CONCORD, NOV. 29, 1897.

PUBLIC FEELING SHOULD DOWN A LITTLE.

The people in Burnswick county celebrated Thanksgiving day by wresting Nathan Willis, a negro, from the legal authorities and avenging the blood of Stephen Stephens, a young white man of the community.

It is not a surprise that a community should feel much indignance over the murder of a respectable citizen by a worthless prowling vagrant that would rather reap the rewards of others' honest toil, even by murdering the possessor, than to earn his own bread, but it must be regretted that public passion became so extreme as to take Willis out and chain him between trees and burn him. Public feeling seems of a rather virulent type. It should down a little.

THE 14TH BIRD PUT AWAY.

The Observer feels sure its longitudinal bird eater is better than all Riches of Concord as indicated by the way he has put away his fourteenth bird. The Observer seems to think THE STANDARD is going to be hard to please and offers to keep Abernethy right on for THE STANDARD'S sake. THE STANDARD is ready to yield the palm to the Observer's man if he succeeds in putting away and holding down his thirtieth bird. By way of pointer, however, THE STANDARD would suggest that more than one bird be on hand, for about the 27th bird is apt to prove a genuine kicker and even though the bird is put all the way down to the digestive laboratory, it may come back, and is apt to do so. Every trial will call for a new bird or failure will ensue.

The Reichsrath of Austria got as rowdy last Friday as our House of Representatives at its last session, probably even more so. There was a sort of free fight and there is no telling where it will stop.

The great debate in Raleigh between Trinity and Wake Forest resulted in favor of Wake Forest which means that city lights and water supply is better owned by individuals than by municipalities. It now remains to be settled upon whether Wake Forest had the right side of the question or whether her champions just put up the better debate.

The New York World has sounded about fourteen Senators who are favorable to decisive action in favor of Cuba, some going to the extreme length of armed interference for Cuba. We wonder if there is not a taint of "might makes right" in this thing. If Spain were one of the first powers of the world and Sena-

tors were to have to advance in the front rank in battle, some of the fiery advocates of a reckless disregard of international treaty rights might begin to question whether it would not be better to know first the probability that Cuba could wear the spurs that others helped her to win. The administration probably knows what it is doing having availed itself of the best possible opportunities of understanding the situation.

The Surprise of All.

Mr. James Jones, of the drug firm of Jones & Son, Cowden, Ill., in speaking of Dr. King's New Discovery, says that last winter his wife was attacked with La Grippe, and her case grew so serious that physicians at Cowden and Pana could do nothing for her. It seemed to develop into Hasty Consumption. Having Dr. King's New Discovery in store, and selling lots of it, he took a bottle home, and to the surprise of all she began to get better from the first dose, and half dozen dollar bottles cured her sound and well. Dr. King's New Discovery for Consumption, Coughs and Colds is guaranteed to do this good work. Try it. Free trial bottles at P. B. Fetzer's drugstore.

As It Was In the Days of Abraham.

Within full view of the streets of Morganton and not eight miles away as the crow flies is a country where some of the farming methods are identical with those in vogue in the time of Abraham. On the top of Kaylor's Knob, one of the highest peaks of the South Mountain, is a wheat field containing nearly a hundred acres, comparatively level and of remarkable fertility. In this field on the side next to Morganton is a great flat which has been used to come out of mind as a threshing floor. Here the wheat and rye is brought and threshed with flails, and winnowed just as Bosz winnowed his barley at his threshing floor near Bethlehem centuries ago.—Morganton Herald.

Danger in Postage Stamps.

One of the newest diseases is the "postage stamp tongue." The credit of discovering it is due to a London physician. It appears that the mucilage itself is injurious, and that, further, it is an excellent cultivating medium for germs of the worst character. In the ailment called postage stamp tongue the latter becomes sore and covered with red spots. A bad sore throat is likely to follow if great care is not taken. Apart from the specific disease of the tongue, any contagious disease may be acquired through the medium of mucilage. Never lick a postage stamp with your tongue. It shows a great lack of cleanliness and hygienic knowledge.—Ex.

North Carolina Railroads.

Monday the map of North Carolina railroads for 1897 was issued by the railroad commission. It is prepared by Henry Clay Brown, clerk to the commission. It shows that there are now railroad lines in all the counties of the State save eight. There are fourteen roads of the Atlantic Coast Line system, 15 of the Southern, 12 of the Seaboard and 30 miscellaneous; total 71. The total mileage is 3,436. Of one line, the Danville & Western, only three-quarters of a mile is in this State. The longest road is the Cape Fear & Yadkin Valley, 331½ miles; the next longest the Carolina Central, 264½ miles. The new map is by far the best one ever issued.—Daily Record.
