SEVEN DAYS' NEWS AT A GLANCE

Important Happenings in All Parts of the World Summarized for the Busy Reader.

Southern.

GovernorO'Neal of Alabama would like the city of Montgomery to afford him better protection from midnight visitations of burglars. The governor has had five visits from burglars, which have occurred within the past few weeks. Altogether, burglars have broken into the executive mansion two times, and have attempted to break in on three other occasions. Some weeks ago several rings were taken from the governor's mansion.

John G. Kerner of Kernersville, N. C., and one of the most prominent men in that section of the state, has been shot and probably fatally wounded by a young man named Claude Dickens. Mr. Kerner had gone to his mill plant for some purpose and found several young men drinking and carousing. He intervened when, it is alleged, Dickens became insulted, ran into his house, and, picking up a shotgun, emptied the entire load into Mr. Kerner's arm and side at a

range of 20 to 30 feet. When L. I. Waxelbaum returned to his home in Macon, Ga., after an absence of four or five days, he found that his home had been converted into a hotel for burglars. The unbidden guests had evidently been making the most of their sojourn and had taken their time in ransacking the house for valuables. They had taken a mattress from one of the beds and placing it on the floor had apparently rested from their labors long enough to play a few games of cards and consume a goodly portion of Mr. Waxelbaum's supply of "nigh-beer."

General.

Half a million people struggled to enter Congress hall in London to gaze and eight other persons were injured, on the dead features of Gen. William one probably fatally, by lightning, her, and you have your sow left in fresh air in proportion to its size as Booth. There was no disorder. old, the feeble or the children.

Four members of the family of Jefferson Ruhlo, a road worker, were killed by lightning, which struck the tent they were living in near Desota, Mo. Ruhlo, his wife, a 16-year-old daughter and a baby girl were instantly killed. A grown son escaped death, but was stunned and severely burned.

The foreclosure of the mortgage on a Montana home was prevented and the savings of a lifetime were restored to Mrs. Katherine McDonald of Butte, when congress passed the Shoshone irrigation claim bill. Mrs. Mc-Donald will receive \$11,000 of the \$42.-000 carried in the bill for the relief of about 400 claimants who lost heavily by the failure of a contracting firm, which was erecting the Wyoming ir-

ration of war against Turkey.

is heart-broken.

Approximately six thousand women paraded the streets of Columbus, Ohio, advocating votes for women. Most of them trudged briskly over the long line of march under the hot sun, while others in automobiles, gaily

decorated with emblems of equal suffrage, followed in a long procession. The parade was the most spectacular event of the Columbum centennial. When the procession terminated, it at once disintegrated into a hundred or more crowds addressed by women on soap boxes.

Hugh S. Gibson, the charge d'affaires of the American legation at Ha vana, Cuba, while entering a hotel in Havana, was assaulted by a Cuban newspaper reporter. Mr. Gibson was not seriously injured. His assailant was arrested, and the Cuban secretary of state personally expressed his to the north, or alfalfa to the westregret to the charge d'affaires at the occurrence. Mr. Gibson was just entering the hotel at which he habitually dines when the man, without any warning, sprang upon him from be-

hind and knocked him down. John D. Rockefeller, Jr., in a statement regarding labor troubles on his father's estate at Tarrytown, made it known that private detectives had been called to delve into the situation. A detective, with a large force of dep uties, has been guarding Mr. Rockefeller's 1,000-acre place for several weeks. About 200 men are employed on the estate, nearly all foreigners. Mr. Rockefeller discredited reports that it was a black-hand warfare.

Corporal Cedric M. Long of the Fifth regiment of Massachusetts, is the champion military rifleman of the United States. He attained this honor at the annual rifle tournament at Seagirt, N. J., after two days of shooting, during which he surpassed the efforts of more than 100 other competitors, including all the crack shots in the military service of the United States, regular and National Guard. He scored 235 points against 231 for his nearest rival.

Washington.

Repairmen examining the futniture of the house discovered that Speaker Clark during the last nine months had used his gavel with such effect that virtually the entire top of the desk was wrecked. One entire section had been pounded away, leaving a large hole, concealed by the green felt that covers the desk. The speaker throughout the session made vigorous use of the gavel on all occasions. No speaker since Thomas B. Reed has employed the mallet with such freedom.

lowpeas Almost as Good as Clover for Heg Pasture.

orage Plant Well Adapted to Needs of South and Among Best Crops for Grazing and Solling-Source of Profit.

Hog raisers should grow cowpeas for hogs are fond of them, and they are almost as good, if not fully as good, as red clover or alfalfa. In fact the cowpea has been described as being to the south what red clover is a forage plant well adapted to the needs of the region—and esteemed among the best crops for grazing and

By judicious selection of varieties, fields ready for use can be had from midsummer until cold weather, and a good part of what is needed for this purpose can be grown as a catch crop without interfering with the regular crops grown on the same ground. This is especially so when they are grown between corn rows, being planted when the corn is laid by and grazed after the corn is gathered. Probably about half of the cowpeas grown in the south are grown and grazed in this way, and are regarded as providing the best possible pasture for hogs. They just can't be beat, and more of them should be raised for the

bacon and lard makers. When cowpeas are pastured by hogs the droppings return nearly all the fertilizing elements of the crop to the soil and benefit the field nearly as much as though the entire crop were plowed under as a green manure. The meat produced is clear feed for a month or six weeks, and by arranging a succession of fields good pasture may be provided during up to five months with big strong several months. More actual feed is frames, can be rounded up quickly for produced with less waste per acre market with a ration consisting largewhen the vines are cut or pulled for ly of corn. soiling, for which cowpeas are a Mississippi experiment station says and shows courage and masculinity. One-Crop System Fails to Bring Permanent Prosperity.

