#### Just Look at That shoe.

There was a time when first class shors cost first class prices; You can pay a hand-ome price for a hand some shoe nowadays, but the neces ity for doing it no longer exists; Ne our \$3 shoe as an illustration : You don't need to be very old to remember the days when such a shoe would have cost you certainly to less than double the money and probably even a trifle mere than that, The endency all along has been to bring up the quality and down the price—such a store for such a figure was never offered before.
