Some Peace Talk.
 The Washington dispatch of the 8th to the Atlanta Journal says: There have been intimations to the State Department from representatives of powers outside of Spain looking toward negotiations for peace.

While they have been, of course, unofficial, they are known to be with the view of trying to ascertain as to what conditions this government would demand if Spain sued for peace.

Answers to the inquiries have been given in the same spirit in which they have been made, and it was plainly stated that the administration would only consider terms of peace on the conditions of the freedom of Cuba, the permanent occupation of Porto Rico by the United States, and the holding of the Philippines until the future of that country shall be decided by this government, with the intimation that we will also permanently hold it.

These were the general outlines of the terms suggested, but it was given to understand that there were many details in regard to war claims, indemnity and other matters which would have to be settled in the general terms of peace.

Since these intimations have been given there has been no direct negotiations or suggestions made to the State department by any of the powers, and it is not thought that any will be made until San Juan has fallen and our troops are moving towards Havana.

Why She Enjoyed the Earthquake.

An old lady from Oxford, Mich., who with her husband had spent the winter in this State, was asked by one of her neighbors if she had heard an earthquake while in California. "Yes, I heard one," she answered, "and rather enjoyed it, for it was the first thing that happened since John and I have been married that he did not think I was to blame for."—Argonaut.

The GRAPHOPHONE
 The most fascinating invention of the age. Always ready to entertain. It requires no skill to operate it and reproduces the music of bands, orchestras, vocalists or instrumental soloists. There is nothing like it for an evening's entertainment at home or in the social gathering. You can sing or talk to it and it will reproduce immediately and as often as desired, your song or words.
 Other so-called talking machines reproduce only records of cut and dried subjects, specially prepared in a laboratory; but the Graphophone is not limited to such performances. On the Graphophone you can easily make and instantly reproduce records of the voice, or any sound. Thus it constantly awakens new interest and its charm is ever fresh. The reproductions are clear and brilliant.
Graphophones are sold for \$10 and up
