KELLEY'S ISLE A FAMED RESORT

Notable for Evidence of Prehistoric Races Which Are Found.

The most extensive, well sculptured and best preserved relics of prehistoric men ever found in America have been found on Kelley's Island in Lake Erie. contends J. B. Pierce, who has raised grapes on the island for many years. Mr. Pierce was recently married and is on a honeymoon to Cuba.

Kelley's Island only contained a few thousand acres of land. It is situated 12 miles from Sandusky, Ohio, being three miles from the mainland. The island is but one of a group of similar islands in Lake Erie. Each island used to be designated by a certain num ber, but during recent years they have all been named

"Now that most unique thing about Kelley's Island is the soil," explained Mr. Pierce. "It is called Devonian The limestone rises limestone soil. close to the surface, and is used for building purposes to a large extent. "Now limestone, archaeologists have found, preserves the remains of hungan existence longer than any other substance. Naturally therefore, had there been any early life on Kelley's Island, the chances are that relics of it are well preserved.

TEEMS WITH RELICS

"And this is exactly the case. The island fairly teems with relics of ancient peoples. The oldest Indian relics in North America have been discovered remarkably preserved. digging by archaeologists is done in the numerous mounds and remains of earth-works of the antiquarian period, all of them containing well-preserved relics. On the north side of of the island are to be seen large rocks which, in prehistoric times, were sculptured by the natives to resemble figures of their gods. Inscriptions of many kings are carved here and there on these rocks. They have been conceded to be without parallel in America as far as antiqueness and good conditions are concerned.

People interested in the study of the early life of man in North America are continually seeking the island for relics which they could find nowhere else."

GRAPE INDUSTRY

In speaking of the grape industry of Kelley's Island, Mr. Pierce declared that the soil is ideal for grap grow-The entire island is devoted to this industry, the Catawba grape be

department hopes to make compt calls for trash after a request nae. has been received. Mr. Huneycutt said. been kept to insure prompt response to these calls.

The 20 wagons and trucks are divided DR. McGEACHY PRESIDES. among the five sanitary districts, one district including the up-town section with the residential parts of the city equally divided into four divisions. Four trucks or wagons are assigned to each division under the superivision of a sanitary inspector. These 20 trucks haul about 600 loads a week.

The demands of Charlotte residents f promtply met would necessitate an increase in the amount of trash and garbage collected in a week. Mr. Huneycutt said. The inability of the depart ment heretofore to meet all demands has resulted in numerous complaints. The commissioner hopes, through the system for checking on the work of each individual, to make possible the collection of more garbage daily.

LIBRARY CHOSEN FOR HEARING CASE

The referee's hearing in the milliondollar suit of the Hardaway Contracting Company against the Western Carolina Power Company, which will begin here next Monday, is to be held in the assembly room of the Carnegie Library, attorneys in the case announced

Eccause the regular session of civil court is scheduled to begin Monday morning at the court house and last two weeks, attorneys in the referee case have been casting about for some time for a suitable place to hold the hearing and agreed Friday morning on the assembly room of the library. E. Swain, of Asheville, to whom the case has been referred, will be engaged on the case perhaps three or four weeks. It is possible, some of the attorneys, think, that the case

may be prolonged to six weeks. The greatest array of attorneys ever
