TAFT URGES POSTAGE INCREASE ON MAGAZINES

By Associated Press.

Washington, D. C., Feb. 22.—President Taft today approved and forwarded to congress the report of the commission on second-class mail matter and recommended that the postal rate on magazines be raised from 1 cent to 2 cents a pound.

Postmaster-General Hitchcock originally recommended a 4-cent rate, but later changed this to 2. The commission finds that the cost of handling second-class matter is about 5 1/2 cents a pound. In approving the 2-cent rate, however, President Taft declares that the business enterprises of the publishers of periodicals had been built up on the basis of the 1-cent rate and therefore it would be manifestly unfair to put into immediate effect a larger increase in postage.

As to the effect of the proposed increase from 1 to 2 cents a pound President Taft quotes from the report of the postal commission, the following paragraph: "Such an increase will not, in the opinion of the commission, bring distress upon the publishers of newspapers and periodicals, or seriously interfere with the dissemination of useful news or information. A reasonable time should be allowed after the rate is fixed, before it is put into effect.

While the news rate will be very far from compensating the government for the carriage and handling of second-class matter, it will to some extent relieve the existing burden and result in more equitable adjustment of rates."

That newspapers and magazines have been potent agencies for the dissemination of public intelligence and consequently have borne a worthy part in the development of the country, Mr. Taft, says, all must admit. "But," he adds, "it is likewise true that the original purpose of congress in providing for them a subvention by way of nominal postal charges in consideration of their value as mediums of public information ought not to be abandoned, because they are now not only educational but highly profitable. There is no warrant for the great disparity between existing postage rates on periodicals and the cost of service the government performs for them. The aggregate postal revenues for the fiscal year 1911 were \$37,879,823.60, derived mainly from the postage collected on the four classes of mail matter. It is carefully estimated by the postoffice department that the revenue derived from mail matter of the first class is approximately one and one-half times the cost of handling and carriage; that the returns from third and fourth-class matter are slightly in excess of their cost of handling and carriage; and that while second-class matter embraces over 65 per cent of the entire weight of all mail carried, it nevertheless yields little more than 5 per cent of the postal revenues.

Another suggestion of the commission, which was given the president's approval would abolish the "cent-a-copy rate" for newspapers other than weeklies when mailed at a city letter carrier office for local delivery.

INTERIOR DEPT. LOSES TIME-HONORED PRIVILEGE.

By Associated Press.

Washington, Feb. 22.—The interior department has lost its time-honored exclusive privilege of granting rights of way on public lands through a decision by Assistant Attorney General Knebel. Mr. Knebel decided that congress has invested the secretary of agriculture with authority to issue rights of way on national forests for electrical power or telephone and telegraph purposes. There was a disagreement between the interior and agricultural departments regarding the interpretation of the act of congress providing for granting rights of way on public lands and reservations for fifty year periods.
