AVIATOR ROBBINS TO MAKE MATRIMONIAL FLIGHT

Mr. Edward A. Robbins, the well known local aviator, is here today for the last time before making the flight of his life—the matrimonial flight. He leaves tonight for Rockingham, where on Friday evening he is to be married to Miss Louise Hawley, of that city.

MR. AND MRS. BADHAM ENTERTAIN IN BIRMINGHAM

Of interest here, where Mr. Badham lived when a boy and young man is the following from Saturday's Ase-Herald of Birmingham:

"Mr. and Mrs. Henry Badham were hosts last night for Miss Helen Rosa Randolph and Mr. Murphree, entertaining the members of their original party after the rehearsal for the wedding with a delightful buffet supper at their home on Whitaker street.

"The universal charm of Mr. and Mrs. Badham's parties made this hospitality for Mrs. Badham's namesake—Miss Randolph—even more charming than this pleasing form of entertainment usually is.

"The universal charm of Mr. and Mrs. Badham's parties made this hospitality for Mrs. Badham's namesake—Miss Randolph—even more charming than this pleasing form of entertainment usually is.

PURCELL'S—Women's Garments of Quality—PURCELL'S

Women's Suits That Will Interest You Never Such Thoroughly Good

Quality and Style in Suits at

\$15.00

Worth \$22.50 and \$25.00.

If you are a medium size woman, size 16, 36, 38, few 40 and need a Spring Suit, this collection offered at \$15.00 should interest you especially.

These Suits are down to this low price solely because we BOUGHT THEM AT NEARLY HALF PRICE, from a manufacturer who only had this small lot left of Summer Suits, and his season being over. Every one a brand new model.

NEW COLORS, SILK POPLIN, SILK CREPE CHECKS and Novelty Wool Cloths. They are extraordinary values, and extraordinary styles. All go at the low price of

\$15.00

worth \$22.50 and \$25.00.

PURCELL'S

"WOODMAN SPARE THAT TREE," IS THE REQUEST

A red oak tree on the north side of West Tenth street between Pine and Graham streets, was the subject of a long discussion today by a quorum of the board of aldermen and the putting of many motions before that body.

A motion by Alderman Mason, however, finally carried providing that the original plans for grading and cementing the sidewalk in the block mentioned be carried out, which motion will have the effect of cutting the roots of the tree and maybe killing it, though that part of the case remains to be seen.

The board met at the request of Mr. C. S. Pritchett, the well-known painter, before whose house and lot stands the tree in question. Some weeks ago when Contractor McClelland went to work grading the street and sidewalk in front of Mr. Pritchett's place and were about to lay the axe to the root of the red oak tree in question, Mr. Pritchett forbade him to touch the tree. Mr. McClelland reported to City Engineer Lea that Mr. Pritchett had threatened to shoot him if he did so. Thereupon the work was held up until the matter was brought to the attention of the executive board.

That board at a called meeting Saturday instructed the city engineer to have work proceed according to the original plan and to sue out a peace warrant against Mr. Pritchett if he persisted in interfering with the work. This morning the board of aldermen was appealed to by Mr. Pritchett, and his son, Mr. William Pritchett, to save the tree if possible. The vote of the board on the final motion to carry out the work on the grade already planned, regardless of its possible injury to the tree, was 7 for the motion and 3 against it. It was offered by Alderman Mason.

The argument offered by the Messrs. Pritchett, who were represented before the board by Judge F. I. Osborne, was that they, with other property owners had some years ago given 8 feet of land there for the widening of the street. Mr. Pritchett's gift being with the understanding that the tree in question was to be left uninjured. That agreement, they said, had never been put in writing, but they took the word of the city authorities that the tree would not be molested and they asked as a matter of justice and uprightness that the city keep its word.

After the board had heard the contention of the Messrs. Pritchett by Mr. William Pritchett and Judge Osborne, a motion was made by Alderman Barnes that the original grade of the sidewalk be maintained in putting down cement pavement round the root of the tree, but that a space be left at root of the tree in order to insure against its being injured. Alderman Wilkes that the matter might be compromised by raising the grade somewhat and thus not cutting into the trunk of the tree enough to injure it, although he believed that the tree would die any way in a few years.

