RAILROAD SCHEDULE In Effect December 3, 1922.

Table with 3 columns: Direction, Station, Time. Includes Northbound and Southbound routes.

TIME OF CLOSING OF MAIIS.

The time of the closing of mails at the Concord postoffice is as follows:

Table with 2 columns: Train No., Time. Lists various train schedules.

Bible Thought For The Day

A NATION'S GREATNESS: Righteousness exalteth a nation; but sin is a reproach to any people.—Proverbs 14:34.

TAXES AND WAR.

When one reads of the millions that Uncle Sam collects each year in income taxes, he is inclined to ask what happens to all of the money.

For the army and navy, 17 cents. For pensions, the veterans bureau, etc., 25 cents.

For the president, congress, the courts, executive departments, research, education, public works and all other civil activities, 15 cents.

These are the cold figures and as the News says, show that "85 cents of the taxpayers' dollar goes to pay for war, most of it for wars already fought."

FOR FOREST PROTECTION.

The disastrous forest fires which have been raging in several counties in this State within the past several days serve to bring close home the great need of better forest protection throughout the United States.

"Nearly every landowner can look back and remember when there was good timber on his property. In most cases, his timber is now gone, but the land owner has the idea that somewhere else there is plenty of wood and no cause for worry."

ble every day in the year. We are too careless with our forests, and if we do not take greater care in preserving them we will pay dearly some day for our folly.

PUBLIC OPINION GOT ACTION.

The director of the dry agents in South Carolina refused to suspend or publicly censure the agents working under him who fired on two young ladies from Asheville.

We hope the suspension will be a lesson not only to the officers in South Carolina but to officers everywhere. The dry agents have a hard job, to be sure. They have to do many things that the average citizen would hesitate to do, but that doesn't give them a right to stop everyone they meet on the road and to shoot at every auto that doesn't stop when they command it to stop.

Public opinion was incensed at the action of these officers, and when it is aroused it always gets action. Commissioner Haynes saw at a glance that the people of South Carolina were properly disgusted at the action of the dry agents, and he acted in an effort to satisfy the public.

COTTON SPINNING INCREASING.

According to figures just made public by the Census Bureau, cotton spinning set a new record in March, reaching more than nine and one-half billion active spindle hours.

TO DECORATE GRAVES OF WAR DEAD.

The American Legion is to undertake the raising of \$100,000 to provide for the decoration of graves of our dead overseas on each Memorial Day.

This delicate and kindly thought of the American Legion in assuming the responsibility for the appropriate decoration of the graves of the American soldiers in France has received the universal and grateful approval of the families, relatives and friends of its dead comrades.

WHAT WILL BE DONE WITH THEM?

Automobile production in March increased and was the highest on record, exceeding by 64,006 cars and trucks the highest production of last June.

What is to become of all these autos? The streets in all cities are so congested that traffic is a serious and dangerous problem. There are plenty of waste places to be sure, but they don't help much for a majority of the cars are purchased by city people for use in cities.

cities persons find it almost impossible to cross the streets in the more congested districts, and this situation is with us in spite of the fact that most modern parking laws are in effect everywhere.

THIRSTY AMERICANS.

The people of the United States are pouring out fortunes each year for soft drinks. Consumers of mineral and soda water boosted the value of products in that field from \$58,400,000 in 1914 to \$115,577,000 in 1921.

This classification covers all kinds of carbonated and fruit beverages, root beer, ginger ale, and other so-called soft drinks, but does not include natural spring waters. In addition to the value of products shown for the classified industry, establishments under other classifications added to the figures by reporting the manufacture of carbonated and fruit beverages worth \$8,600,000 in 1914.

And yet there are people who say we are spending too much for our Churches and schools. We are not overburdened with necessities when we can spend such vast sums each year for drinks.

Eugene V. Debs, who was recently pardoned from a federal penitentiary by President Harding, comes forth now with the declaration that "Lenine is the greatest thing that has come out of the world war." Really, we should expect nothing else from Debs. He is a socialist and naturally should think Lenine is all right, but we do wonder why he doesn't go to Russia and try Lenine's system of running things.

