WALL STREET.

New York, June 19.—War shares were the only feature of interest in today's very dull stock market. Baldwin Locomotive made a new high record at 66 1/4 and a few other specialties of that class, including Bethlehem Steel, rose 1 to 2 points.

There was scarcely any demand for the high class railway issues, some of which remained unquoted for the entire session. The closing was irregular. Bonds were steady.

BREAD "CARD" SYSTEM STARTED IN HOLLAND

Amsterdam, June 5.—(Correspondence of the Associated Press).—"Government bread" and "bread cards" on June 1 this year became an institution in Holland for the period of the war, from which the people of the Netherlands suffer much while only looking on. The Dutch, however, are not compelled to eat government bread nor to take bread cards nor restrain their appetites by order. The system here is based on the philanthropic principle and its introduction does not imply any fear of a shortage of flour or bread.

The idea of issuing bread cards arose owing to the ever-increasing number of people in Holland whose resources have been reduced since war broke out in Europe. The drafting in to the army of thousands of the bread-winners in preparation to defend Holland against any attack on her neutrality and the decreased opportunities for those who remained at home of finding employment as a sequel to the lack of raw materials in various trades, have rendered the poor as a rule poorer, while those persons possessed of means have become wealthier, since they have been able to take advantage of opportunities of making profit by laying out their cash.

Immediately after the beginning of hostilities the Dutch government requisitioned all grain and since then all imported grain has been consigned to it. Many bakers took advantage of this fact and the price of bread in Holland has risen enormously since August. This increase naturally has hit the laboring class more than any other class of society, as manual workers always consume a larger proportion of bread than do more well-to-do people.

In order to allay some of the discontent of the poor brought about by the increased cost of their prime necessity, the government recently requested the municipalities all over the country to ask the bakers in their various districts to indicate whether they were willing to make and sell whole-wheat bread at approximately 2 1/2 American cents a pound instead of nearly 6 cents, the usual store price at this moment. Large numbers of bakers agreed to do so under the impulse of a proposal by the government to supply them with whole uncrushed wheat through the municipalities at a price averaging 9 florins (\$3.50) per 100 kilograms or about 220 American pounds. The price varies considerably in different places, according to the cost of labor and fuel. In Vlaardingcn, for instance, it is only 7 florins (\$2.80) while in Roermond it is 13 florins 50 cents (\$5.40). The condition attached is that the bakers furnish pure whole-wheat bread, to which may be added only yeast, salt and water. From every 100 kilograms of whole-wheat the bakers may make 140 kilograms of bread, which they sell for fl. 16.80 (\$6.72).

The bread is sold at the low price of 2 1/2 American cents a pound to families which apply to the local authorities for bread cards. No restrictions are placed on the amount of money earned by a family which desires a bread card, but only one pound of bread is furnished daily for each person over two years old belonging to the family. The extent of the poverty in the towns may be judged from the fact that many thousands of families have applied for bread cards. In Amsterdam, for example, nearly 50,000 family bread cards have been issued; in Rotterdam 30,000; in The Hague 20,000 and in Leyden 15,000. Before the war the normal price of white bread in Holland was 18 Dutch cents (just over seven American cents) per kilogram or little over two American pounds; now it is 28 Dutch cents, or over 11 American cents.

WEEKLY REVIEW OF STOCK MARKET. New York, June 19.—The week in the stock market was dull and uneventful, trading at all times keeping within moderate bounds and partaking largely of a professional character. War stocks again were the most active features as a group, but their course was variable with a majority of net declines. Only one issue, Baldwin Locomotive, scored a new high record, touching 64 3/8, a gain since last Saturday of 5 1/2 points. Coppers and other metal stocks were strong at the outset, on higher prices in the domestic markets, but later fell back on the heavy pressure for copper in London. The higher prices for certain finished materials in steel and iron were helpful to United States Steel and the shares of less prominent companies. Prominent railroad stocks were irregular with intermittent selling for European interests. Passing of the Chesapeake & Ohio dividend had no marked effect, such action having been foreshadowed weeks ago. Shares of other roads whose affairs are pressing toward financial readjustment were fairly steady. Easy money continues to be the foremost factor in the general situation, rates for all periods, including over the year, falling to lower levels. Demoralization of the foreign exchange markets was, in its potential aspect, the most important development of the week. The money of virtually all European countries must go to higher discounts, thereby establishing higher premium for the American dollar. Further large sums of British gold came from Canada but the inflow offered only partial relief to the delicate international credit situation.

Insurance Against Air Raids a Problem. London, June 5.—(Correspondence of The Associated Press).—The problem of insurance against damage by air craft raids has become a serious one for merchants in London and other commercial towns near the east coast. The insurance companies have been beset with applications for insurance against fires started by Zeppelins, but the companies doing fire insurance business cannot take such risks. Insuring against Zeppelins is a pure gamble since there is nothing in the way of experience or probabilities on which any sound system can be based. Consequently the British government will be obliged to take charge of the matter, as it did of insuring merchant ships in the earlier days of the war.

QUAKERS JOIN IN WAR. London, June 5.—The Quakers notwithstanding their peaceful tradition have contributed 215 men to the British army and navy and 43 to the army medical corps. In addition, 41 have joined the home guards and are serving on recruiting committees. These figures are taken from the annual meeting of the Society of Friends. The society's book of discipline declares its members must maintain an "unequivocal testimony against war." This is a vital principle of Quakerism. Accordingly about 50 of those enlisting sent in their resignations but only thirty of these were accepted. Besides the soldiers, the parents of the soldiers openly sympathize with the war. These may all be properly expelled, but the feeling among the members is against taking severe measures. Opinion on the subject of war was much divided at the annual meeting, but discussion was avoided. No sickness and deaths to report on the board of trade to take measures this week, as it has been too hot for also. It is probable that the government will bring in a scheme this Sentinel.

GOING AFTER ATLANTA'S LOCKER CLUBS. Atlanta, June 19.—The locker clubs of Atlanta are about to be called on again to stand the fire of a police committee inquiry. The council police committee began yesterday afternoon to look into the applications of the various clubs for renewals of licenses, and announces that in passing on each case it will take into consideration the question of whether each is a bona-fide social club or whether its real object is the dispensing of liquor.
