Are Your Floors Perfect?

Dirty, worn, partially painted or varnished floors are a disgrace, but most folks have tolerated them because they could not afford new floors. Then, too, it's such a long-drawn out job to lay and finish them.

The "American Universal" Re-Surfacing Method

This method re-surfaces your floors so they are like new. Paint, varnish, dirt, stains, worn spots, are removed, and they are ready to refinish to suit. It takes but a short time to do the work.

Old Floors Made Like New New Floors Made Perfect

Newly laid floors are easily and quickly brought to a clean, smooth surface by the American Universal method. This method saves the builder or general contractor hours of back-breaking labor and does the work much quicker, better and at less cost.

No Floors too Old No Floors too New
No Floors too Small No Floors too Large

"American Universal" method finishes any floor beautifully and entirely without the usual muss. A vacuum fan deposits all dirt in a bag, leaving the job clean as you go along.

Let us explain the method and quote you prices.

CONSIDER THIS:

In building, the first cost is the last cost for many years to come, if the building has first class materials put together by first class workmen. Poor workmanship will spoil good materials and repair bills will quickly add to the initial cost. The low bid is not always the cheapest bid.

In letting Building Contracts think of the future as well as the actual bids. Ask yourself if the bidder has a reputation for fair dealing, reliability, and honesty.

If he is known to have such a reputation, his bid is actually cheaper in the long run, than the bid which in dollars and cents appears to be smaller from a firm which has not yet made a reputation. It will pay you to think these statements over.
