# Market Reports

New York, July 10.-C. W. Lee & Co. says: Two points have been very So Re clearly developed as a result of this Fex weeks trading in cotton. The first Unio one is that the New Orleans faction Waba has a complete and absolute control of the existing supply of cotton in this country. They own the cotton, appear Natio to have money enough to pay for all Peop that can be delivered them and are Suga bent upon getting as much money from US the sale of this cotton as can be ob- USS tained. The second point and the one U S Steel P'f'd ..... 7.34 that is of more interest and importance to the cotton industry is the fact that so extensive has become the damage by boll weevil in the Southwest that the season's production promises to be materially deminished. At one time during the week it looked very much as though there had been a leak of some kind in the pool and that the whole thing might collapse. But later on prices recovered sharply about 11-2 cent a pound in those options controlled by the New Orleans pool and a suspicion developed that the selling movement was undertaken as a blind in order to create a short interest and assist profits. Since the stock of cotton in New York and New Orleans is controlled by two or three individuals they must be recokned with in any attempt to forecast price fluctuations from now on until sufficient new cotton is received to relieve the tension. It may be of course that in the end they will make the mistake of overstaying the market and the whole corner end in a flasco but this doesn't alter the fact that consumers in the meantime will be compelled to pay whatever price they may seek to exact. Of course this condition is an uneveniable one and very few of those interested in the best welfare of cotton look with sympathy upon the effort of a few individuals to reap personal advantage from the exceedingly unfortunate position in which cotton consummers are placed. Never in the entire history of cotton speculation has the supply been controlled by one man and never before have prices in one week dropped a cent and a half and recovered a cent and a half a pound.

NEW YORK STOCKS.

New York, July 10.-Dow, Jones & Co. say: American stocks in London heavy 1/8 to 3/8 below parity. Government crop report at 4.30 today. Building trades go back to work on Monday. Walking delegates practically defeated. Remaining 10 per cent of International Merchantile Marine underwriting representing five million dollars called up. Seventy-five roads for year. May show average net increase 17.94 per cent. Forty-five roads for fourth week June show average gross increase 24.22 per cent. Lower prices reported for pig iron, and steel billets. New York Central says report of a terminal company guaranteed by itself is premature. 2,300,000 dollars gold ordered for Saturday. Banks lost to Sub-Treasury since Friday, \$2 488,000. Louisville report shows surplus after charges 6,-126,459 equal to 12.1 per cent on stock. Gold exports since May second total \$28,561,000. Large demand for bridge and structural steel in middle went to replace flood damage. Twelve industrials declined .98. Twenty active railroads declined 1.37 per cent.

New York, July 10.-Town Topics says: We expect to see the stock market unsettled today. Sudden and unexpected development of a number of bearish factors come into prominence in connection with the bearish tone of the Press to oppose improvement. It looks very much as though a bear campaign had been begun in New York Central and we believe those who sel lit short for a turn on strong spots will find such operation profitable. The same arguments that beared Pennsylvania from 154 are still applicable to New York Central. The entire situation is temporarily changed by the renewal of liquidation and more unfavorable aspect of the money market. We do not believe that a bear campaign will be more than temporary, however, and do not expect to see serious declines.

There is a report that St. Louis may be attacked. The fact that the Government crop report will be published after the close of market today will help to unsettle matters and the prospect of a poor bank statement will not influence professional buying, so that the outlook, therefore is not good for the remainder of the week. In the event of drives at B. and O., Missouri Pacific, Erie Second, Southern Pacific, or Wabash Preferred, we recommend their purchase for turns.
