A BREAK IN THE CLOUD.

The Queen Softens—Adjustment May Be Effected—Preparations Go on the Same—Gen. Lee Not Recalled—The Message Delayed.

The situation looks less grave to-day. Despite the best efforts to gain the most reliable news it seems there was a mistake in the dispatch that Gen. Lee received orders Wednesday noon to depart from Havana. He has probably not received definite orders to withdraw but the Americans are leaving the island under his directions and care.

The news that the message is withheld at his request is unconfirmed. The message, however, will not go in before next week and possibly it may not need to go in its present shape. The impression today is that it is the softening attitude of the Queen Regent of Spain. It is now not unlikely that Spain will take the wiser course and yield to America's demand before a war that which she would have to yield to with us after a struggle.

The situation is more hopeful, but not entirely assuring, however. Congressmen who interview the President usually come away convinced that he is right in his course and has all the determination to free Cuba that any one needs, but is coupling with it the greatest discretion.

A dispatch from Madrid says a satisfactory settlement has been arrived at with America, but this we think is premature.

Spain is buying small arms, and the United States is still buying the auxiliary boats. There is no letting up of preparations.

Cuba is very determined on nothing but absolute freedom and should the United States offer to intervene to any other end the act would not be appreciated.

I now take great pleasure in recommending them to any person suffering from this terrible malady. I am gratefully yours, M. A. Hogarty, Lexington, Ky." Sold by P B Fetzer's Drug Store.

A NOTABLE ADVANCE

In Old Field Chemistry at Brief, in Union County As Chronicled By Our Witty Writer.

A few days since, some revenue officers discovered a barrel of "you know what" isolated in an old field. Pouring out the contents, they went on, feeling confident that several family rows would consequently fail to occur on schedule time. Some time later a boy, happening to pass that way, remarked the untimely fate of the unfortunate barrel. A little sniffing revealed the exact locus of the fluid absorbed in the soil. With a feeling akin to that which impelled Sir Isaac Newton when he "invented" the law of gravitation, the youthful connoisseur set about for some means to restore the lost. The result was, he scooped up the soil, placed it in an ash-hopper-like contrivance, and filtered it. To test the virtue of the racy fluid thus obtained a dose was administered to another little boy. The experiment more than satisfied the wildest hopes of the juvenile chemist, for his young patient, soon collapsed into convulsions. This incident marks a notable advance in old-field chemistry; and unless our officers resort to improved methods, their effort to place whiskey beyond the eager, impulsive grasp of thirsty mortals will be flat failure.

One night a gentleman (?) and a lady (?), both in a buggy, paraded our streets, circus-fashion, yelling and cavorting till the very urban atmosphere was in a quiver. We think our embryonic city is entitled to immunity from such nocturnal invasions. AUGUSTINE.