AMNESIA VICTIM ON WAY TO BALTIMORE

Walter G. Farnsworth Doesn't Know His Name Nor From Whence He Came. Charlotte, April 25.—Feeling positive that his name is Walter G. Farnsworth, but unable to yet say where he came from, the victim of amnesia, who arrived here last Friday from Florida, from which state he has made his way by traveling on trains and in automobiles following the accident near Plant City, Fla., and who has been cared for by Charlotte citizens, left this city tonight for Baltimore, Md., where he hopes some one will recognize him.

After Sheriff Talbert had visited the scene of the gruesome find last night, which was about 300 yards down the creek from where the stream passes under the Southern railway bridge near Lake, and had convinced himself it was a human body, a coroner's jury was impaneled. A letter and other articles found on the body indicate it was young Ratts and his father was notified. Both parents identified articles and clothing found on the boy here this afternoon.

Weather Conditions Better in Cotton Growing States.

Washington, April 25.—The weekly weather and crop review of the United States department of agriculture issued today contained the following report on cotton and other southern crops: "The first half of the week was too cool for best results in the eastern portion of the cotton belt, but much warmer weather prevailed during the latter part and there was less rainfall in most central and western cotton growing districts. In general, these conditions gave a rather marked improvement in the cotton growing states."

The week brought more favorable weather for field work in Texas and Louisiana, although the soil continued too wet in many localities, particularly in central and southeastern Texas. "Hopping was in progress in southern Texas and progress of the Corpus Christi and the progress of the crop was reported as generally fair, except in the wet areas. Planting made satisfactory progress in Oklahoma and excellent advance in Arkansas, extending to the northern portion of the latter state. Considerable cotton was planted in Mississippi, though mostly in soil too wet for best results, while planting was completed in some southern sections of Alabama."

CODES OF STANDARDS

Governing Business Relation Are Essential to Progress. Hot Springs, Ark., April 25.—Experience has shown written codes of standards governing business relations to be essential to the progress and development of every trade and profession.

AGRICULTURAL COLUMN

Hot Springs, Ark., April 25.—Experience has shown written codes of standards governing business relations to be essential to the progress and development of every trade and profession.

Where a first class legume hay is needed two bushels should be drilled in with a grain drill as this amount of seed will choke down the weeds and also prevent the beans growing so close together that the amount of seed and some fertilizer on good land one should get two tons of hay per acre after small grain. One of the most particular things in the growing of soy beans is the buying of new seed and then planting them from one to two inches deep and not over this depth, and then the soil should have enough moisture for them to come up before getting a heavy rain.

Cow peas are more easily grown than beans but will not make as large a yield or as rich hay. If cow peas are planted in corn at the first working or when the corn is planted they will make enough growth to shade the ground and being heavy feeders of moisture will reduce the yield of corn.

In regard to the Mung Beans they are a very promising crop, being a distant cousin to the cow pea and no insect has been found to destroy them to the present. The seed are rather high seed, being about 300 per gallon, but this amount will plant an acre in rows as the seed are about the size of oak seed. This plant has the habit of bearing its seed on a stem like the pea but instead of one pod there are six, making the harvesting of seed on the average farm more easy. They are especially fine to plant around the house for the poultry to harvest the seed in the Fall and where this has been practiced an abundance of eggs has been produced, the same as where the cow peas are used.

The Soy bean will make the most pounds of good hay per acre and the Mung bean will make about the same amount as the Cow pea. Negros Fishing in Rich Fork Creek, Davidson County, Locate the Remains. Lexington, April 24.—Three negroes fishing late yesterday on the banks of Rich Fork Creek, seven miles east of here, saw something caught in some driftwood resembling a human body, which today proved to be the remains of Roscoe Ratts, 16-year-old son of Mr. and Mrs. Walter Ratts, of Spencer. After Sheriff Talbert had visited the scene of the gruesome find last night, which was about 300 yards down the creek from where the stream passes under the Southern railway bridge near Lake, and had convinced himself it was a human body, a coroner's jury was impaneled. A letter and other articles found on the body indicate it was young Ratts and his father was notified. Both parents identified articles and clothing found on the boy here this afternoon.

Bank Statement Ruling.

