A LAW TO MAKE JUDGES WORK.

Amend the proposition to increase the number of judicial districts and Superior Court judges, to provide more court facilities, Senator Elliot, of Catawba, has introduced the following in the Legislature:

"The General Assembly of North Carolina to enact: Section 1. That section 1506 of the Revisal of 1905 be amended by inserting in the second line of said section, after the period in said line, and before the word 'the,' the following sentence:

"Each judge shall remain at the county seat during the full term for which the court may be prescribed to be opened and held as set out hereinafter in this section, unless he shall be called away either by his own sickness, or the sickness of some member of his family, the fact of which sickness shall be authenticated by a written certificate to that effect made by the judge, which certificate shall be certified to by some practicing physician, which said certificate shall be filed in the office of the Attorney General, who shall print in his report a table of all such certificates, showing in detail the names of the counties in which the courts were held, number omitted, name of such judge excused and the names of the physicians authenticating such certificates."

"Sec. 2. This act shall be in force on and after its ratification." The object of this bill, as is manifest, is to make it difficult for a judge to shirk his duty, should such be desired. Those who are favorable to this measure assert that the practice of curtailing terms of courts is on the increase in some districts of the State and that this is in a measure responsible for the congested dockets in some counties.

New Wrinkle in Blockading.

There are no people on earth who are up to more tricks than the average blockader, and while their methods as a whole, are old, they now and then introduce new wrinkles in the business. The latest perhaps is what was told a Breeze man by a man who resides in that section of the county where most of the moonshine is made. He claims that each operator has two stills, an old one and a new one and that their code of signals is so perfect that a revenue officer cannot approach without the knowledge of the man who operates the still. When the alarm of danger is sounded the operator quickly removes the new still and substitutes the old one which bears the scars of many revenue raids and it is this worthless affair that the officers cut instead of the one that does the work. When the officers depart the new still goes back into the furnace and the business is promptly resumed.

Don't Take the Risk.

When you have a bad cough or cold do not let it drag along until it becomes chronic bronchitis, or develops into an attack of pneumonia, but give it the attention it deserves and get rid of it. Take Chamberlain's Cough Remedy and you are sure of prompt relief. From a small beginning the sale and use of this preparation has extended to all parts of the United States and to many foreign countries. Its many remarkable cures of coughs and colds have won for it this wide reputation and extensive use. For sale by all Druggists.

Beck (despondent)—I said something my wife don't like and she hasn't spoken to me for two days. Peck (eagerly)—Can you remember what it was you said?

S.S.S. FOR BAD BLOOD

The most important part of the human system is the blood. Every muscle, nerve, tissue, bone and sinew is dependent on this vital fluid for nourishment and strength necessary to maintain them in health and enable each to perform the different duties nature requires. Even the heart, the very "engine" of life, receives its vigor and motive power from the blood. Since so much is dependent on this vital fluid it can very readily be seen how necessary it is to have it pure and uncontaminated if we would enjoy the blessing of good health. Bad blood is responsible for most of the ailments of mankind; when from any cause it becomes infected with impurities, humors or poisons, disease in some form is sure to follow. Muddy, sallow complexion, eruptions, pimples, etc., show that the blood is infected with unhealthy humors which have changed it from a pure, fresh stream to a sour, acid fluid, which forces out its impurities through the pores and glands of the skin. A very common evidence of bad blood is sores or ulcers, which break out on the flesh, often from a very insignificant bruise or even scratch or abrasion. If the blood was pure and healthy the place would heal at once, but being loaded with impurities, which are discharged into the wound, it irritates and inflammation is set up and the sore continues. Bad blood is also responsible for Anemia, Boils, Malaria, etc.; the weak, polluted circulation cannot furnish the nourishment and strength required to sustain the body, and a general run-down condition of health results. S. S. S. is nature's blood purifier and tonic; made entirely of healing, cleansing roots and herbs. It goes down into the circulation and removes every particle of impurity, humor or poison that may be there, restores lost vitality, and steadily tones up the entire system. It adds to the blood the healthful properties it is in need of, and in every way assists in the cure of disease. S. S. S. neutralizes any excess of acid in the blood, making it fresh and pure, and permanently cures Eczema, Acne, Tetar, and all other skin diseases and eruptions. S. S. S. cures Rheumatism, Catarrh, Sores and Ulcers, Malaria, and all other diseases or disorders arising from bad blood. Book on the blood and any medical advice desired free to all who write.

WM. F. VANDYKE, 815 Fifth Street, Beaver Falls, Penn.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

THE WEALTH OF TRINITY.

Asheville Gazette-News.

