Span 1	312	Frank Garner	Mrs. Hoyle
Students Not In 6:00 P.M. Class	Library	Don Trapp David Saxon Vann Sistare	

GOSSIP

Well here we go again with the latest news from the halls of Charlotte College. Things are really popping now that classes are in full swing. There is so much news that I won't be able to tell you all of my troubles. Maybe next issue I will be able to tell you some really sad stories.

Bobby Gregg isn't dating anyone just now, but he is asking a lot of questions about a certain freshman girl. We wonder if there is more to the story than he would like for us to know. We won't mention her name this time, Bobby, but you had better let us know something or we might let our imagination run wild.

Ann Padgett is dating Ed Davis from Georgia. Ann and Barbara Duckworth are going down to Georgia this week-end to look the situation over.

Johnie Green and Buba Stroup are finding a lot in common. We have seen them in the hall together and we are wondering if it couldn't be the real thing.

Merwin Foard is still dating Betty Wilson. If you would like to hear about the greatest girl in the world just ask Merwin about Betty.

Frank Garner is dating a cute school teacher. She graduated from Duke and from what we hear she is really the most.

Everybody is wondering about the field trip the Geology 41 class went on last week-end. Were there any romances started? Martha Voyles and Jane Carmichael should be able to tell us all about it.

Pat Kendrick's has really made a hit with the Charlotte College boys but the grapevines have it that she is very interested in Chapel Hill. From what we hear she is not the only girl at C. C. that likes those Carolina boys.

Claude Davis is really snowed over a certain school teacher. This could be the end of his bachelor life.

We haven't even gotten started good and we are already out of space. We will be back next issue with some more hot news. Everybody be sure and come to the fall dance on November 5. We'll see you there.

**SOPHOMORE ELECTIONS
 HELD**

The Sophomore Elections were held October 24 and the following officers were elected. Patsy Hartsell was elected as the Sophomore class president. Robert Stephenson

GEOLOGY FIELD TRIP

Well, Dr. Heck has done it again. Leaving early Saturday morning on October 15, the Geology 41 class set out on a trip to the mountains.

Dr. Heck led a group of about seventeen up mountains, down valleys, in mines and through caves. This proved to be very interesting and in some cases spine-chilling. Not only was it cold in "them thar hills," but it was beautiful too.

Some eager-beavers who couldn't be satisfied with observing the rocks from a distance were not content until they had scrambled around on slippery muddy rocks and peeked into the narrow crevices of the darkest caves. Of course, there are the people who will know the people who will know the most about the rocks and their formations.

There are a few people who got so close to the water at Linville Falls that they just had to see how it felt. Of course, they had no intention of doing this at the time but the wet slippery rocks talked them into it. I hear that Gene Spake is still trying to dry out.

The people around Spring Pine, Blowing Rock and Hampton, Tennessee really opened their eyes when they saw a swarm of mud-spattered, rain-drenched students flocking into their roadside restaurants and stores to eat and warm themselves.

The trip into the Old Camden Cave in Hampton, Tennessee proved to be the most nerve-racking yet the most interesting activity of the whole trip. There are a few narrow ledges inside that I will gladly leave for the benefit of those more prone to the rugged cave-exploring life.

The scenery in the mountains was most enjoyable although our main concern was the rock formations. Speaking of rock formations, we saw plenty of them. Would anybody be interested in samples of such rock as Arzen and banlid gneins, lionestone, brotite schist, magnatit iron ore, feldspar, etc.?

From what I hear we didn't leave much of the mountains there for future Geology students.

Seriously though, everyone did have a most beneficial experience and greatly appreciated Dr. Heck's taking time out to show us the details of our mountains first-hand.

was chosen as vice-president. Frank Frazer became secretary and Wayne Eaton was elected treasurer. We wish these people lots of luck. Bill Foust also should be commended on his fine job of supervising the elections.
