TOWN AND COUNTY.

"THERE IS A GIGGLE AMONG YE TAKIN NOTES AND FAITH IN 'EM."

A Concord Man Goes.

Governor Fowle has appointed Dr. L. M. Archer, of this place, as a representative to the coming Washington celebration in New York city. The Doctor has accepted and will attend.

An Egg-Extraordinary Man.

"There's no telling what" an old hen will do. Mr. Charles Cannon, of No. 2, has a hen that has been furnishing her owner eggs on a constantly decreasing scale in size. The stock she's now furnishing are about the size of partridge eggs. This is egg-straordinary, but true.

Died.

In Holmes county, Miss., 18th instant, Mrs. Lou Area, wife of Mr. W. F. Area, of Vermillion Parish, La. Mrs. Area leaves a husband and two daughters to mourn her death. Mr. W. F. Area is a native of Concord, where he merchandised for many years, and where he has many friends who will sympathize with him in his bereavement.

Our "Brick Machine."

Quite a crowd collected Saturday evening to see our new press unloaded and carried up to THE STANDARD office. Said one colored gentleman to another: "W'at kind of a machine is dat dey workin' wid?" "W'y, dey is puttin' up a brick machine," was the answer. There is something original in the idea of putting up a brick machine in the business part of town and on a second story.

A Knife Thirty-Two Years Old.

The old saying, "You can't lose an old knife," is verified by the experience of Mr. Paul Rhinehardt, of No. 9. He showed us, on last Saturday, an iron-handle knife which he bought in Charleston, S. C., March, 1857. On one blade there was this brand, "U. S. S.," all of which was worn off except a part of the "U." Mr. Rhinehardt won't "throw knife" with you. In this connection it is an interesting fact that Mr. R. had gone all the way to Charleston, S. C., to sell a load of chickens.

Accommodating Merchants.

A correspondent to the Charlotte Chronicle from Lexington tells of a merchant that is so kind that he will "take back" a pair of shoes that have been worn three or four days. Concord has a more humane merchant than Lexington's man. A party bought a pair of brogan shoes that cost \$1.15 for \$1.10 and after using them for seven weeks, concluded they did not suit him; so he returned them to the merchant stating the facts in the case.

Our big hearted merchant now has the shoes.

With a Clean Record.

Some time since a man not a thousand miles away concluded from the influences of trials and hardships that he had lived with his wife long enough. He applied for a divorce and succeeded in getting it. Realizing that it is not well for a man to be alone, he prepared to enter the blessed state again. Like a man he came in and settled a little bill of cost still due, and got another "pair of license." With a clean record and flying colors may he fare better this time.

Mortgages Registered.

An examination of the records of the office of the Register of Deeds brings to light the interesting fact that there were registered up to April 11th, 1889, 505 chattel mortgages against 519 for the corresponding period of 1888. But, strange to say, during the same time there were registered, for 1889, 93 real estate mortgages and 79 for 1888.

What does this show? Does it indicate that while the tenants and renters are improving somewhat the land owners and real estate holders are on the decline financially? If so it indicates a bad condition of things.

Appreciates His Raising.

Mr. Adam Crowell, of No. 6, gave us a pleasant call on Wednesday. He has two brothers, Harris Crowell, of Mt. Pleasant, and Giles Crowell, who has been for two years superintendent of a large flouring mill in the Argentine Republic, South America. Mr. Crowell's services are so valuable the proprietors of the mill on last Christmas made him a present of a \$600 check and a fine saddle horse. And about the same time this big-hearted and tall man sent a check for \$500 to his mother in this county with the following note of explanation: "DEAR MOTHER: Here is a check for \$500, the interest on the debt I owe you for raising me." These three gentlemen are all millers, and are the jolliest trio in the whole country. THE STANDARD goes to the Argentine Republic, and when our friend Giles reads this he can see how news travels.

Cupid Provides.

When love strikes a fellow broadside, he gives up all opposition to its influence. So it seems. Some time since a young man who answered to the description of a love diseased person who loved but was not loved back, called on a friend of ours for love powder. The humane friend sent him the powder, gave him the powders.

A few days since the young man returned and offered to give a recommendation for the powders, saying "I've got 'em, by George!"

—Wanted immediately, 5500 white oak cross ties, eight feet long, eight inch face.

Laying the Corner Stone.

In spite of rain and mud, a goodly number of people attended the laying of the corner stone of the Methodist church at Forest Hill Monday evening. After the impressive ceremonies of laying the corner stone, the audience withdrew to the chapel near by, and listened to an elegant address by Rev. Dr. Solomon. Paoli, of Charlotte. Rev. Mr. Trexler, of this place, also addressed the audience.

The rain this week is very welcome to our farmers on Dutch Buffalo.

Mr. J. I. Cruise's child, which has been sick for some time, is improving.

The measles are still raging in our community; a great many cases at present.

On account of the rain last Sunday evening one of our young ladies were lonely and some of our young men were lonely.

