The exports of the United States to the countries of the rest of the world during the eleven months of the current year ending with November exceeded the imports by somewhat more than \$475,000,000. The value of the exports was \$1,867,614, 510, while the imports were worth \$1,392,552,228, according to statistics issued today by the department of commerce and labor. During the corresponding period last year the exports exceeded the imports in value by about \$211,000,000.

CARE OF DAIRY HERD

Eliminate Animals That Run Dairyman Into Debt.

Cows Must Have Best of Care and Comfortable Quarters if They Are to Give Best Results-Sunlight is One Essential.

(By R. G. WEATHERSTONE.) To increase the profits from our erds or decrease the profits of proluction we must eliminate the cows which individually run us into debt. In the second place we must feed our cows more intelligently. The feeding of a dairy herd to produce profits more economically is a hard proposition to put to a man at the present time. Under the present conditions the only way to produce butter fat at less cost than we did last year is by grown dairy foods.

able than dry fodders. Cows that animals. are fed these appetizing feeds with clover hay will eat more hay than when confined to clover alone.

The German standard of feeding calls for one and one-quarter pounds of protein to every ten or twelve pounds of milk

Another principle is that feeding mineral matter increases the value of the manure and much of the profits from high feeding must be made through the fertility brought onto the farm by the increased value of the manurial fertility.

But, high feeding is not always the most profitable. This is a matter that must be worked out by the man himself according to his farm and conditions. Conditions are not the same on two farms. The difference in cows, the kinds and amount of available home-grown foods, the market prices of dairy products and dairy foods, compel each man to work out the problem as it applies to his own payticular farm, always watching the milk flow, increasing the foods and protein until a point is reached that yields the most profit.

Cows must have good care and comfortable surroundings if they are increasing the efficiency of our home- to respond to intelligent feeding. The great problem in connection with the The feeding value of our home stable is to keep it warm and well vengrown foods wil depend largely upon tilated at the same time. Pure air is their palatability. By feeding a just as necessary to the cow as food. variety of feeds we make our rations Sunlight is another essential. STIRRUP-SADDLE IS USEFULITEN PRINCIPLES OF FARMING

to Have About Farm-Handy in Case of Emergency.

The stirrup-saddle is one of the most convenient things to have about the farm, as it comes in mighty handy

A Simple Saddle.

where there is no other saddle left in the barn in a time of emergency. It is simply a pair of stirrups buckled to a strap. Put a blanket on the horse, throw the strap with the stirrups over this, and get into the saddle. It's a good sight better than riding bareback. Try it and see.

Sprinkling Eggs in Incubator.

One of the experiment stations has by using more horse power and better found that by sprinkling eggs during implements. bation, one-third more eggs were extent of utilizing all the waste prodhatched, and the eggs that were sprinkled from the third day on gave about 10 per cent better hatch. Submerging the eggs did not seem to increase the hatch as much as sprinkling. It was also found that while it is easy to develop chicks in large, thick-shelled, dark, Brahma eggs, it is very difficult to get a good hatch.

Profit in Camphor.

The department of agriculture, after suitable experiments, decides that the production of camphor may be made ings so that they do not touch one an profitable in Florida

Know and Practice to Better Farm Life.

(By the LATE DR. S. A. KNAPP.) Upon the inauguration of the farmers' co-operative demonstration work in the southern states it was found necessary to outline some of the fundamental principles of good farming and to insist that the tillers of the soil should become familiar with them and practice them as a first step in the betterment of farm life. These principles are as follows:

(1.) Prepare a deep and thoroughly pulverized seed bed, well drained; break in the fall to a depth of 8, 10 or 12 inches, according to the soil, too much of the subsoil to the surface. (The foregoing depths should be (2.) Use seed of the best variety, intelligently selected and carefully

(3.) In cultivated crops, give the rows and the plants in the rows a space suited to the plant, the soil and the climate.

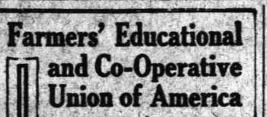

(4.) Use intensive tillage during the growing periods of the crops. (5.) Secure a high content of humus in the soil by the use of legumes, barnyard manure, farm refuse and commercial fertilizers.

southern farms. (7.) Accomplish more work in a day

(8.) Increase the farm stock to the ucts and idle lands of the farm. (9.) Produce all the food required for the men and animals on the farm. (10.) Keep an account of each farm product, in order to know from which the gain or loss arises.

