RAILROAD MATTERS SUBJECT OF ADDRESS

Delivered in Kansas City Friday by President Harding.

Kansas City, Mo., June 22.—Consolidation of the railroads of the country into a small number of systems is a rational, justifiable step, full of promise towards solution of the transportation problem, President Harding declared here tonight in the second address of his western trip.

"If the system consolidations will not afford the solution," he said, "then our failure will enforce a costlier experiment and the one great commitment which I hope the United States will forever escape."

The executive expressed the belief that this one great commitment—government operation—would be "a colossal blunder, which would destroy initiative, infect us with political corruption, create regional jealousies and impose incalculable cost on the public treasury."

Discussing relations between the carriers and their employes as a vital factor in the transportation situation, the President announced that he favored continuance of the railroad labor board "under such modifications as seem most likely to make the plan successful."

He said he was not convinced that the test of this plan had been "a complete and entirely fair one," but added that "it is little to hope for until all concerned are ready to comply promptly with the board's decisions."

"I am frank to say," he continued, "I do not hope for compliance on the part of employes so long as decisions are ignored by the managers."

Concord Has a Playground.

The matter of a public playground for Concord children has claimed the attention of most of the civic clubs and the City Fathers at various times and much has been done about it by way of discussion. It remained, however, for one of our public spirited manufacturing companies to actually produce the thing and convert the commendable idea into a pleasing reality.

While this playground did not quite "spring up overnight," it appeared almost as mysteriously. If one had not known in whose employ the workmen were he would have been at a loss to determine who was responsible for it. It was not promised nor announced and has not even been christened; but just off North Kerr Street, at the end of Misenheimer Avenue, on a beautiful slope crowned with stately oaks, happy children gather at all hours of the day and amuse and enjoy themselves with an outfit of the most modern playground equipment.

At night electric lights twinkle merrily through the foliage of the trees revealing great throngs of lads and lassies, men and maidens, patriots and matrons, disporting themselves "as the number of their days will allow."