Trinity Corporation of New York has issued a detailed financial statement; the first, it is said, ever issued by this vastly wealthy and unique church organization. The statement may or may not have been brought forth by the growing criticism of the secretive methods of the corporation—which is the self-perpetuating body governing the parish of Trinity church and its possessions. Among other things owned by the rich church is a lot of tenement property, and the undesirable and antiquated condition of this property is also the subject of much criticism. The possessions of the corporation are reported to be worth above \$14,000,000, although the value is probably a good deal in excess of that. The receipts for the year amounted, in round figures, to \$780,000, and about the same amount was expended. The corporation maintains 10 churches and 16 schools, and 28 clergymen are on the regular staff, at salaries averaging about \$4,000 a year. Few rents amounted to \$18,000 and contributions aggregated \$95,000.

The people of many a poor, struggling congregation, who can with difficulty—or at least not without effort and self-sacrifice—feed and clothe their minister and his family, pay their part toward their church organization, and help in taking care of the community's poor, would wonder how it feels to worship under such easy conditions. But if the greater sacrifice brings the greater blessing, the people of the poor parish, you might say, have a blessed advantage over the people of Trinity.

Dry Wave.

Salisbury Post.

The mighty dry wave continues to sweep over the South. Like the cyclonic disturbances over the great desert nothing stops its onward course. Prohibition sentiment has crystallized until it appears there is to be a complete revolution throughout the entire country in the handling of whiskey and spirituous fluids. North Carolina and Georgia have gotten on the water wagon. Tennessee is to be a follower, and Virginia it is believed will be dry within a year. Kentucky is agitating the question and concrete action is imminent. South Carolina, profiting by the many interminable disturbances, murders, arson and assassinations, this ironically, have forewarned against prohibition but just how long is not known. Florida now the only sure Mecca for dealers in stimulants, has a lease of four years, free of molestation. After that period it is possible the dry sentiment will have reached that clime.

In a Prohibition State.

"I wish a real circus, with a big tent, would come along," writes a Georgia youngster to the Atlanta Constitution, "so we children could get tickets and go to it. Dad's got one in his room, but Maw says it is a circus of animals that nobody but him can see."

"Last night we heard him hollerin' 'Ketch that elephant! Stop that tiger! Take that snake out!' An' we didn't see no elephant, or tiger, or snake."

"I think it's real mean for him to shut himself up an' have a circus all to himself, but that's just the way it is."

Many an advertisement has paid a profit after being considered a loss.

THE MINE DISASTER IN WEST VIRGINIA.

Baltimore Sun.

Within a period of fifteen days there have been two explosions at the Lick Branch coal mine, in West Virginia. The cause of the second disaster has not been definitely determined, but it is suggested that the explosion last Tuesday may have been due to the ignorance and negligence of a foreign miner, who carried an open lamp into the mine. In the United States disasters have occurred in the last few months in mines at which, it was understood, every precaution had been taken to assure immunity from explosions due to preventable causes. A "model mine" in Pennsylvania, which European experts of long experience and wide observation had pronounced as safe as mines can be made by modern appliances, was the scene of a terrible catastrophe. In Great Britain, where the mining industry is under thorough inspection, there are disasters from time to time, although they do not occur as frequently as in the past, when precautions to insure safety were not as systematic and scientific as at present. Against ignorance and recklessness on the part of mine employees the most up-to-date safety appliances cannot prevail. The only thing to do in such cases is to exercise the strictest surveillance over all persons entering the mines. Eternal vigilance is the price of safety from disasters caused by ignorant mine employees. The effort should also be made to broaden the intelligence of the class of employees to whose lack of knowledge and consequent recklessness many mine catastrophes are attributed.

Carmichael Called Insane.

The brain of Rev. John H. Carmichael, who killed Gideon Browning in the Rattle Run, Church and committed suicide at Carthage, Ill., was examined by four physicians at Detroit Saturday. At the conclusion of the autopsy the physicians stated that they had found unmistakable evidence of insanity.

"We find that Carmichael had been a sufferer from acute mania," said the physicians. "The blood vessels of the brain were all congested. There was an adhesion of the coverings of the brain to the cranium, which showed anemia of the right side of the brain, and we found granulations of the superior-posterior surface cerebri. It is evident that Carmichael had suffered several attacks of acute inflammation of the brain."

The doctors agreed that the marks found upon the body, which had given rise to the report that the dead minister had been addicted to the use of a hypodermic syringe for administering drugs, had all been made after the minister's death.

The Pure Food Law.

