

The Invention That Has Startled the Whole World

Burlingame Telegraphing Typewriter

The following Letters, the originals of which may be seen at our office, indicate the confidence that men whose opinions are entitled to the highest respect have in the B. T. T. after witnessing a demonstration of its wonderful performance.

TELEGRAPH CO. TEST.

HOME TELEGRAPH & TELEPHONE CO.

Los Angeles, Cal., Sept. 21, 1908.

BURLINGAME UNDERWRITERS,
Santa Barbara, Cal.

Dear Sirs:—

As per your request I called at the office of the Burlingame Telegraphing System of Telegraphy in the The Pacific Electric Bld., in this city to look over an exhibit of their system.

I found that in their system they can use a single wire for one side and a ground for the other side of the circuit in sending messages. I disconnected this apparatus and connected it up again myself, using a ground for one side of the circuit and a single iron wire for the other and operated the apparatus through 24 ohms resistance which is equal to 4 Cor. 5 miles of wire number 10 B & S gauge. I also found two or three little imperfections which in my mind can be very readily remedied for there is no doubt in my mind that with a few minor changes the system will be perfect. Trusting this information is what you desire, I am

Very respectfully yours,

Wire Chief C. J. WENDELL,
Home Tel. & Tel. Co.

CALIFORNIA SAVINGS BANK,

Los Angeles, Cal.

N. P. Snyder, Pres.

Arthur Letts, vice Pres.

THE BURLINGAME UNDERWRITERS,
Chronicle Bld., San Francisco, Cal.

Dear Sirs:—

After most carefully investigating the long distance relay one wire Burlingame Telegraphing Typewriter now on exhibition here I am fully convinced that Mr. Elmer Burlingame has finally succeeded in bringing out a commercial machine that will in my opinion, ultimately displace all other methods of telegraphic communications. My opinions seem to be confirmed by all the electrical experts who have witnessed a demonstration. I need not call your attention to the fact that the uses to which the Burlingame Telegraphing Typewriter can be put would enable the company to place thousands of machines which would mean an immense income to the parent company. I have a large holding in this company and am convinced that my judgment is good in this investment.

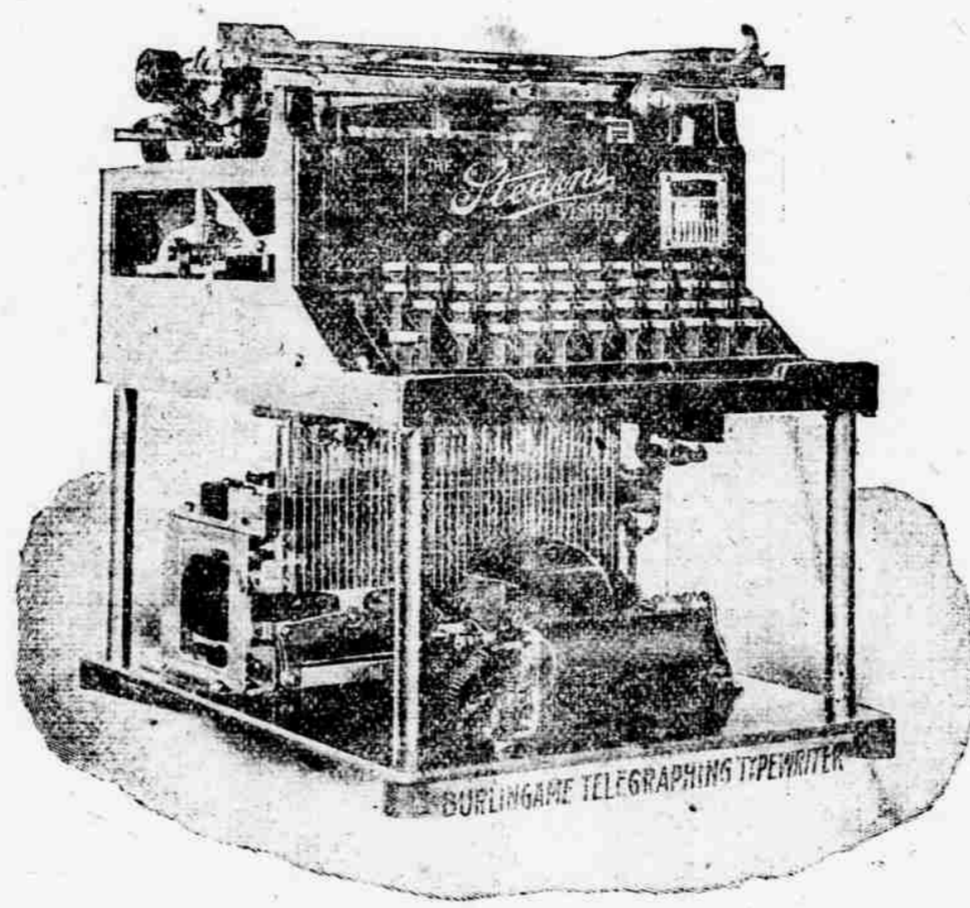

I am also convinced that the gentlemen associated are all sincere and capable men of affairs who will make The Burlingame Company a financial success ultimately paying immense dividends to its investors.