Alderman Mason Opposed. Alderman Mason was strenuously opposed to making any change or doing anything other than carrying out the idea of grading the street and sidewalk to conform to the other areas of improvement in the neighborhood and said the board was called upon to adopt a definite policy of city building and beautifying regardless of how it might affect one individual. He declared that every member of the board who voted to save the Tryon street trees on the west side of Tryon street between Seventh and Eighth were now ashamed that they had done so and said the property owners along there were dissatisfied with it also. The board, he said, ought to take a lesson from that experience to hereafter refuse to leave a sidewalk or street out of conformity with other parts of streets and sidewalk to please an individual.

After half a dozen motions and substitutes had been proposed and argued

Mr. Mason made the motion which provided that the sidewalk should be laid on the original grade. It remains to be seen whether the cutting of the trunk of the tree to the extent necessary to establish the grade will kill it.

MEXICO AND ITS PEOPLE SUBJECT INTERESTING TALK

Rev. James G. Dale, of Rio Verdi, Mexico, spoke most entertainingly yesterday at the Y. M. C. A. on "The Mexican Revolution." Mr. Dale has been for 15 years a missionary of the A. R. P. church in Mexico, and was well qualified to speak on the causes of the revolution. The auditorium was not large enough to hold the crowd and extra seats had to be placed in every available place.

Rev. Mr. Dale, in a brief way, told of how the present condition in Mexico started. When Diaz resigned and left Mexico, Madero took his place. He, (Madero) at once summoned Huerta, who had started another revolt, and offered him \$50,000 if he would go home and behave. Huerta took the money, but when he got home he used it to enlarge his army. The rebellion was carried on more actively. Within three months Madero was assassinated. Huerta, once in power, found his hands full in putting down a rebellion, incited by the friends of Madero. Among the leaders of this rebellion, Carranza, Madero's warmest friend, was recognized as the chief.

The result of these rebellions on the Mexican people has been most demoralizing. Agriculture has been practically abandoned because the peons can earn more money as a soldier. Most of the oil fields have been demoralized. There is a spirit of unrest in Mexico, which keeps the natives from following peaceful occupations.

There are several causes to which rebellion may be attributed. The land condition in Mexico is one of these. The poor people say that the land should be evenly divided. That may be the cause, for 70,000 men own all the land in Mexico that can be cultivated.

Another cause, which is given, is that the rebellion was brought on by the mosted men of England and the United States. The English have used Huerta as the means to protect their interests in Mexico, while the Americans are backing Carranza for the same purpose.

I have been watching the conditions closely in Mexico, however, and have a growing conviction that the real cause of this trouble is due to the Roman Catholic influence. The majority of the Mexican people are not in a condition to govern themselves. This is due, in a large measure, to the influence of the Roman Catholics in Mexico. They keep the Bible out of the hands of these people. And as the teachings of Christianity are withheld from a race, they will continue to stand still in their civilization.

VIRGINIA IS READY TO RESPOND

By Associated Press. Richmond, Va., April 27.—Should the punitive expedition now in Mexico followed by war, Virginia will be ready to respond promptly.

Adjutant General Sale has instructed officers of the Virginia militia brigade, field artillery battalion, signal company and other auxiliaries to recruit their commands to war strength.

Full field equipment is being assembled at the state fair grounds here, the prescribed mobilization camp.

THE NEW STYLE BANK IS ONE OF BUSINESS

The promised scheme of the new style bank proposed for Charlotte on the plan of the Genossenschaften or the Raffeissen and Schulze-Delitzsch system, operated in Germany for a hundred years, is one of business.

The men who are organizing it will be paid fairly for their services and those who take stock in it will have reasonable assurance of a fair limited profit. Many self-respecting, independent people have instinctive dislike of accepting anything that may seem like alms or of being objects of benevolence or charity, so the proposed new bank will say to the borrower: "We are not conferring charity on you. You will owe us not even thanks when you have paid your notes. You will pay us for the use of our money and we will let you have money on terms that will enable you to be a free man, independent and able to look the world in the face."

Editorially, Alfred B. Williams, of the Roanoke Times, says in regard to the proposed new style bank:

"More and more we are coming to realize that wealth and power, business or social power, mean serious responsibilities and duties. We are understanding more and more clearly that the most important and greatest business of the strong in this life is to help the weak; that the heaviest and most pressing duty of the rich can owe is to the poor and needy and those who have no helper."

"Nothing is nobler or more urgent than to aid the self-respecting, ambitious struggling poor, young and old, and to do it without impairing their self respect or afflicting them with the feeling of obligation or dependence. No better help can be given than discharge from debt, against which the strength of the strongest man is vain. We do earnestly hope that the present movement for deliverance will not fail as some others have heretofore. Our interests as a community and as individuals require that we have a prospering and thrifty people; that men shall not be driven to misery, shame, drink, despair and flight by having piled upon them in their time of need burdens they never can escape; that the sweat and lives of our toilers shall go into the building of the homes and the establishment of families rather than into the pockets of remorseless and cruel usurers."

