefit to silver, but they believe it will help silver indirectly by increasing public interest in Europe in the principle of bimetallism. The think that the action on the part of the Bank of England was taken more to conciliate the growing silver sentiment Great Britain than as a result of the sit of the bimetallic commission to England and its conferences with representatives of the Government of Great Britain. Some of the silver men regard the whole business as nothing more than a trick on the part of the gold standard financiers of England to make the silver men there and over here believe that they are gradually coming around to bimetallism of their own accord, in preference to waiting until they are compelled to do so. Thes gentlemen are firmly of the opinion that England will never willingly adopt binetallism, and that the only way to
