U. S. TRADE WITH NON-CONTIGUOUS TERRITORIES

Washington, June 20.—According to the official figures of the Bureau of Foreign and Domestic Commerce, Department of Commerce, the total value of the shipments from the United States to all its noncontiguous territories (including in this term Alaska, Hawaii, Porto Rico, the Philippine Islands, Guam, and Tutuila) is, for the ten months ended with April, 1913, \$90,186,093, against \$85,970,947 in the corresponding months of last year; while the value of the shipments to the United States from the noncontiguous territories in the ten months ended with April, 1913, amounted to \$104,215,899, against \$112,062,150 in the same months of last year. From these figures it is estimated that shipments from the United States to its noncontiguous territories will show a larger total in 1913 than ever before, aggregating approximately 110 million dollars, against 106 million in 1912, 83 million in 1910, and 36 3-4 million in 1903; also that shipments from the noncontiguous territories to the United States will show a slightly lower total in 1913 than in 1912, the high-record year, or approximately 135 million dollars, against 143 million in 1912, 108 million in 1910, and 59 million in 1903. Thus the shipments from the noncontiguous territories to the United States have a little more than doubled in the last 10 years, while shipments from the United States to the territories in question trebled in the same period.

The fall in 1913 of about 8 million dollars in the value of merchandise shipped from the noncontiguous territories to the United States is due in part to a reduction in the quantity of sugar shipped from Porto Rico, Hawaii, and the Philippine Islands, and also to a reduction in the price of the sugar thus shipped. The quantity of sugar shipped from the Philippine Islands to the United States in the 10 months ended with April, 1913, was but 159 million pounds, valued at 4 1-4 million dollars, against 347 million pounds, valued at \$ 3-4 million dollars, in the same months of last year, the average price having been in 1912, 2.52 cents per pound, and in 1913, 2.25 cents per pound. From the Hawaiian Islands the shipments in the 10 months ended with April, 1913, amounted to \$17 million pounds, valued at 28 million dollars, against 900 million pounds, valued at 38 million dollars, in the same months of last year, the average price per pound on the unrefined having been in 1912, 4.22 cents, and in 1913, 3.41 cents. From Porto Rico the shipments amounted to 484 million pounds, valued at 17 1-3 million dollars, against 488 million pounds, valued at 21 1-2 million dollars, in the same months of last year, the average price having been in the 10 months of 1912, 4.40 cents, and in 1913, 3.58 cents per pound.

While this reduction in the quantity and price per pound of sugar sent from the islands has resulted in a decrease of the total value of their shipments to the United States, they have meantime slightly increased their purchases of our productions. The shipments of merchandise from the United States to the Philippine Islands in the 10 months ended with April, 1913, show a gain of about 1 1-2 million dollars over the corresponding months of last year, and those to Hawaii a gain of 5 million, while those to Porto Rico show a decrease of about 4 million, showing a decrease of 4 million, making total shipments to the three islands in the 10 months ended with April, 1913, \$74,124,000 against \$71,685,000 in the same months of last year. To Alaska the shipments in the 10 months ended with April, 1913, were practically 16 million dollars, against 14 1-4 million in the same months of last year, and the shipments from Alaska to the United States were practically 23 million dollars, against 20 1-3 million in the same months of last year.

The Perfect Baby Of The Future

A Simple Method That Has a Wonderful Influence Upon The Future Infant.

Too much cannot be said for a wonderful remedy, familiar to many women as Mother's Friend.

It is more eloquent in its action than all the health rules ever laid down for the guidance of expectant mothers. It is an external application that spreads its influence upon all the cords, muscles, ligaments and tendons that nature calls into play; they expand without pain, without strain.

Mother's Friend must, therefore, be considered as a direct influence upon the character and disposition of the future generation. It is a conceded fact that, with nausea, pain, nervousness and dread banished, there is stored up such an abundance of healthy energy as to bring into being the highest ideals of those who fondly theorize on the rules that insure the coming of the perfect baby.

Mother's Friend can be had of any druggist at \$1.00 a bottle. It is prepared by Bradford Regulator Co., 229 Lamar Bldg., Atlanta, Ga. Write them for an instructive book to expectant mothers.

LADIES

Have You Been to the Shoe Sale in Our "Basement." Tan Oxfords and Pumps, \$1.50 and Black, \$1.95.

A CONTROVERSY.

Autoist and Bicyclist Engage in Debate as to Right of Way. (Newbern Journal.)