Secretary Wilson says: "One of the objects of the law is to inform the consumer of the presence of certain harmful drugs in medicines." The law requires that the amount of chloroform, opium, morphine, and other habit-forming drugs be stated on the label of each bottle. The manufacturers of Chamberlain's Cough Remedy have always claimed that their remedy did not contain any of these drugs, and the truth of this claim is now fully proven, as no mention of them is made on the label. This remedy is not only one of the safest, but one of the best in use for coughs and colds. Its value has been proven beyond question during the many years it has been in general use. For sale by all Druggists.

Overman's Cotton Explanation Amendment.

Senator Overman has had incorporated in the legislative appropriation bill his amendment appropriating fifty thousand dollars for the exposition of the American cotton goods trade in the markets of the world. As the result of this appropriation, David Clark, of Raleigh, and other special agents of the Bureau of Manufacturers have been enabled to visit the markets of the world for the purpose of studying textile conditions. Two years ago this appropriation was bitterly assailed in the House but so gratifying have been the result from its expenditure that there is little prospect of opposition to it in Congress this year.

An announcement that is of considerable importance to the college world was made by Dr. J. H. Clewell, president of Salem Academy and College, in the college chapel yesterday morning. The announcement was that by mutual understanding the two sororities now existing in the college would go out of existence at the close of the college year. This action was the result of a request by the board of trustees, voluntarily granted by the members of the sororities. The request was made on the grounds that the ideas underlying the sororities were not in accord with the underlying principles of the school.

AFTER MANY YEARS.

The body of a guide, perfectly preserved, has been yielded up by one of the Swiss glaciers after a period of twenty-one years. His body was lately recovered, and his appearance was unchanged by its long imprisonment in the ice. There have been other cases of the bringing back of a long-lost body held for years in the close embrace of the ice, some of them are mentioned in Mrs. Le Blond's "True Tales of Mountain Adventure."

One of the first instances on record is that of the Hamel accident, which took place in 1820. Several guides were swept down by an avalanche and hurled into a crevasse. Hamel prophesied that the glacier would yield them up again in the course of one thousand years, but Doctor Forbes believed that the end of the glacier would be reached by the bodies in forty years. This statement was considered bold, but its accuracy was borne out by the event. In forty years the flow of ice brought the bodies to light.

In 1866 Henry Arkwright was lost in a glacier. In just thirty-one years his brother received a telegram from the mayor of Chamouilly that the body was found. Every article of clothing was intact. His name and regiment could be read clearly on his handkerchief, and his gold pencil case opened and shut as easily as when he last used it, three decades before.

Nervous Disorders and Insanity Due to Bad Teeth.

Cleveland, O., Dispatch.

In trying to prove his theory that original instincts as well as many nervous disorders and even insanity are caused in numerous instances by defective teeth, Dr. Henry Upson, a Cleveland neurologist, has already produced marked beneficial effects on patients at the Newberg Insane Asylum, it is said, by simple dental operations.

Arrangements have been made by which Dr. Upson will this week make experiments on persons at the Cleveland work-house. An X-ray machine is used to determine whether the teeth or their roots are defective. This test also develops any pressure of the roots on the various nerves leading from the mouth to the brain.

Dr. Upson bases his belief on the theory that insanity and crime are correlate.

Says Rockefeller Will Live to 100.

Dr. H. Biggar, physician and close friend of John D. Rockefeller, denies the report that the oil magnate is suffering from rheumatism. He said Mr. Rockefeller is enjoying perfect health.

"He will live to be 100 years old," says Dr. Biggar. "By these simple rules: First, he avoids all worry; second, he takes plenty of exercise in the open air; third, he never overloads his stomach and always gets up from the table a little hungry. If men would follow Mr. Rockefeller's physical methods, we would all be young at 70."

Fit Subject for the Reformatory.

Now that the reformatory for youthful criminals at Concord is ready for occupancy, immediate steps will be taken to get little Bynum Holsclaw there, a boy in knee pants who has served several months in Boone jail for stealing. In fact until the new jailer came in, he was still plying his trade in prison by ordering post cards, pictures, etc., by mail and then selling them at any old price, and never remitting one cent to those furnishing the articles. The reformatory, we hope, will do much for the boy.

The Heirless—And haven't you any financial prospects, George, dear?

George—Why, yes, I'm figuring on a sure thing that ought to net me a half million at least.

The Heirless—What 's the sure thing, George, dear?

George—You.

Plant Wood's Seeds For The Garden & Farm.

Wood's Descriptive Catalog the most useful and valuable of the Garden and Farm Seed Catalogs mailed free on request. T. W. WOOD & SONS, Seedsmen, - Richmond, Va.

WENT TO JAIL WITH HUSBAND.

Salisbury Landmark.

