has had, in addition to those our are sure that fully 100 per cent. of

Pay Our Share. No man can form an adequate idea of the vast and incalculable amount of money that would be required to "pay the Union soldier the difference between the price of depreciated money in which he was paid and gold." During the war nearly three million soldiers (the exact number is 2,778,304) enlisted in the Union army, and now it is gravely proposed by the Third party patriots and philanthropists to pay to those soldiers, or their heirs and legal representatives, the difference between the greenbacks, with which they were paid during the war, and the price of gold at that time. If such a project as this should be seriously attempted, there would not

be enough money in the South to

pay our share.