Raleigh, N. C., April 22.—B. R. Lacy, state treasurer, has sent out a letter to all banks and state officials, advising them of the action taken by the North Carolina general assembly this year in passing an act requiring all banks that have monies belonging to the state to publish the amount in their statements. "The last legislature passed a law, H. B. 1676, S. B. 1518, requiring all banks that have any monies belonging to the state to publish the amount in their statements," his letter reads. "Section 1. All banks in which any money is on deposit by the state of North Carolina, or any of the officials thereof shall, in their published statements as by law required, show the amount of money on deposit in such bank to the credit of the state, or of any official thereof, and no official of the state shall deposit money in any bank which shall refuse to comply with the provisions of this act. "As it does not allow any official to deposit money in a bank which shall refuse to comply with the provisions of this act, I write to request that you will send me, every time you publish a statement, a clipping from the paper in which you publish a statement, so I can obey the law. This is important."

New Cotton Mill is Proposed for Lowell.

Lowell, April 23.—Lowell has landed the new cotton mill. This is to be a very large and will bring much trade and money to Lowell. It is the Art Cloth Weave Mill, and there will also be a dyeing establishment. It will be located on the land sold to the mill by D. W. Mitchem, and is about two blocks from the town, and lies from there to the river, being on both sides of the interurban line. There are some smaller tracts also in the deal. The deal also includes a right of way for roads, and the street leads directly to the Southern railroad depot.

Shoe Workers Strike Settled.

Lowell, Mass., April 24.—The strike of workers affiliated with the Amalgamated Shoe Workers of America, was ended today and work was resumed fully in the forty-eight factories affiliated with the Lynn Shoe Manufacturers Association. After all night conference a settlement was reached between officials of the Manufacturers Association and of the union. George Gibson, a National leaguer for many years, is now in the American league. The former catcher and late manager of the Pirates is coaching Donnie Bush's Senators. Little doubt that "Joekie" Conlon will prove a handy pastime for the Braves. In exhibition games the ex-Harvard captain played well in the infield and hit for 400.

GEORGE BURFELL DIES

IN BLAZE AT KINSTON 1,700 Bales of Cotton Burned When Warehouse Goes Up—Loss \$300,000.

Kinston, April 23.—George C. Burfell, son of former Chief of Police Burfell of Kinston, perished in the flames which destroyed a brick warehouse and 1,700 bales of cotton owned by the North Carolina Cotton Growers' Co-operative association, this afternoon. Burfell, who was 22 years old, was a volunteer fireman, engaged in fighting the flames. A search among the ruins for him after he was missed, following the fire, disclosed his badly burned body.

The blaze was spectacular. Flames were flaring across two streets when the firemen arrived. The blaze had gained great headway before its discovery. Five frame dwellings broke into flames, while rooftop fires were started here and there by sparks. A stiff wind fanned the flames. A falling wall crashed into the home of Jesse Suggs, almost completely covering his wife with debris. A heroic rescue was effected by firemen and bystanders. Mrs. Suggs was badly but not fatally hurt. Within 20 minutes the blaze was controlled. Firemen patrolled the district to deal with incipient blazes. Street pavements, trees and telephone poles were ruined.

FOREST FIRE IN EAST CAUSES MUCH DAMAGE

Timber Valued at \$10,000 and Number of Farm Houses Menaced. Fayetteville, N. C., April 24.—Timber valued at more than \$10,000 was destroyed, scores of farm houses and the lives of their occupants menaced, and some slight damage done to the crops by a forest fire which has been sweeping over an area of 60 miles in Cumberland and Harnett counties between Linden and Overhill's reservation. Fanned by high winds the fire reached its height between 8 o'clock last night and 3 o'clock this morning. It was still burning this morning but fire wardens believe it is under control.

Trinity Alumni of Norfolk and Richmond to Organize.