Keep Eggs Fresh.

Experimenters for the Italian min istry of agriculture claim that eggs may be kept perfectly fresh for a year by first coating them with lard, then packing them in fine odorless shavother.

Matters of Especial Moment to the Progressive Agriculturist

You will be a better farmer by taking your wife's advice ocasionally. You can't expect to cultivate neighbor's friendship by harrowing his may contribute to your success more feelings.

A man who worries very little may to you. also be called a man whose complacency has worried very many. The sincerity of a man's religion can

not be gauged by the number of buttons he puts in the collection plate. The man who puts in a good part of the winter studying bulletins and farm papers can be told by looks of his fields next summer.

Some people are always complaining of their poverty who are rich without knowing it. Money is not the real gauge of wealth.

A farmer expects good workmanship from the blacksmith and the carpenter, but is content to slouch along without having learned his own busi-

ed that there is a difference of 300 per cent. between the price received by them and that paid by the consumer. Few men would admit that their

wives know anything about business, but a great many will follow their advice, and then take all the credit for themselves. A man driving to town in the mud

roads. "Make them as narrow as you please," he replied, "but for heaven's sake don't make them any deeper." Don't think that you can peg away. day in and day out, and then some time come to the spot where you can have a good time. It is much safer and better to take a little at a time

as you go along. Whenever prices of farm produce advance a little the cry is set up that the farmers have formed a trust. is big enough to form a combination of 6,000,000 farmers and operate it as

FARMERS' UNION IS DEFINED

Covenant Among Farmers for Mutual Benefit-Care Should Be Used in Selecting Delegates.

The Farmers' union is a covenant among farmers for their mutual benefit. Any harm in that? Wise men have see that succulent foods are more place a value upon her ability to bring said that when farmers are prosperous easily digested than dry fodders ; that a strong and vigorous calf, it may be that all other legitimate occupations receive their share of the farmers' uplift; then why is it that any rightthinking man should not be willing to lend a helping hand to the Farmers'

If your union has a last year's bird nest-appearance, better kick it off the limb, and round up a new one, and be sure that the material will not take the dry rot, and then mind the flies and vermin of the new one. Our county unions will soon elect delegates to the state union. Round up your best men as delegates. Let your delegates be of that kind of patriotic, liberty-loving farmers who never allow their prejudices or personal interest to lead them away from their duty-men of pluck and grit that know the law and good for the Farmers' union, and have the backbone to stand for the good of the union even against friend or foe alike.-Farmers' Union Sun (Columbia, S. C.).

Ever Try Soybeans?

What are you going to do with that piece of ground you didn't get ready for corn? It will not pay to let it lie idle this summer. Why not plant it to soybeans? This crop will make good hay but is better for soiling or silage. It makes excellent pasture for hogs and sheep, yielding from 5 to 10

tons of green forage per acre. The soybean is a legume, and in nutritive value is equal to red clover. As a soil improver it is excellent. This plant will grow on a wide variety of soils, but the richer the soil the larger the yield of forage. Prepare the soil the same as for corn. Drill, the soybeans in, from 3 pecks to a with implements that will not bring bushel and a half of seed per acre, after corn planting time. The heavier seeding is where the crop is grown reached gradually if the field is for hay or pasture. A common drill broken with an ordinary turning plow. can be used with the oat feed opened. If the disk plow is used, it is safe to and enough of the holes stopped up break to the above depths at once.) to give the proper distance between

Ignorance Versus Knowledge.

"If you will come with me over the state and note the pitiful ignorance of the first principles of correct dairy practice, as it is observed in the common, every-day life on the farm, you cannot deny the call for leadership and assistance. PRESIDENT WATERS TO BOYS

Head of Kansas Agricultural College Makes Interesting Talk to Students on "Opportunity."

President Waters of the Kansas Agicultural college recently used the following language in talking to the students of that institution:

"You are willing enough to assume the entire responsibility for whatever success may come to you, but you are just as ready to lay the responsibility of your blunders and failures upon someone else. Have the manhood, then, to carry both, and have sense enough to profit by both. A success improperly utilized may be your undoing; a failure used in the right way than anything else that could happen

"You may have asked yourself whether you have not come upon the stage of action too late, after all the really great things have been discovered or accomplished, and you may be wondering if there is left any task large, enough to justify your present

pains in preparation. "The truth is, this is the hour of opportunity, and I mean large opportunity. So long as famine stalks unhindered through the most prosperous countries on the globe, and there are bread riots in every civilized land; so long as the world lives from hand to mouth, never having more than two weeks' food ahead; when such a prosperous and powerful nation as the British empire must protect the trade routes from foreign countries over which come four out of every five loaves of bread her people eat, the question most fundamental to mankind -that of our food supply-is far from being settled, and will tax the ingenuity of the best trained scientists and economists that this or any other college can furnish.

