The hard surface road from Concord to Charlotte is nearing completion in Cabarrus county. With the exception of about two miles the road has been completed in this county, while there are about three miles in Mecklenburg that have not been paved. In addition to the stretches still to be paved there are several bridges on the road that have not been completed, and it will be several months before the road can be opened to the public.

BULLETS THROUGH A WALL KILL A MAN IN NEXT ROOM. Fired to Stop a Noisy Party and Slay Surrenders Himself. York, Pa., Sept. 30.—Oscar Green, 24 years old, was shot and killed at Spring Grove last night by Leroy Turner, who, angered by a disturbance which occurred in a room adjoining the one occupied by himself and wife, sent three bullets through the board partition separating the two rooms. Turner surrendered himself to Constable Shue and was committed to jail. The men are negroes.

The shooting occurred shortly before midnight. Turner was disturbed by the noise made by a drinking and card party, he claims, and after he had requested that the noise cease, his wife being in a delicate condition, he fired. He is employed by William States, of Philadelphia, on a State road contract. Both he and Green came here from Virginia.

Perfect Planes Save Lives of Aviators. Washington, Sept. 29.—Successful completion of the recent five-day test in the transcontinental air mail service was only possible, in the opinion of officials of the Post Office Department, because of the extreme care taken to keep mail planes in perfect condition.

Each of the seventy air mail ships is inspected daily in the post minute detail. As the ship is brought in from flight a tabulated sheet is attached on which there are more than 100 points to be inspected. As each point is inspected, and repaired if necessary, the mechanics affix their signatures, and the report is not complete until signed by a chief mechanic and accepted by the pilot of the plane. Since the inauguration of this system, the number of fatalities in the service has decreased greatly.

Strict orders against "stunt" flying while testing out new planes, have increased the safety of pilots, as did the scrapping of a defective type of ship in use in 1920. Fatal accidents by years were: 1918, one; 1919, five; 1920, fifteen; 1921, nine; 1922, one; and 1923 (first eight months), three.

The rating for over a million and a half scheduled miles of flying during the fiscal year ended June 30, 1923, was 96.73 percent perfect, and the score was prevented from being perfect only by two minutes tardiness by one pilot in unloading his mail bags. The air mail service has at no time in its five years experience developed a rating of less than 78.04 percent, that for 1920.

Air Mail Service To London. St. Louis, Oct. 2 (By the Associated Press).—Rear Admiral Moffett, chief of the bureau of aeronautics of the U. S. He added that the next long flight of the ZR-1 would be from Lakehurst, N. J., to Panama, and return, via Cuba.
