From Forty-Five to Fifty Are Much Benefited

Lydia E. Pinkham's Vegetable Compound.

The "change of life" is a most critical period in a woman's existence, and the anxiety felt by women as it draws near is not without reason.

When her system is in a deranged condition, she may be predisposed to apoplexy, or congestion of some organ. At this time, also, cancers and tumors are more liable to form and begin their destructive work.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes. irregularities, constipation, variable appetite, weakness and inquietude, and dizziness, are promptly heeded by intelligent women who are approaching the period in life when woman's great change may be expected.

These symptoms are calls from nature for help. The nerves are crying out for assistance and the cry should be heeded in time.

Lydia E. Pinkham's Vegetable Compound is prepared to meet the needs of women's system at this trying period of her life. It invigorates and strengthens the female organism and builds up the weakened nervous system. It has carried many women safely through this crisis.

ONE CASE OUT OF MANY TO PROVE OUR CLAIMS.

St. Anne, Ill.—"I was passing through the change of life and I was a perfect wreck from female troubles. I had a displacement and bearing down pains, weak fainting spells, dizziness, then numb and cold feelings. Some-times my feet and limbs were swollen. I was irregular and had so much backache and headache. was nervous, irritable and was despondent. Sometimes my appetite was good but more often it was not. My kidneys troubled me at times and I could walk only a short distance.

"I saw your advertisement in a paper and took Lydia E. Pinkham's Vegetable Compound, and I was helped from the first. At the end of two months the swelling had gone down, I was relieved of pain, and could walk with ease. I continued with the medicine and now I do almost all my housework. I know your medicine has saved me from the grave and I am willing for you to publish anything I write to you, for the good of others."—Mrs. ESTELLA GILLISPIE, R.F.D. Use of Capital.

By patronizing a near market it is possible to turn over the capital invested in a business more often, and thereby make a much greater aggregate profit than would be the case were it necessary to send a thousand miles for goods. It is not necessary to stock up so heavily on lines which may go slowly, when the market is near at home, because, should a merchant run low on any one line, he can telephone Charlotte and within 24 hours, at the outside, he can have a supply delivered to him, and that without having an enormous sum of money tied up for months.

A man with a small capital can purchase his goods at home, discount his bills, add this one or two per cent to his profit, or cut from his selling price, still make the same profit his competitor, who buys in the North, makes, and gather in much of the gilt-edge trade which has heretofore been di-
