Comment unnecessary, WHAT NATIONS USE GOLD?

The following table from page 45, the amount of money per capita willing to give. each nation has:

United States England France Germany Austria Netherlands Belgium Italy Spain Portugal Roumania Turkey Australia 24.00 Japan (silver) India (silver) China (silver) Mexico (silver) Central American States (silver) 3.78

South American States (silver) 17.00 France has the largest per capita, and the largest stock of gold. She has \$825,000,000 in gold, while we have \$625,000,000.

The mint report for 1894, says the bank of France, which holds the money of France in its hands, has: \$430,000,000 Gold 225,000,000 Silver Showing \$205,000,000 more gold than silver.

The November statement of the United States treasury showed specie holdings: \$508,000,000 Silver

126,000,000. Gold Showing \$382,000,000 more silver than gold.

So it appears that the Bank of France held nearly \$2 in gold to every dollar in silver, while the in gold to every \$4 in silver.
