Our market took the foreign selling ell until well towards the last, when staggered under the weight of the ontinued liquidation. SUMMARY TIMES-DEMOCRAT. NEW ORLEANS, Oct. 12.-Bullish in spiration, largely dependent on the promise and fear of frost, gave up the ghost yesterday when Europe's most stable recruits tumbled in consequence of the Balkan war, and when Secretary Hester caused some extremely bearish chalk marks representing the week's movement of cotton bales to be posted on the exchange blackboard. It is clear to any man, or ought to be, that if Europe is going to take a pessimistic view of the effect of the Balkan war on finances, the trade is fully justified inassuming that the ultimate effect on trade on the surplus supply carrying capacity abroad will be bearish. The board of directors is composed of 12 members, the eight appointive members whose names will be made known next Friday night, and the four officers of the club who are members ex-officio. The directors, who are also heads of committees, have this year been chosen with a view to their special fitness for the work of the particular committee which each one will head, and likewise the members of the sub-committees have been carefully selected with the same view in mind, so that the working force of the club promises to be greatly re-enforced and strengthened and rendered more efficient than has ever been the case before. ### A DOZEN SOUADS ON CITY IMPROVEMENTS

Activity in Public Works Of The City And County At Present Is Unprecedented

Not less than 12 squads of workmen have been busy during the past week employed on the various municipal developments now in progress, this number probably representing a daily payroll and material expense of from \$1,500 to \$2,000.

These squads have been employed as follows: West Trade street, west of the Southern passenger depot, two squads, one for city and one for street joy railway; North Graham street, two squads, one for city and one for street railway; East Trade subway, two, one cle for city and one for the railroads; Central avenue, one squad on streets and another on sidewalk paving contract; Myers Park, private development, one squad; South Tryon street, two squads, one for city and one for street railway.

It should also be borne in mind that system to the river and many men are at work on the new reservoir at Chadwick-Hoskins. In addition to these dozen squads named the city has emplayed several street gangs on regular routine work, and the county has three chaingangs now building roads. and including about 120 men, while two dredge-boats are also working on two different creeks, and employing considerable forces of men.

Taking all of these activities into consideration and also the probability that three large street paving forces will soon be employed on the streets, the quantity of work that is under actual way and construction is something unusually great and supplies plenty of argument for the proposition that this city and county just now are the scene of unprecedented activity and hustle, with many important public works under way.