Sunday afternoon a gentleman who owns an automobile and another who rides a bicycle created quite a bit of excitement on Hancock street when they became engaged in an argument as to which one was on the proper side of the street.

It happened in this way: The automobilist was coming down town from the depot and owing to the fact that a passing train had blocked the crossing at Queen and Hancock streets, he had taken the left hand side of the street. At a corner farther down the bicycle rider turned into Hancock street from one of the intersections and he also kept to the right. When within a few feet of each other the bicycle rider and the automobilist came to a stop.

Following this the argument started. The bicycle rider contended that the automobilist was on the wrong side of the street while the latter contended that there was room enough for the bicyclist to get by his machine. The result of the interchanges was that both decided to hold their ground until the other gave in and it is possible that they would have been there yet had not Policeman Rowe appeared on the scene and ordered them to move on.

Upgarson—Do you notice any particular effect since you quit smoking? Atom—Yes, the man who used to sell me my cigars passes me on the street now without speaking.—Chicago Tribune.

ENVOIUS!

Palmetto Claimers Disputing Honors With the Youngest of Tar Heel Counties. (Rock Hill Herald.)

Avery county, North Carolina, comes forward to claim the original of Mutt and Jeff, which is characteristic of North Carolinians, as they are the champion claimers. As a matter of fact it is believed, on good authority, that one of the gentlemen of the famous pair, that Rock Hill has the original Mutt and Jeff team. These gentlemen are much handsomer than the pictures made by Bud Fisher, but Bud is responsible for the pictures and the Honorables John Porter Hollis and W. J. Roddey are not Mr. Roddey is the man who suggests Mutt and Jeff in this connection, and the public has accepted it merely as additional evidence of his discriminating judgment and keen sense of humor.

SENSATIONALISM.

Georgia Capital Comes to the Front With a Real Thriller. (Charleston Post.)

Atlanta is always sending out sensational stories. The most recent is about a man who fell down an elevator shaft for a drop of sixty feet or so and was killed.

Panama Exposition Seal.

The Panama-Pacific seal—the seal of the San Francisco Exposition of 1915, was designed by Alfred Lenz. Columbia stands upon a globe above the severed isthmus with an olive branch in one hand and a shovel in the other. Encircling the seal, reaching from the globe, on which Columbia stands, are the words: "San Francisco-Panama Pacific International Exposition, 1915."

SCHOLAR IN POLITICS.

Spartanburg Not Unlikely to Invade Wofford Faculty For New Chief Executive. (Spartanburg Journal.)

Dr. D. D. Wallace, professor of history and economics in Wofford College, is one of the most likely men to be called upon by a mass meeting of the citizens to select a man to offer for himself for the office of mayor at the approaching election. Said one of the men interested in this meeting "Dr. Wallace is peculiarly fitted for the office," said this gentleman, "in that he is a student of politics and one who is not entangled in affiliations with concerns which are a prey upon a city government." "Dr. Wallace," he continued, "is a man who has strong convictions in the moral uplift of the city and one who has the backbone to stand for that which is right regardless of who it hurts."

"Dr. Wallace," continued the speaker, "showed the grit in his gizzard, when he took the stump on his own initiative and worked in the interest of the law and order candidate for governor in the campaign of 1912. Not only in this instance, but Dr. Wallace has identified himself in the fight for a better city. Dr. Wallace appears to the man who is strong for the enforcement of the laws, and those who are promoting his candidacy are doing so with the belief that with Dr. Wallace at the helm will grow in everything that tends to promote."

Another Wofford professor, C. H. Waller, of chemistry and biology, is also mentioned as a commissioner possibility.

Bibbs—It is very evident that your wife has a mind of her own. Bibbs—You think so. Well, so do I, but she keeps telling me that her mind is made up.—Boston Transcript.

First Baby—They are judging us by points.

Second Baby—Do they take us for a joke?—New York Sun.

Relay Mfg Co.

231 and 233 S. Tryon St.

When you buy a Brass Bed nowadays, you must depend upon the firm you purchase from. There are so many laquers, so many different finishes, so many styles that you hardly know when you are right or when you have what you want.

So we want you to come to our store and let us tell you just what you are getting. You can't go wrong. We don't sell inferior goods and we stand back of everything we sell.

Brass Beds—guaranteed not to tarnish—\$21.00 to \$65.00. Remember—guaranteed not to tarnish.
