On all the new Star Car models, the spark and throttle levers are mounted on the steering column instead of being attached to the instrument board.

As in the previous models, the standard instrument and equipment includes a speedometer, dash light, oil guage, ammeter, ignition switch and improved choke rod, which is also mounted on the instrument board in place of the wire choke which was connected through the instrument board bracket. This makes it much easier to operate and improves the appearance. There has also been added to the line two sport models, a Five Passenger Touring and a Sedan.

The new Star special models provide for the first time distinctively high class sport cars at exceedingly moderate prices. We have these new cars in stock. Call and let us show them to you.