Not Enough Attention Given to System of Rotation by Average Farmer-Raise More Live Stock to Increase Profit.

That a one-crop system has failed to bring permanent prosperity to any However, much has been gained by devoting certain limited areas to a onecrop production. We believe the above fact to be true and that enough attention is not given by the average farmer to a system of rotation which is adapted to the soil and climatic conditions with which he must deal, says the Gem State Rural Journal. The fact that one locality will produce fruit successfully has led men to squander their means in attempting to grow commercial orchards where only failure can possibly be the reward. A crop rotation should contain only

such plants and products as are adapt-

ed to the soil and climatic conditions, and have a commercial value either directly or indirectly. However, it is With this method I have no trouble chairs, and they are now unable to not enough to know that a crop will in getting six to eight thousand quarts get supplies quickly enough. It has grow well and produce abundantly. This is the chief difficulty now where there is a superabundance of alfalfa produced with not enough foresight Mr. Jerolaman always puts a pint of them. given to the disposition of the crop after it is grown and made into hay. Too many trust to an uncertain market for the raw product, and give too little attention to the conversion of the raw material into the finished article. Every rational system of diversified farming must embrace the growing of animals and the manufacture of animal products either on the farm or in the large central plants. To grow more animals successfully a wider In response to a query as to a on a ledge or projection from the range of farm crops is necessary. simple smoke house for family use walls on each side. Worth of a Hen.

France classes the worth of a hen more for the production of meat and eggs than she does for the fine feathers or standard looks. Some years ago the poultrymen aimed for show records, and while they no doubt gained their point, they at the same time ruined the stamina and thrift of the hen for commercial purposes. Today it is different. Utility has taken a front seat and all breeds are bred up to conform with the ideas of the market poultryman.

Pure Bred Cows.

Cows that give 250 pounds of butterfat, or 8,000 pounds of three per cent. milk, are not accidentally bred or purchased of cow merchants with their Mutton sheep should never be of variegated assortment. They must be mixed breeds on one farm. Get one bred from cows with high record milk good mutton breed, stick to it and deancestry behind them and sires from velop the highest notch possible. It is line from one breed, as the hen fan-However, sowing some legume crop those of one breed, uniform in size, in early summer after harvesting a shape and condition that get the big fluence or family of that breed.

DIVERSIFY IN FARMING SET PLANTS IN MIDSUMMER

Henry Jerolaman, Strawberry King, Tells of Methods Employed to Get 8,000 Quarts to Acre.

In the famous strawberry section about Hilton, N. J., many growers set out new beds the last of July or early August, says the Agriculturist. Beds thus set are fruited the following

Immediately after the crop is harvested, which usually ends about the first week in July, the strawberry mulch is raked off and the soil worked with a hoe or rake. Runners for new plants are put out and layered in the usual way. As soon as they are large enough they are set out in the new beds.

The strawberry king, Henry Jerolaman, says: "The strawberry is a vigorous feeder, and should have plenty of plant food when it needs it most. use well-rotted horse and cow manure mixed. Spade or plow it under and work the soil until it is well distributed.

"After the plants are started put some fine, well-rotted manure or com- off, and this has led to the opening of post around each plant. This may seem troublesome, but it pays. It not only fertilizes the plant, but protects it during the winter. My rows are Several progressive business men of two feet ten inches apart, and the Singapore, anticipating this, imported plants are every 15 inches in the row. a large number of American barber an acre."

If the plants are set during a hot. dry spell, they should be watered. and refuse all other makes offered rain water to each plant. After dropping the roots in the hole made with the hand, the water is poured in, and the dirt drawn around the plant. Each Oriental trade: plant should be shaded in hot weather during the middle of the day after it is set, at least two days. Strawberry baskets are turned upside down over each plant. If plants are very large, old peach baskets or anything of that sort can be used.

OPERATION OF A GAS ENGINE

Plan and Illustration for Stopping Pump When Tank Is Full-Simple and Inexpensive.

J. W. Moeller sends the Iowa Home stead an illustration and plan for stopping a jump spark gas engine pumping water when the tank is full. Take some insulated copper wire,

Jump Spark Gas Engine.

which does not cost much, attach one end of wire to spark plug, then run wire up to ceiling where it is out of the way. Fasten with some staples and then run end of wire down to top of tank. When tank is full the water will touch end of wire and short circuit the current which stops the engine. By this plan the engine may be started and left for an indefinite length of time, for when the tank is full the engine will stop.

Feed for Lambs.

Tobacco stems chopped fine or tobacco sweepings mixed with salt are good to feed young lambs, particularly if they are affected with worms.

Every time one out-crosses, the re-

sult is to introduce a yet greater num-

ber of unlike qualities, and these