Assuring you of my loyal support at all times, I beg to remain
Yours very truly,

N. P. SNYDER, Pres.

F. H. Nichols, Cashier.

Allen Durand, Ass't Cashier.

BURLINGAME TELEGRAPHING TYPEWRITER

GOVERNMENT TEST

San Francisco, Cal., Oct. 31, 1908.

BURLINGAME UNDERWRITERS:

Private Demonstration to a Board Appointed to Settle the Matter of Fire Control for Coast Artillery.

Referring to the above we beg to advise that for some months negotiations have been pending between the Government and The Burlingame Telegraphing Typewriter Co. for a private demonstration before a board appointed to settle the matter of fire control for coast artillery. Mr. Burlingame after consulting the many experts of the above board to give a test and in accordance with their ideas built some special models of the Burlingame Telegraphing Typewriter for that purpose.

Today three Burlingame Telegraphing Typewriters were operated at the Presidio under the conditions that the machines would be used in actual practice. These machines were tested over an actual installed Government Cable. Messages were sent on one machine and received on two. This demonstration was made before Government officials and experts and the machines worked satisfactorily, printing every letter on the keyboard and every numeral.

In addition to the seven miles of Government Cable used in this demonstration the machines had a resistance of 400 ohms in a circuit equal to about 80 miles of average line wire.

The demonstration proving successful the members of the board and their experts signed a statement that they were witnesses to the Burlingame Telegraphing Typewriter operating over a Government Cable. These signed statements are on file in the office of The Burlingame Underwriters, San Francisco.

The members of the board have requested the Burlingame Typewriter company to proceed at once to Washington, D. C., to make a final demonstration. The fact that the Burlingame Telegraphing Typewriter has successfully operated over a government cable installed for actual usages is a very strong point and it is believed that the final demonstration at Fort Monroe will lead to the actual closing of the contract for the use of The Burlingame Telegraphing Typewriter in connection with every gun used for coast artillery wherever the United States has fortifications.

As stated herein the government officials and experts signed a document as to the operation of the Burlingame Telegraphing Typewriter over a Government Cable. The following persons were present at the signing of this document: Elmer Burlingame, G. T. Swenson, B. Boreham, W. J. Kieferdorf, J. D. Mouser, J. H. Kugler.

Respectfully submitted by

BURLINGAME UNDERWRITERS.

The Following Government Officials, Electrical Experts and others have been eye witnesses to a demonstration of The Burlingame Telegraphing Typewriter Co. and have signed a statement, original of which is on file in the office of The Burlingame Underwriters, 606 Chronicle Bldg., San Francisco, Cal.; A. E. Roome, Supt. Tel. P. E. Ry. Co.; W. M. Chubb, Electrical Engineer, Signal Corps; C. C. Lour, Pac. Telegraph & Telephone Co.; R. H. Manahan, City Electrician, Los Angeles; Lieut. W. J. Gilbert, U. S. Revenue Cutter Service; H. W. Conklin, Signal Corps, U.S.A.; Home Telegraph & Telephone Co.; J. G. Griffin, Chief Electrician, U. S. Navy; O. P. M. Hazzard, Chief Quartermaster, U. S. A. Cal.; G. B. Dittman, City Electrician, Los Angeles; O. Hollander, Govt. Wireless Telegraph Service, S. F.; A. L. Fenn, Capt. Coast Artillery Corps, Chief Signal Officer, U. S. A.

No court in the land would discount the testimony of witnesses like these. Can you afford to shut your eyes and close your mind against what they say?

When the recognized Leading Newspapers of America, such as the New York Sun, New Orleans Picayune, Salt Lake Tribune, Kansas City Post, Los Angeles Times and others including all publications of Charlotte, when the scientific press such as the Electrical World, when a business magazine like Office Appliances, when such publications as these speak so enthusiastically about The Burlingame Telegraphing Typewriter you may know that this invention is a factor with which the whole world must reckon.

The Field for The Burlingame Telegraphing Typewriter is Beyond the Conception of Man.

Had you invested \$1,000 in Western Union Telegraph Co. at its original incorporation your investment would have netted you \$150,000 to date.

The Western Union uses the Morse System of Telegraphy.

The Burlingame is as far ahead of the Morse System as the railroad is the stage coach.

An electrical invention that enables the world to do business quicker and better is bound to succeed because the public demands the invention and is willing to pay for it.

ADVANTAGES

The Burlingame System eliminates experienced operators, transmits five times faster, uses only one impulse for every letter and character against as many as six impulses in Morse Code, and is the only system in the world that can not be intercepted. The Burlingame System shows a saving of at least 75 per cent in operating expenses to every company using their machines.

Each \$10 invested in Linotype stock purchased shares that are worth today \$200. * An increase of 2,000 per cent. The Burlingame Telegraphing Typewriter will do for the message business what the Linotype did for the newspapers.

Write for government reports, etc., which will be mailed on request.

Stock in The Burlingame Telegraphing Typewriter is now being offered at \$6 per share (par value \$10) fully paid and non-assessable. Like all other great inventions The Burlingame Telegraphing Typewriter Co. must be financed. The opportunity is now offered to secure shares at \$6 per share payable in cash or in 5 monthly payments.

Books and descriptive matter forwarded on request.
