Poisoning the System.

It is through the bowels that the body is cleansed of impurities. Constipation keeps poisons in the system, causing headache, dulness and melancholia at first, then insidiously eruptions and finally serious illness unless a remedy is applied. DeWitt's Little Early Risers prevent this trouble by stimulating the liver & promoting easy, healthy action of the bowels. These little pills do not act violently but by strengthening the bowels enable them to perform their own work. Never gripe or distress.—Gibson's Drug Store.

FLORENCE, S. C., Nov. 26, 1900.—I was first advised by our family physician in Charleston to use TEETHINA with our baby when he was but a very young infant, as a preventive of colic and to warm and sweeten the stomach. Later it was useful in teething troubles, and its effect has been found to be so very beneficial and so free from danger that are consequent upon the use of drugs and soothing syrups, that we have come to regard it, after use with three children, as one of the necessities when there is a new baby in the house and until the teething troubles are over, and we take pleasure in recommending it to our friends instead of the horrid stuff that so many people use to keep their baby quiet.