Durham, N. C., April 26.—Organization of Trinity college alumni of Richmond and Norfolk, Virginia; and Kinston, Greenville, Graham, and Lumberton in North Carolina within the next few days will complete an extensive campaign which has been waged in the past eight weeks by acting alumni secretary R. E. Thigpen. In the course of the campaign Mr. Thigpen travelled 3,600 miles, organized 40 associations, and visited 75 towns in the State in the interest of the campaign. The movement is the beginning of a systematic development of relations between Trinity alumni and the college, aimed at securing a more active interest. Principal among the items being arranged in the campaign is the yearly collection of a minimum of \$60,000, the interest on \$1,000,000 through subscriptions from alumni. Acting secretary Thigpen reports that as yet returns of subscriptions are incomplete, but that the amount will probably be realized. "A unique purpose to which part of the money collected will be put is the awarding of scholarships to undergraduate students in each congressional district in the State. The plan of award will be much the same that is carried out in naming Rhodes scholars to Oxford."

It Cannot Be Ignored.

Philadelphian Record. Speaker Gillett hits the nail square on the head when he says that "if Republican leaders are going to see red and oppose anything, however meritorious, which emanates from the League of Nations they are liable to drive away from the party may of those who have been most responsible for its character and its success." Not only are these stupid so-called leaders liable to do this, but they have already done it. The League of Nations is here to stay, with a constantly growing influence and authority in adjusting the troubles of the world, and the effect of the Republican bosses to ignore it is one of the silliest performances imaginable.

Only yesterday a news dispatch from Geneva announced that the League of Nations Council today achieved an amicable settlement of the Bulgarian and Greek dispute over the treatment of Bulgarian inhabitants in western Thrace, etc. And that sort of thing is being done today. The idea of old Henry Cabot Lodge, Brandegee, Moses, Watson and others that the League was its subsidiary Permanent Court of international Justice can be treated as being entirely non-existent shows the degree of imbecility to which the management of the G. O. P. has been now reduced.

Aviator Killed.

Newport News, Va., April 24.—Lieut. Logan H. Arthur, pilot of a messenger plane, was almost instantly killed at Langley Field today when his little machine went into a nose dive from an altitude of 200 feet and crashed on to the flying field. The aviator's skull was crushed.

Wake Forest Player Signs With Detroit.

Greenville, S. C., April 24.—Outfielder Clarkville 20, Wake Forest College, N. C., has been signed for trial with the Detroit baseball club, and will report at the end of the present season, it was learned here today through Eddie Herr, scout. On Her Way. Tommy—"Mother's throwing plates at father." Visitor—"Is she angry with him?" Tommy—"No, but she's working up to it."

Controversy Between Simmons and Evans Ended.

Atlanta, Ga., April 24.—The controversy between William J. Simmons, emperor, and H. W. Evans, Imperial wizard, for control of the Ku Klux Klan was ended today by a compromise, and the matter settled, on motion of attorneys for both parties.

Teacher: "I believe this is a new face." Freshie: "No, sir, I just washed it."

PENNY COLUMN

Mirrors Resilvered, New Mirrors Put in, all sizes. Work in city and Indianapolis called for. Work guaranteed. Phone 312R. Van Walter, 26-27-p.

For Sale—Good Second Hand Bicycle, Ritchie Hardware Co. 27-11p.

CONCORD COTTON MARKET. THURSDAY, APRIL 26, 1923. Cotton 27 Cotton seed 26

CRISIS IS PASSED BY MRS. J. HANA

Declares Tanlac Ended Long Suffering From Stomach Trouble, Palpitations and Weakness.

The best of testimonials in behalf of Tanlac grows daily as new tests of its powers are made. Mrs. James Hanna, wife of a well-known grocery merchant, residing on South Broad St., extension Gastonia, N. C., made the following statement a few days ago: "By the help of Tanlac I have overcome a case of indigestion that had made life miserable for me for two years. I seldom got a good night's sleep for I often woke up with my heart fluttering and acting so strangely that it alarmed me and set my nerves all in a frenzy. I couldn't walk up the steps at the back of our house without getting exhausted and out of breath. I suffered terribly from the gas, which formed in my stomach after every meal and I got so run-down and weak I could hardly go at all. "By the time I had finished half of my first bottle of Tanlac, I felt a wonderful change coming over me and after taking the second bottle I was like a different person. Indigestion, shortness of breath, heart palpitation, nervousness, or anything else troubles me now. I will always bless the day I began taking Tanlac. Tanlac is for sale by all good druggists. Accept no substitute. Over 37-million bottles sold."
