1923. GREETING.—The Lord bless thee and keep thee. The Lord make his face shine upon thee, and be gracious unto thee.

TO THE PEOPLE OF CABARRUS COUNTY.

I leave tonight for Raleigh to act as your representative in the Lower House of the General Assembly which meets Wednesday. I want you to understand that I am your representative, and that it will be my purpose to assist in the enactment of only such legislation as will be to the best interests of the people.

J. B. SHERRILL, January 1, 1923.

THE COLD DEADLY.

A physician in a Southern city very recently had much to say of the common cold, and his advice on this subject is so fine, we think, that we are repeating it.

"This is the third case like this I've had today," the physician is quoted in The Greenville News, as saying, as he surveyed the child with the high temperature and the rash which gives the name to scarlet fever.

"If mothers would just keep home from school the children who seem to be coming down with colds, all these epidemics would be avoided. Measles, with its danger of leaving pneumonia or tuberculosis behind it, begins with a little, sniffly cold. Scarlet fever begins with a cold, influenza, whooping cough, bronchitis—half a dozen serious and contagious ailments begin this way.

"The most skillful physician cannot diagnose these diseases at the start, much less a mother with little experience. If mothers could just learn to isolate the child with the cold for about three days, education would be less dangerous. As it is, I hate to see children started out to kindergarten or the lower grades. They contract colds easily, none of them know how to use handkerchiefs properly and the schools are merely hotbeds for disease."

Each one of us can do our part to correct this situation, which exists in every community. It is foolish to take chances. The common cold is not treated with enough respect. It is a dangerous disease and should be treated as such. When we allow the little folks to go to school when they have a cold we are endangering their lives and the lives of their associates, all of whom are too small to think for themselves.

STARTED SOMETHING.

Senator Borah has certainly started something. His resolution requesting the President to call an economic and disarmament conference in Washington received the disapproval of President Harding, but at the same time it brought to light the fact that Mr. Harding already has under advisement a plan to help Europe.

Mr. Mr. Borah's resolution brought out another interesting fact, which shows the inconsistency of the Republicans.

When President Wilson went to Paris and helped negotiate the League of Nations pact and the Versailles treaty, Senator Lodge argued that he had no right to do so. He said that such power was vested only in the Senate. And now we find the same Senator pleading with the Senate to let President Harding continue with negotiations he has underway to bring about some sort of reparations or armament pact with Europe.

Mr. Harding has not told the Senate or anyone else what plans he is making. He is not leaving the work to the Senate, as Mr. Lodge suggested when Mr. Wilson sought to bring about peace.

It makes a lot of difference whose bull is being gored. A SPLENDID RECORD. The campaign in Cabarrus County this year for the sale of Christmas seals was a great success. The committee in charge of the sale of the seals reports that \$1,200 worth were sold in the county, this total being much larger than for any other other year.

We should all take a just pride in this record. It is not the largest in the State, to be sure, but we believe it will compare favorably with any other when population is considered, and the increase in the total number of seals sold probably will make a record for this county.

To Mrs. Ernest Hicks, chairman of the sales committee, most credit is due, but others deserving special mention are those who canvassed the city and county. To Miss Elizabeth Coltrane, who sold the greatest number of seals bonds, also is due much credit.

The sale of \$1,200 worth of seals in Cabarrus County means that the Tuberculosis Society of the county has \$900 with which to help needy cases during the next year. This sum is the largest the Society has ever had, and it will mean much to deserving people of the county who need treatment and who cannot afford to pay for it themselves. The Society is familiar with the needs of the county, and we are sure the money will be spent where it can do the greatest good. Everyone has a right to feel proud of this record, and we congratulate everyone who made the fine, total possible.

REAL PROSPERITY.

A bank asks and answers these pertinent questions: Why keep an intelligent record of expenditures? To show not only how much money you have spent, but what you have received for your money.

had not erected cottages, thus assuring room for 30 boys at all times. The counties in eastern North Carolina will find the cottage plan the most practical one, we think, certainly with the State making no larger appropriation than is made now.

We say again, give the boys everything possible, but give it a manner to bring about the best and biggest results. And we also repeat that North Carolina needs no home for the boys in the east when it cannot properly care for the home already established in the west.

A bank asks and answers these pertinent questions: Why keep an intelligent record of expenditures? To show not only how much money you have spent, but what you have received for your money.

1. To show not only how much money you have spent, but what you have received for your money. 2. To show leaks and unwise expenditures.

3. To enable you to keep your expenditures within the limits set in your budget. 4. To have a basis for making any adjustments necessitated by increase in prices or other unlooked-for expenses.

5. To use in making your budget for next year. Why make a budget? 1. To have a plan for saving, spending and giving.

2. To keep before you the standard you have set so you will not be unwisely influenced by your neighbors, bargain counters or window displays. 3. To provide accumulated funds for large expenses.

4. To know what you can afford for each class of expenses so that you can enjoy spending up to the limit you have set. 5. To insure getting the most out of your income.

This reasoning does not hint that window displays are no good, nor that your neighbors will always try to sell you something that is not worth while. It means that the fellow who knows what he has and keeps within his allowance will have enough money next year to buy the things he sees in the window, without the guilty knowledge that he is spending recklessly. The man who keeps the budget and knows that he is not going in too deep is the man who knows real prosperity.

IMPROVE WHAT WE HAVE FIRST. A member of the General Assembly who lives in Eastern North Carolina declares that he favors the erection of another State home for boys, to be erected somewhere east of Raleigh.

We want to see the unfortunate boys get every possible chance, but we think it would be unwise for the State to erect another training school for boys when it does not give its present school, The Stonewall Jackson Training School, all the help it deserves. The appropriation given the School each year would keep it in operation but it would not allow for any increases, and the number of students is increasing monthly.

The gentleman from eastern Carolina says the counties there need a home for the boys. All right. Send them to the school here. It would be cheaper and just as satisfactory for the State to enlarge the Jackson Training School to provide room for these boys as it would for another school to be erected. The present school could not accommodate half of the present students if various counties in the State

had not erected cottages, thus assuring room for 30 boys at all times. The counties in eastern North Carolina will find the cottage plan the most practical one, we think, certainly with the State making no larger appropriation than is made now.