"There are real conditions. The paths of dumb hopelessness and of labor and labor and ever increasing loads to carry and ever lessening shares from the pay envelope, is all about us. It is for those who can help to give help and do full parts to relieve the distress most heart-crushing of all to proud and honest people. The statistics of institutions like that it is intended to organize here show that 98 per cent of the people are honest when they are given hope and a chance. To help deliver them from debt and to be honest is a good subject to consider on a Sunday."

The loaning system of the new style bank carries with it entirely new features in contrast to other banks in this section of the country and in a liberal sense has been designated strictly as a poor man's bank. Its system is a scheme primarily launched as a medium for mutual profit and accommodation between the ownership of such banks and the small borrower. Money is loaned to the small wage earner at the legal rate of interest and making such loans easy of payment on an installment basis, by the week or month, on loans extending over a period of as long as a year. For instance, a salaried man of a small income, say, negotiates for a loan of \$100. This sum is discounted \$8, the borrower receiving \$94, which he pays back at the rate of \$2 per week, covering a period of 50 weeks.

This plan, as stated, is the same as the Genossenschaften or the Raffeissen and Schulze-Delitzsch System, operated in Germany for the past hundred years. The Genossenschaften or the Raffeissen and Schulze-Delitzsch System in 1810 loaned the tremendous sum of one billion dollars to the poor wage earners of Germany, while in the same year the Peoples' Bank in Italy, through the same system, turned over to the use of the wage earners, the salaried people and the small shop keepers the colossal sum of three billion dollars. Statisticians have figured out internally, the body warmth releases vapors directly to the lungs and air passages where internal medicines cannot go. They loosen the phlegm, open the air passages and stimulate the mucous membrane to throw off the disease germs. For catarrh and head colds melt a little in a spoon and inhale the vapors, also apply well up the nostrils. For asthma and hay fever follow the instructions given above and also rub Vick's well over

For catarrh and head colds melt a little in a spoon and inhale the vapors, also apply well up the nostrils. For asthma and hay fever follow the instructions given above and also rub Vick's well over

ated in Germany for the past hundred years. The Genossenschaften or the Raffeissen and Schulze-Delitzsch System in 1810 loaned the tremendous sum of one billion dollars to the poor wage earners of Germany, while in the same year the Peoples' Bank in Italy, through the same system, turned over to the use of the wage earners, the salaried people and the small shop keepers the colossal sum of three billion dollars. Statisticians have figured out internally, the body warmth releases vapors directly to the lungs and air passages where internal medicines cannot go. They loosen the phlegm, open the air passages and stimulate the mucous membrane to throw off the disease germs. For catarrh and head colds melt a little in a spoon and inhale the vapors, also apply well up the nostrils. For asthma and hay fever follow the instructions given above and also rub Vick's well over

BRIEFS

The day we win the cup—Wearn Field.

Fair throughout today with showers tomorrow, says the Weather Man.

H. M. Atto, the weather man, says that today is the hottest day since the 6th of September. The maximum thermometer marked 86.

BOX PARTY FOR THE BALL TEAMS AT ACADEMY TONIGHT

Entirely "within the law" of hospitality will be the box party which Manager Crovo of the Academy of Music, Manager John J. Dillon, of the "Within the Law" company, a great, nay, almost supreme attraction will give at the Academy to-night.

Guests of the managerial hosts will be the Greensboro ball team and the Charlotte ball team. They will occupy the boxes (not the pitcher's box alone) and will be a drawing card in themselves to the great dramatic feast of the evening.

EUROPEAN POWERS ADVISE PRES. HUERTA TO YIELD

Germany, England and France have advised Provisional President Huerta through their ministers in Mexico City to accede to the demands of the United States. This announcement was made here today.

Count von Bernstorff, the German ambassador, informed Secretary Bryan that his government would exert its influence through its embassy in Mexico City to have General Huerta accept the proposed mediation of the controversy between the United States and Mexico. Count von Bernstorff called at the state department and held a brief conference with Secretary Bryan.

CHAUTAQUA PRIVILEGES TO GO TO THE HIGHEST BIDDERS

The managers of the Old Ladies' Home at a meeting at Mrs. E. C. Register's this morning voted to allow the refreshment privileges during the Chautauqua to the
