You Furnish the Feet
We do the Rest.

That's all we want you to do—furnish the feet. We will not only do the rest, but we will do it well. You know what the coming man said to his sweetheart as he bade her goodbye. He grasped her hands in his and exclaimed: "Be good to yourself my girl!" Perhaps that advice was unnecessary. Be good to your feet. Perhaps that advice is unnecessary, but we hit the target in the bill's eye when we say that nothing in the world is better for your feet than our fine shoes. They are a shoe that's fit for the foot, fits the foot and, what is just as much to the point, fits the pocketbook.

There was a most enjoyable meeting of the ladies Auxiliary Society on Thursday afternoon, conducted by Dr. Cransy. Those who were absent missed a rare treat for Dr. Cransy in his inimitable style made those present feel that it was indeed a precious privilege to work for the young men of our city. Three new members were added, and we trust before the meeting in April there will be many more. Only those who are engaged in this work can realize how much pleasure is derived from these meetings which are strictly unostentatious.

Mr Springer Still Improving

WASHINGTON, D. C., March 5.—The condition of Congressman Springer still continues favorable although there is but little visible improvement this morning. The patient is still very much prostrated and the greatest care is being exercised to prevent the possibility of a relapse.

Dr. John A. Vincent of Springfield, Illinois, the family physician of the Springers, arrived this morning and was immediately called in consultation with the resident physicians who have been attending the Congressman in this city. At the conclusion of this consultation and after a critical examination of his patient, Dr. Vincent made the following statement to the Associated Press: "The condition of Mr. Springer is much improved, and while I might say he is practically out of danger, yet as a matter of fact, founded upon professional experience, a man is not out of danger in a case of this kind until he passes the stage where a relapse is possible. It will probably be several days before Mr. Springer passes that point, as he must build up his lost strength and vigor. He is now completely prostrated now that every little imprudence or slight mistake would cause a relapse which might prove fatal. The method of treatment of the Washington physicians I want to say, has been in perfect accord with my own views and the case, in my opinion has been well handled throughout. Everything has been done that could be done or that could be safely suggested by the science and there is a perfect agreement and concert of opinion between myself and the attending physicians."

House calendar urgent defer appropriation bill was then on motion of Sayre taken up and passed without amendment or debate. Mr. Hatch of Missouri called up the bill appropriating as a deficiency \$100,000 for carry on the work of the bureau of animal industry and \$100,000 for experiments in the production of sugar.

Train Wreckers Caught.

MEMPHIS, March 5.—Two of the train wreckers who have been operating in the northwestern portion of Mississippi for the last 6 months are safely lodged behind the bars at Greenville, Mississippi. The last of the weeks which was attended with the loss of life, occurred on the Louisville, New Orleans and Texas Rail Road at Helms Station, Mississippi. The engineer had to jump for his life and a negro fireman was killed. The sheriff of Washington county with one of Pinkerton's men worked up the clues. They pointed to Bob Moore and Sam Smith colored, as the wreckers. Smith was first secured. Yesterday the sheriff and the detective met Moore in the road and arrested him.

"I am Bob Moore," said the wrefar or, I want you said the detective. Well, you can't prove it said Moore, defiantly. Prove what? I don't know what train said Moore falling into the trap. The evidence against both prisoners is conclusive.

LIVERPOOL, March 5.—A fire broke out in the block of six-story cotton warehouses on Birchall street in this city, adjoining the wharves where the cotton brought to Liverpool from the United States is landed, and despite the efforts of the fire brigade, the flames spread with great rapidity, and it was impossible for the firemen to cope with them. The warehouses were completely gutted, and it is impossible as yet to state what the loss will amount to, but it will be very heavy.

Maxwell was rescued by the police of the explosion, and the sudden illumination of the night in the hall to find the stairs and hall way untenable. The fire was finally subdued by the use of blankets, quilts and sheets, two pairs of blankets, two quilts and a counterpane having been hurled by the firemen on the fire. In the excitement of the time Esquire Maxwell stepped on the burning oil and the sole of one foot is done for. The stairway was charred and the carpet was burned. The lamp was a new one and was perfectly clean. The cause is assigned to the poor quality of oil with which this market has been flooded. The oil now supplied here is positively dangerous.
