THE BLOOD IS THE LIFE,

No portion of the human organism has, within the past few years, been submitted to more thorough and intelligent examination, by medical scientists, than the blood. The result of these investigations has been to clearly demonstrate that the general health is more dependent upon the condition of the blood than upon any other thing.

In making a diagnosis, some modern practitioners are not satisfied with merely determining the temperature of the blood; they test it by means of the microscope and other appliances, to ascertain if any foreign bodies have introduced themselves among its minute corpuscles. Thus, for example, it has been found that in persons affected with gont, uric seid may always be detected in the blood; while the cause of other disorders has been traced to the

presence of germs, or interobes.

These discoveries have thrown a flood of light on the causes of disease; and physicians now, in the treatment of many complaints, go directly to the root of the evil by endeavoring to purify the blowl of its contaminating poisons. For this purpose nothing else has been found so efficacious as the lodide of potassium. But the best effects of this drug can only be obtained when it is used in combination with other things, such as sarsaparilla, podophyllum, or yellow dock; and Ayer's Compound Extract of Sarsaparilla, being considered the most skilful union of these ingredients known to pharmacy, is therefore most highly recommended by physicians.

Even if the iodides were not present. the Honduras sarsaparilla alone, of which Ayer's medicine is the extract, would be sufficiently effective, in the unifority of cases, to produce the most desirable results. But, "to make assur-ance doubly sure," and to greatly facilitate the purifying process, the fadide of potassium lends its powerful alterativo and detergent properties to the rest.

The distinctive value of Aver's Saraa parilla is that, while it is quite as potent for most purposes as the fodde alone, it is safer in non-professional hands; for, by simply following the directions on the wrapper, the patient becomes his own physician. Hence this medicine has long been recognized by leading physicians and druggists everywhere as the standard popular blood-purifier.