Last Friday night John Glantz, son of Henry Glantz, who had just married Pearl Julian, decided it was necessary for him to provide a home for his new bride. Having secured apartments he forthwith proceeded to the home of David Benfield and took therefrom a bed and bedding, a chair, gun, stove and such other household and kitchen furniture as he considered necessary. Mr. Benfield, after discovering his loss, found his property at the home of Glantz, and had the latter arrested, and placed in jail at Taylorsville Saturday. The bride was not involved, but she having pledged herself to cling to him in adversity as well as in prosperity, refused to be separated from her recently acquired John, and holding to him with the tenacity of the Gordian Knot, she accompanied him to prison, entered his fateful doors and shared the solitude by his side. This unfortunate pair were taken to Caldwell county Wednesday, 13th, for a preliminary hearing, the robbery having occurred just across the Alexander line.

Not for Him.

A quiet retiring citizen occupied a seat near the door of a crowded car when a masterful stout woman entered.

Having no newspaper behind which to hide he was fixed and subjected by her glittering eye. He rose and offered his place to her. Seating herself—without thanking him—she exclaimed in tones that reached to the farthest end of the car:

"What do you want to stand up there for? Come here and sit on my lap."

"Madam," gasped the man, as his face became scarlet, "I beg your pardon, I—"

"What do you mean?" shrieked the woman. "You know very well I was speaking to my niece there behind you."

The Democrats of the Indiana Legislature have nominated ex-Congressman B. F. Shively for United States Senator and he will be elected, the Democrats having a majority in the Legislature. Mr. John Worth Kern, late Democratic candidate for Vice President, and others were candidates.

"How does your grandmother get along now that she has lost all her teeth?"

"Oh, all right. You know she has a biting tongue!"

Itch cured in 30 minutes by Woolford's Scurfay Lotion. Never fails. Sold by M. L. Marsh, Druggist.

Cannon & Fetzer Co.

GOV. KITCHIN'S ADDRESS.

Salisbury Landmark.

Gov. Kitchin's inaugural address has been well received. It is conservative in tone and speaks the business interests fair. He favors a State primary law to curtail the expenses of pre-election contests; strict enforcement of the prohibition law; the lowering of our educational and charitable institutions and the encouragement of education; improvement in factory conditions so as to make the life of the mill worker more agreeable; proper but not unreasonable restriction of child labor; the Attorney General to give strict attention to corporations and keep them within the law; an effort to abolish the present unreasonable discrimination in inter-State railroad freight rates; the building of good roads, the guarantee of State bank deposits and economy in public expenditure. There will be little if any dissent from the Governor's views except on the primary and nearly all agree that something is necessary in this line—and the guarantee of State bank deposits. There is much opposition to the latter.

She Didn't Sleep Well.

A woman who lives in an inland town, while going to a convention in a distant city spent one night of the journey on board a steamboat. It was the first time she had ever traveled by water. She reached her journey's end extremely fatigued. To a friend who remarked it she replied:

"Yes, I'm tired to death. I don't know as I care to travel by water again. I read the card in my state-room about how to put the life-preserver on, and I thought I understood it, but I guess I didn't. Somehow, I couldn't go to sleep with the thing on."

Charlie—There was a splendid trick done last evening. I saw a man actually turn a handkerchief into an egg.

Billy—That's nothing. I saw a man only about a week or two ago turn a cow into a field.

Nursing Mothers and Over-burdened Wome

In all stations of life, where vigor and vitality may have been undiminished and broken down by over-work, exacting social duties, the too frequent bearing of children, or other causes, will find in Dr. Pierce's Favorite Remedy the most potent, invigorating restorative strength-giver ever devised for their special benefit. Nursing mothers will find it especially valuable in sustaining their strength and promoting an abundant nourishment for the child. Expectant mothers too will find it a priceless safeguard of the system for baby's coming and reducing the ordeal comparatively painless. It can be had at any drug store, or sent by mail to the following address:

Delicate, nervous women, who suffer from frequent headaches, backache, dragging-down distress low down in the abdomen, or from painful or irregular periods, or from nervousness, or from floating spots, or from dizziness, or from faint spells, or from imaginary or actual floating spots, or from nervousness, or from pelvic catarrh, or from prostrata, or from vertigo or retroversion of the uterus, or from any of the many ailments of women, will find in Dr. Pierce's Favorite Remedy the most advanced medical science of the day. It is a scientific practice for the cure of woman's peculiar weaknesses and ailments.

If you want to know more about the composition and professional endorsement of the "Favorite Remedy," send postal card requests to Dr. R. D. Pierce, Buffalo, N. Y., for his free booklet treating of same.

You can afford to accept as a substitute for this remedy of known composition a secret mixture of unknown composition. Don't do it.
