SOME FACTS ABOUT SNAKES.

Funniest Serpent in the World... How Sunke Skeletons are Prepared.

"The funniest snake I know anything about is one found in Africa, which lives upon eggs," said Osteolegist Lucas to a Star reporter. "It has a curious projection downward Beaufort, from its backbone, just behind the head, which is like a tooth, the extremity being actually tipped with enamel. This tooth-like appendage is Burke, a most important function with re-Cabarras, lation to the creature's method of Caldwell, getting a living, and would be diffi. Camden, cult to find a more astonishing illus-tration in nature of the adaptation Catawba, of structure to necessity.

"When the snake swallows an egg | Cherokee, the latter is passed through the guliet until it encounters the sharp tooth I have spoken of, which breaks Columbus, the shell. Thus not only is the food Craven, rendered ready for immediate diges. | Cumberland, lost, as would be the case if the Dare, snake were obliged to bite into the egg with its mouth fangs.

It seems surprising how many snakes are able to swallow animals bigger than their own diameter, until it is considered how particularly well nature has adapt d to the pur-pose the structure of their jaws. Graham, The lower pawhone, instead of being in a single piece, is merely connected in fromt by an a ascid lighment, so that the two halls are capable of great extension. Again, the halves Haywood, the lower jawhone are attached to Henderson, the send very far back, at the animai can make an enormous gap.

"To properly prepare the skeleton of a make is one of the most difficult joinst joins. Joinst Joinst Jones, serpents of all sorts come to the Smillsonian in two shapes. The small r ones are usually in alcohol, while the big fellows are apt to be M. simply dried and poisoned by s a .ing in an arsenical solution. In the preparation of a specimen very sharp delicate scissors are employed, with forceps to supplement them, Nash, the flesh being carefully removed so far as is practical with these in- Northampton struments. Then recourse must be Onslow, had to scraping of the boncs until they are perfectly clean. Some time the skeleton is soaked in an acid Pender, preparation for the purpose, but this | Perquimans, destroys the ligaments, and it is not Person, easy to put all the parts together Polk, again rightly. In the preparation Rando ph of delicate skeletons the great thing Richmond, is patience. There are two very finely prepared skeletons the great Rockingham, thing is patience. There are two Rowan, Rutherford, very finely prepared skeletons of big Sampson, snakes in the natural museum, and Stanly, n making them ready for exhibition | Stokes, the utmost care was taken to pre. New Berne Journal; At 2.30 Friday, Capt. Adam Warner, the offier n charge of the patrolmen, seized "The Sailor's Return," a Maryland vessel that had been dredging in Jones Bay, Pamlico county. The vessel and crew were brought to this city. Officer M. J. Fowler, of the patrolmen, made the arrest. E. G. Hill, J. P., tried the men-vesterday and bound them over in the sum of \$500 each, to the next term of Superior court in Pamlico county. In only white man taken, is the mate. The most of the men belong in Baltimore. After the trial one of them owned up to the dredging and said they dredged only at night.

The trouble is, very few of our people look upon the newspaper business as a serious, earnest business, looked upon as solvent who engages in the newspaper business; nor regarded as in it for the purpose of burden its columns with all sorts of 'ree announcements; and have done it the highest compliment when they borrow of a neighbor and read it .-Winston Sentinel.

Rio de Janeiro, Feb. 26,-The election of General Deodoro da Fran-

FOREWARNED IS FOREARMED,

In most diseases, cure depends upon the promptness with which remedies are administered. If the remedy be taken when symptoms of disease first manifest themselves and before the normal strength of the body is greatly impaired, the complaint may often be checked and cured in the beginning, the sufferer thus escaping sickness of perhaps a fatal character. This is especially true of complaints to which the young are liable. First symptoms are often neglected, simply because no effective remedy happens to be at hand, and it is not until the disease has gained considerable headway that means are taken to

Every household, therefore - and, for that matter, every individual—should be provided with a few simple remedles all are exposed. As no complaints are more common than those of the throat and lungs, a safe and efficacious ano-Ivne should always be within reach. We have been impelled to make these cautionary remarks by happening to notice in a recent paper the case of a child who would, undoubtedly, have died of croup had there not been in the house part of a bottle of Ayer's Cherry Pectoral. The following incident related by the father of the little one, should certainly impress every parent with the necessity of being forearmed

these means prove too late!

for a similar emergency; —
"One of my children had croup. The case was attended by our physician. and was supposed to be well under control. One night I was startled by the child's hard breathing, and on going to his bedside found him strangling. He had nearly ceased to breathe. Realizing that the child's alarming condition had become possible in spite of the med-icines already administered, I reasoned that such remedies would be of no avail. Having part of a bottle of Aver's Cherry Pectoral in the house, I gave the child anxionsly waited results. From the moment the Pectoral was given, tho child's breathing grew easier, and in a short time he was sleeping quietly and breathing naturally. The child is allve and well to-day, and I do not hesitate to say that Ayer's Cherry Pectoral saved
