ANDES OIL IS GREAT FOR SPRAINS OR PAINS

Laid Up With Sprained Wrist for Weeks, Andes Oil Helped With First Application.

When a man has been out of work for five weeks with a sprained wrist which none of the remedies he tried seemed to help any and then one bottle of Andes Oil at one dollar enables him to go to work again, he is quite apt to regard it as a wonderful medicine and tell his acquaintances about it any time they complain of pain. That's what this knitting mill operator in East Chattanooga is doing and we will let him tell it to our readers just as he told it to us. It's worth while listening—

"Andes Oil is great for sprains. I was suffering with one of my pains in the mills at noon hour, some months ago, and sprained my wrist so I couldn't work for five weeks. It began to look as if I never would have much use of it again if I didn't find something to help it. I had tried everything from brown paper soaked in vinegar on up. Finally I got hold of Andes Oil, and say, the first application made it feel a lot better and in a few days—about a dozen rubbings—I was back on the job. I could have bought a good many bottles with the wages I lost by being idle, but it only took one bottle to put me back to earning money."

Andes Oil is the great thing for sprains, or for any kind of rheumatic pains. It will stop carache or toothache in a jiffy. Dysentery has been stopped in an hour or so in numerous cases, cholera morbus is quickly relieved by it. All druggists, 50 cents and one dollar a bottle.

THEATERS

LAST SHOWING OF "THE BEAUTIFUL LIAR."

Admirers of Katherine MacDonald's photoplays again flocked to see her new production, "The Beautiful Liar," which will end today its three-day engagement at the Broadway theater.

The story of this First National attraction relates the outcome of Helen Haynes' lie—and it is capital comedy-drama. She was forced into the lie and before she had extricated herself from the complications which ensued she had cause to regret she had become involved in the conspiracy. Miss MacDonald plays a dual role in this play.

after he reached there. The bullet pierced the brain and the physicians decided that an operation would be hopeless.

Local police authorities have arrested three men whom they believe were in the vicinity of the place on the night of the killing, but they have little against them. The theory is that the people who shot Mr. Hamilton intended robbing him, but that they became frightened and did not carry out their purpose.