"Thus far in this age, which we class as golden, we have been profilgate of natural resources of every sort, was asked if he favored narrowing the and our progres has been dearly

bought. "The problem of maintaining this high standard of living will give employment to the best equipped engineers and chemists. When, in the face of abundant yields, the cost of living in every land has risen to the breaking point, there is room for all the help that can be afforded by those trained in the arts of science, of home making and home management.

"You need have no fear concerning There is no man in this country who the magnitude or importance of the work before you.

"What may very properly give each of you and us the gravest concern is whether you will be capable of measuring up to the opportunities presented. "If you will go out prepared to do

something, and do it right, the world will meet you more than half way and will cheerfully supply the chance." A good many farm boys when they come to town or otherwise get away

from home take a vacation from church -assuming that the essentials of life may be different in the new environment. To them President Waters "It is a mistake for you to suppose that coming to college means a religious vacation. You should go to the church you attended at home. You should not shut yourself away with

your books. Join a literary society. Take a reasonably active part in college life. You are not here primarily to be a football player or a college rooter. These things are incidentalimportant, but not to be thought of as against the things you came here to do; to fit yourself for life; to study."

NOT COMPLIMENTARY.

Magistrate-You are accused of having kissed this lady. What have you to say in your defense? Prisoner-Nothing (looking at the

woman)—I was drunk and deserve to be punished.

BURNING ITCH WAS CURED

"I deem it my duty to tell about a cure that the Cuticura Soap and Ointment have made on myself. My trouble began in splotches breaking out right in the edge of my hair on the forehead, and spread over the front part of the top of my head from ear to ear, and over my ears which caused a

most fearful burning itch, or ecsema. "For three years I had this terrible breaking out on my forehead and scalp. I tried our family doctor and he failed to cure it. Then I tried the Cuticura Soap and Ointment and used them for two months with the result of a complete cure. Cuticura Soap and Ointment should have the credit due, and I have advised a lot of people to use them." (Signed) C. D. Tharrington, Creek, N. C., Jan. 26, 1911.

Itching Scalp-Hair Fell Out. "I will say that I have been suffering with an itching on my scalp for the past few years. My hair fell out in spots all over my head. My scalp started to trouble me with sores, then the sores healed up, and crusts formed on the top. Then the hair fell out and left me three bald spots the shape of a half dollar. I went to more than one doctor, but could not get any relief, so I started to use the Cuticura Remedies. I tried one bar of Cuticura Soap and some Cuticura Ointment, and felt relieved right away. Now the bald spots have disappeared, and my hair has grown, thanks to the Cuticura Soap and Ointment. I highly recommend the Cuticura Remedies to all that are suffering with scalp trouble." (Signed) Samuel Stern, 236 Floyd St., Brooklyn, N. Y., Feb. 7, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each. with 32-page book, will be mailed free on application to "Cuticura," Dept. 9 K, Boston.

NOT THE OLD MASTER'S.

Visitor (admiring painting)-Is that one of the old masters? Rastus-No, sah; dat belongs to de ole missus.

Shakespeare Footnote.

Ole Mammy Lize was dusting the southern woman's drawing room. She came to a small bronze bust of Shakespeare and began carefully going over him with her rag. "Mis' Juliet, chile, who am dis yere gemmun?"

"That is Shakespeare, Lize, a wonderful poet, who died centuries ago." "Dat him, missy? Lor', I'se done hyear o' Mistah Shakespeare a lot ob times. Ever'body seems to know him. 'Deed, I done hyear so much 'bout him dat I allus thought he was a white gemmun."

Money Saved Is Money Made. Dr. Wm. Self, of Webster, N. C., an old practitioner of medicine, tells us that after many years' experience in medicine he finds it money saved to his patients to use Taylor's Cherokee Remedy of Sweet Gum and Mullein for coughs, colds and consumption, Whooping Cough, etc.
