The firm of Tucker & Laxton that has the contract for building the road has been instructed to wire for all necessary materials and to buy them from factories that can make the quickest deliveries so that no delay will be encountered in getting the roadbed laid and the line in operation. It is the plan of this firm, in obedience to this urgent request of Mr. Chatham, to employ just as many lahorers as can be secured, to build the line. From Heath's corner on Central avenue to the turn at Belvidere ave- rather sharp tones asked: nue on Chatham Estates, practically no grading will be necessary, owing to the fact that for a good part of this distance, the proposed route of the road has already been graded incident to the building of the old line for storage battery cars which the Char-

Only from the turn at what is known as the Van Landingham corner on the Plaza to the country club is any great amount of grading necessary, and it is believed that this can be done in a short while, by the time, indeed, the rail-laying forces have completed the line up to this point.

Mr. Chatham has completed negotiations with the Atlantic Bitulithic Company to extend the paving contract on the Plaza down Belvidere avenue to the corner of the original Mr. Paul Chatham, president of club property and from this point to Chatham Estates and the Charlotte the club house, owners of contiguous and adjacent properties have agreed to extend the bitulithic so that the drive from Independence Square to the club can be made on a stretch. of unbroken bitulithic.

The car schedule will give a service to the club comparable with any to the other suburbs of the city with pendence Square to the club by that the possible exception of one or two.
