## Bible Thought For The Day

HUMILITY AND EXALTATION :-Humble yourselves therefore under the mighty hand of God. that he may exalt vow in due time .- 1 Peter 5:6.

The special school tax election which will be held on November 20th is the most important school question put before the people of the county during the past decade and longer. It is simply the question of whether or not the people of the rural sections of Cabarrus County want their children to have better school advantages. And the question has to be apswered by the people themselves. The matter rests with them now, and whether or not they vote for the tax will de- Virginia was the largest, amounting to termine whether the schools are to be organized.

## FORD'S POPULARITY.

There are some people who find it practically impossible to understand Henry Ford's popularity with the farmers and the laboring folks generally. It is not hard to understand, we feel, when many of the facts are known.

· Labor, the organ of the unions, give ome of the facts in a recent article in which it states that on the Ford railroad the average monthly earning of employes is \$185 against \$133 on other roads.

There is no Sunday or overtime work on the Ford system, and the union paper finds that this means work for more men on the eight-hour shift. The paper points out further that under the Ford management the road is making money. something it never did before.

In all of his plants Mr. Ford pays good money. In addition he has promispeople born in other states. Thus our be said to his credit that he paid good wages and offered good cheap commodi ties even before he was ever considered his work impressive.

### BETTER HEALTH SOUGHT THROUGH CLEANER AIR Smeke Nuisances in Cities Again Receiving Attention.

Washington, Oct. 29.—Smoke nui sance in cities is again receiving the attention of civic authorities and organizations in their campaign for its elimnation, reports to the Interior Depart ment indicate. The campaign was suspended during the war, when most of the country's smoke ordinances were held in abeyance to allow industries to operate unrestrictedly when maximum production was necessary. With the return of normal conditions many cities have shown a determination to take up this matter seriously and work out a solution.

Residence smoke, while making probably less than 10 per cent. of the total smoke of a city, is particularly objecionable because it is produced in the FIND COUPLE DEAD IN section where its damaging possibilities are at a maximum.
