ing how little attention is paid to their special demands.

One of the most common ailments is constipation, which very frequently becomes chronic for want of proper treatment. As a general rule, when a per-son wakes up to the consciousness that he needs something "loosening," he takes the first thing at hand, if it only promises a speedy effect. The evil of such indiscreet medication is that while the dose may cause a prompt and energetic movement, the operation is liable to be followed by another, and perhaps longer, period of constipation. If this again is remedied by a similar treat-ment, it is sure to be succeeded by still more stubborn inactivity - the final result being a permanent weakness of the bowels in the form of chronic and

confirmed constipation. Now what is needed by way of physic, in any protracted interruption of the regular operations of the bowels, is simply a gentle aperient to bring about a movement, leaving the rest to cool-ing drinks and relaxing food. For this purpose, there is no better opening med-icine than Ayer's Pills. Being purely vegetable in their composition, and en-tirely free from calomel or any other harsh, drastic purgative, their use is unattended with those injurious effects which follow the taking of ordinary cathartics. On the contrary, Ayer's Pills are calculated to strengthen as well as regulate the bowels and stomach, and also to stimulate the liver, the sluggishness of which is often the real cause

of constipation. Ayer's Pills, being sugar-coated, are easily taken and are, therefore, admira-bly adapted for use either at home or abroad. They are recommended by lead-ing physicians all over the world, and, in countless households, are the only medicine considered absolutely indispensable. They are, without doubt, the ost popular pills ever made, 🛹 🔍