Mr. L. C. Ritchie has not much trouble to get his Berkshire and Big Guinea pigs off his hands, as they are a good stock of pigs.

The many fires in the county on last Friday excited our people very much as the wind blew the smoke and hot air around our homes.

That this! There are five families living on Buffalo creek in No. 6 township which sum up to 61 souls; 51 of this number are at home unmarried.

The Cress Mill company have attached a mill to their machinery which grinds shuck corn and cob at the same time. It also grinds cotton seed, which makes very valuable feed, or fertilizer.

WINDINGBLADE.

Clear Creek Items.

Corn planting is well advanced and a few have planted cotton—just a little.

The air is laden with some "noxious" vapor that is making most all the little children sick.

Trees and all vegetation in spite of the dry weather are putting on garments of green and the forests are melodious with the music of the twittering songster.

A good deal of excitement and some loss of property has resulted from carelessness in putting fire in fields and new grounds this week. The high winds and extreme warmth and dryness of the atmosphere and all combustible material would seem sufficient apology for any man to postpone this reckless handling of fire till he had a chance to do the thing rationally, safely and without alarming the entire settlement.

During the last few days the very elements above us and around us have been shrouded with rolling billows of smoke, and beautiful nature in her fragrant tenderness and innocence has been marred, blackened and destroyed by fire. Many barns and residences in this section were seriously endangered by the fire and were saved only by the most strenuous exertions of neighbors and friends who were on the alert and always ready to render assistance.

There are some fires in the woods yet, but it is hoped that there will be no further cause for alarm.

Mr. J. N. W. White organized a Sunday School at Sossamon's Springs last Sunday evening.

The farmers are remarkably forward in their work. A very large crop is being prepared for.

The prospects are good for a fruit crop if Prof. McAnulty's frost does not get it the last of this month.

One of our neighbors killed a hog the other day 18 months old weighing 14 lbs. He has since joined the Alliance.

A Literary Society was organized at Sossamon's school house last Friday night with Dr. L. S. Flow, Pres., and Miss Jennie Courtney, Sec.

Mr. P. B. Bost will soon have his new store room ready for occupation. Hereafter it will be Bost & Flow, Dr. Flow having become a partner.

Forest Fires In Rocks.

Friday, April 13, 1889, will be long remembered by the denizens of the Rocks as a day of "The Great Fires." At about 10 o'clock in the morning fire broke out near the Rock school house, and owing to the strong wind it spread with great rapidity. The neighbors turned out en masse to fight the fire, but could not get it under control. While fighting with all might they received the sad intelligence of another fire only two miles further north. The crowd at once divided in order to try to control both fires, but the wind was too strong; it would carry fire four and five hundred yards in advance of them.

About twelve o'clock smoke was discovered in the direction of Organ church, only three miles east of Rock school house. Mr. M. J. Burger, a few days previous, had fire on a new-ground, but thought he had extinguished all the fire the day before, but a hidden spark was fanned into a flame, and carried by the strong wind into a fine field which had been cut down a year or more ago, this burned almost like powder. Soon the flames were carried within a few yards of Organ church parsonage, which was almost surrounded by forests, containing brush, leaves, &c., in great abundance. The neighbors seeing the smoke issuing from a new quarter, hastened to the spot and by great perseverance in hard fighting saved the buildings, and stopped this fire without its doing any material damage. As soon as this fire was under control, most of the men hurried to the big fire which was then less than a mile off and burning with great fury. It was soon found entirely useless to try to stop the flames by raking along roads, and small streams. The fire made no halt at these places, after getting ahead of the rakers.

The only thing to be done was to gather at the buildings, prepare for a fight by having water plenty, and extinguish the flame if it should have caught.

As far as heard from no dwellings were burned, but one barn, that of Mr. Frank Parks, and two saw mills. The fire was finally stopped near Mr. Ed. Fesperman's at dark.

The path of the fire was about four miles broad and six or eight miles in length.

Mr. Fesperman, expecting his house to be destroyed, had his clothing carried out into a newly ploughed field, two hundred yards from the inflammable material. While trying to save the house, which they did, they forgot their clothes, and they caught fire and were consumed.

Corn is coming up and prospects for a stand are good.

Mr. C. L. Cannon planted some cotton two weeks ago. We like to see it early, but we think he is almost too much so.

Very forward wheat has been nipped a little by the frosts. No great amount of damage done. Fruit is not hurt.

The Sunday school at Poplar Tent was organized Sunday, the 7th, it having been suspended during the winter months. About seventy joined.

Eddie Morrison, son Esq. Jno. H. Morrison, has started to school in Concord. We learn he is highly pleased. Eddie is an exceptionally smart boy.

One of our good farmers, W. F. Cannon, has had the misfortune to lose nearly all his chickens (sixteen in one night). Something strange about it. His cats are dying apparently with the same disease, having eaten some of the dead chickens.

A very serious fire occurred near Shiloh church Saturday, April 6th. It originated in a new ground. Several houses were in danger. Mr. John Johnston's especially, but by the good fortune of immediate help, not much damage was done.
