KANSAS CITY, Feb. 19.—A new industry and a thriving one is mining timber from the banks of the Missouri river. Several men who have engaged in the work say it is very profitable.

With each spaing flood the Missouri ri uproots hundred of cottonwood trees and after carrying them along for ten or twenty miles leaves them on the banks half buried in the sand and mud.

Perhaps a year or two later another flood will washout these trees and rivermen quickly fish them out and haul them to the mills. Frequently it pays to go to the trouble of excavating a buried tree.

The lumber cut from the logs is seasoned and finds a ready sale of a higher price than ordinary green timber. Occasionally the men will find a walnut tree worth as much as \$40.
