## The Farm.

R. P. Shellew, in Farm and Home. Nothing should be more strictly saved upon a farm than all manurial substances. A good compost is a source of wealth from which the be procured, should be put into it. manure with plenty of work will force from and after it is ordained. If slaughter-house waste is obtained give twenty bushels to the acre on scraps and night-soil. With this place of corn for horses. The man mix some good absorbent, rich in who makes an abundance of oats organic material, like loam, dry will never have poor horses. For lamps, wires or any other apparatus be muck or mulch. Of these the last the last eight months there has been two are the best. In many cases no general overflow of the creeks, lating either of the foregoing provisions two or three loads of this dry muck and if similar seasons could continue when mixed with the manure is as during the summer these lowlands fined fifty dollars or imprisoned for thirty good, for all practical purposes, as would be the very place to make days. the original manure itself, as all large and cheap corn crops. But liquid and gaseous portions are ab. no one should always plan and plant sorbed by the muck, so that nothing for excessive rains and a long is wasted.

To compost this, place layers of the material between layers of the absorbent used; the latter should be four or five times greater than process is desired to be especially and post office address. hastened lime may be added. When the whole material has been decomposed and the time has come to apply it, let it be thoroughly spaded over and mixed before using. This ter can be obtained. However, its indorse and prescribe it. Guarconcentrated form prevents its being anteed and sold by P. B. Fetzer. applicable to large fields, but for a special crop it is very good. It may, nevertheless, be applied in connec- firm hold on the American people tion with barnyard manure, and by and is acknowledged to be superior to all other preparations. It is a positive cure for all Blood and Skin both may be increased.

Eat Honey. Florida Dispatch.

Thousands and tens of thousands they would develop and grow up latest machine on earth, into healthy men and women. Children would rather eat bread and butter; one pound of honey will reach as far as two pounds of butter, and has, besides, the advant | Cannot go hand in hand if we look age of being far more healthy and pleasant tasting, and always remains good, while butter soon becomes rancid, and often produces a cramp stipation and Indigestion, and make it a burden as Dyspepsia. Acker's Dyspepsia. bread is very beneficial to health. healthy for the stomach. In prepar- Store. ing blackberry, rasberry or strawberry shortcake, it is infinitely superior. It is a common expression that honey is a luxury, having nothing to do with the life-giving principle. This is an error. Honey is food in one of its most con-give you a sample bottle free at Fetzer's Drug Store, centrated forms. True, it does not add so much to the growt of muscles as does beefsteak, but it does impart other properties no less necessary to health and vigorous physical and intellectual action. It gives warmth to the system, arouses nervous energy and gives vigor to all the vital functions. To the laborer it gives strength-to the business man, mental force. Its effects are not like ordinary stimulants, as spirits, etc., but it produces a healthy action, the results of which are pleasing and permanent-a sweet disposition and a bright intellect.

The Management of Bottom Lands From the Carolina Spartan.]

Some time ago Capt. S. S. Ross, of Gaffney City, said: "I think the best plan with our creek bottoms is best plan with our creek bottoms is to keep cultivating them. Keep the ditches cleaned out and bushes and briars cut down and gather hav from them. That will pay better than corn, and the land will be improved." He was led to this con- HOMADE COFFINS, ALL KINDS clusion by the large percentage of failures to make corn on these bottom lands of late years. It is often the case that a farmer gets his land in fine condition, and knowdo more good on such lands than on goods. upland, he uses all he can spare. Some time during the summer a freshet comes and the loose soil. manure and crops are all swept away. Clean diches with judicious terracing will save these lowlands and cause a gradual filling up But if one wishes to make the improvement rapidly, the better plan will be to turn these lands "out to ings made in any style. All contracts for buildings faithfully carried out. Office in Caton's building, up stairs.

the lands will become soured and grass will not grow. If willow hedges are set out at intervals and the native grasses grow, if they

kept well out back they will assist much in this filling process. Let make fair hay, or if you can put in the cultivated grasses it may be better. Always cut with a high of any owner of any premi stubble and when the overflow comes upon which there is a ceilar, sink or exthere will be no washing. Much

all the plant and animal remains to fall back on their upland. A little cheaply add this together with fish these uplands. Let oats take the
