EDUCATION AND HOSPITALS

The council on medical education and hospitals reported that the work un-dertaken in 1905 of formulating and securing uniform standards of medical education in the United States has in a large part been completed and that greater advance had been made in medical education during the past 15 years than in any other field of edubelieves that, in order to preserve the general practitioner and family doctor. the undergraduate medical course must be thoroughly re-organized and attention given to the training of the general practitioner. At the same time a better method of instruction for specialists should be developed in postgraduate courses. Regarding the hospital situation, the

report of the council shows that there are no hospitals in 56 per cent of the counties in the United States; that there are 4.013 private, general and special hospitals for the treatment and care of the sick with a total of 311,159 beds, or one hospital bed to every 340 overns in the United States. SOUGHT IN COUNTY

Plans are nearly matured for completing the drive in Mecklenburg county for obtaining pledges of colton growers to sell their cotton through a pooling system, tried and approved by the California Fruit Growers. The preliminary work has been done in many of the townships and the further drive will be to obtain pledges from growers who are known to be friendly to the movement. Five thousand bales as a minimum must be pledged in Mccklenburg county before the movement will be considered to have been successful in this county.
