### Sour Stomach.

This is a mild form of indigestion. It is usually brought on by eating too rapidly or too much, or a food not suited to your digestive organs. If you will eat slowly, masticate your food thoroughly, eat but little meat and none at all for supper, you will more than likely avoid sour stomach without taking any medicine whatever. When you have sour stomach take one of Chamberlain's Tablets to aid digestion.

June 13.—The Faith Granite Company has just been awarded the contract for all the granite that goes in the new Methodist church to be erected at Spencer. They have the contract and are furnishing the granite now that is going in the new Methodist church that is now being built in Salisbury. The Spencer people saw this beautiful granite and were so well pleased with it that they at once decided to use the same granite in their church. This granite is of the very finest to be found in North Carolina. It would be cheaper to build a church now of solid granite than to build it of brick or wood. Since the granite is nearby and such a church stands for all time, and remain nice and white as this granite never changes. The time will soon come when all the churches will be built of granite.
